

Instruction to generate the EDD format file in Excel (In 5 easy steps)

1. Open EDP (EQuIS Data Processor), you can download the EDP from <http://earthsoft.com/products/edp/edp-format-for-epar2/>
2. If you haven't opened your EDD format file, you need to open the EPA Region 2 Format File (v3.00.30). You can download this format file from: <http://earthsoft.com/products/edp/edp-format-for-epar2/>
3. Once you opened the EPA Region 2 Format file, you should be able to see the Tool bar same as the following:

4. On the right hand side, you can generate the “Blank EDD”, or “EDD Description” in Excel version. See the picture below:

5. Click those buttons to generate a blank EDD in Excel.
