**RE: Georgia-Pacific Savannah River Mill and Georgia Power Plant McIntosh Modeling for EPA's Data Requirements Rule for the 2010 1-Hour SO<sub>2</sub> NAAQS**

Dear Ms. Banister:

On June 8, 2016, the Georgia Environmental Protection Division (EPD) submitted a letter to EPA describing the approach that will be used to characterize air quality at sources in Georgia that had annual actual SO<sub>2</sub> emissions exceeding 2,000 tons per year (tpy) in 2014. In that letter, EPD stated that Georgia-Pacific Savannah River Mill and Georgia Power Plant McIntosh would be characterized with air quality modeling.

A modeling protocol was submitted to EPA on June 15, 2016. This submittal contains three items: (1) a modeling report submitted by Georgia-Pacific to EPD; (2) a final modeling report created by EPD; and (3) a copy of all modeling inputs/output files on a DVD.

Should you or your staff have any questions or comments, please feel free to contact Jim Boylan at [James.Boylan@dnr.ga.gov](mailto:James.Boylan@dnr.ga.gov) or 404-363-7014.

Sincerely,

Karen D. Hays, P.E.  
Chief, Air Protection Branch  
Georgia Environmental Protection Division
