

Navajo Abandoned Uranium Mine

Site Screen Report

This form is for use at the site of abandoned uranium mines (AUM) located on Navajo Nation lands. Applicable sites include all mine and mine features that have or have not undergone reclamation by the Navajo Abandoned Mine Lands Reclamation Program, including features, adits, pits and waste piles. Applicable sites also include all AUM sites listed in the USEPA CERCLIS database, all sites listed in the 2008 AUM GIS Report issued by USACOE and USEPA, all AUM sites on allotment lands associated with the Navajo Nation, and any and all AUM sites not listed in any database located on Navajo lands. Reconnaissance of any sites located on lands adjacent to Navajo lands that may be impacting Navajo lands will need to be coordinated with the authorities appropriate to those lands.

The purpose of the form is to ascertain the status and location of the identified AUM site, and record all immediate site information associated with the mine site. Decisions and recommendations on what additional steps are needed will be provided on a separate document.

Charles Huskon No. 10 AUM Site

Navajo AUM Western Region

Prepared by:

Weston Solutions, Inc.

Contract: W91238-06-F-0083

12767.063.599.1111

January 2011

Part I Site Identification, Location and Status

Site Names and ID numbers as applicable

Mine ID: 141; 232

Map ID: *141:* W73; *232:* W74

CERCLIS: NNN000909069

Navajo Abandoned Mine Land Reclamation Program: *141:* NA-0155A; *232:* NA-0155B

Local name / Aliases: Charles Huskon #10; Huskon #10

Chapter and local area: Cameron Chapter

County: Coconino **State:** Arizona

Lat/Long: *141:* 35.7804596564 N / -111.351648855 W
232: 35.7811890059 N / -111.345344543 W

Nearby road and highway: Highway 89 **Local Post Office:** Cameron, AZ

Surface Land Status: check one or more and provide ownership and contact information below

Tribal Trust Land	<input checked="" type="checkbox"/>	Public lands	<input type="checkbox"/>
Private	<input type="checkbox"/>	Tribal Fee Land	<input type="checkbox"/>
Bureau of Land Mgmt	<input type="checkbox"/>	Allotment	<input type="checkbox"/>
State	<input type="checkbox"/>	Fee land	<input type="checkbox"/>

Subsurface Mineral Rights:

No information on subsurface mineral rights ownership was found in the EPA/AUM Database.

Claim and operator information:

The Charles Huskon No. 10 mine claim consists of 2 separate mine sites (#'s 141, 232). The mine claim surface land status is classified as Tribal Trust Land. Historical documents showed the operator of the mine as the Arrowhead Uranium Corporation from 1953 to 1954, and the Rare Metals Corporation from 1956 to 1961. No additional ownership / lease information was identified in the EPA/AUM database.

Number of residential structures within 200 feet of mine: None

Estimated volume of mine waste onsite: None

Part II Summary of radiological readings

Mine ID: 141

Highest gamma radiation measurement:

191,096 counts per minute (cpm)

Describe any other radiological measurements:

A total of 3,772 gamma radiation measurements were collected from the mine site, ranging from 8,053 cpm to 191,096 cpm. The measurements are represented in Figures 1 and 2.

Background Readings: 14,960 cpm

Background Average: 14,960 cpm

Distribution Chart and Statistics:

The following chart and statistics were generated by ESRI ArcGIS 9.3.1, and show the general distribution of the site gamma radiation measurements. The horizontal X axis represents the gamma radiation reading levels in cpm (lowest levels to the left). The vertical Y axis represents the frequency of each gamma radiation level.

Count:	3772
Minimum:	8053.00000
Maximum:	191096.00000
Sum:	62484089.00000
Mean:	16565.24099
Median:	14792.50000
Standard Deviation:	10025.65377

Mine ID: 232

Highest gamma radiation measurement:

264,486 counts per minute (cpm)

Describe any other radiological measurements:

A total of 2,601 gamma radiation measurements were collected from the mine site, ranging from 10,228 cpm to 264,486 cpm. The measurements are represented in Figures 1 and 2.

Background Readings: 14,960 cpm

Background Average: 14,960 cpm

Distribution Chart and Statistics:

The following chart and statistics were generated by ESRI ArcGIS 9.3.1, and show the general distribution of the site gamma radiation measurements. The horizontal X axis represents the gamma radiation reading levels in cpm (lowest levels to the left). The vertical Y axis represents the frequency of each gamma radiation level.

Count:	2601
Minimum:	10228.00000
Maximum:	264486.00000
Sum:	65091928.00000
Mean:	25025.73164
Median:	15661.00000
Standard Deviation:	29381.67287

Part III Status of Reclamation and Mine Waste

Mine ID: 141

The following information was obtained from the Navajo Abandoned Mine Land Reclamation Program (NAMLRP) Point Features Database:

NAMLRP Status of the mine site: Reclaimed: Yes **Waste Pile onsite:** No

NAMLRP Project Number: NA-0155A

NAMLRP Mine features: 1 Rim Strip / Pit

The following information was obtained from field observations collected during the 2010 site screening:

Provide description and status of all mine sites and features at site. Include all waste piles, adits, pits and other features, and indicate whether they are open, closed, covered, capped, buried or unreclaimed. Indicate approximate size, shape and extent, including description of any reclamation caps. Note condition of all caps.

Observed reclamation work and status:

Adits

None

Waste Piles

None

Pits

None

Shafts

None

Other Debris and Mine Features

Reclamation cap in center of site

Mine ID: 232

The following information was obtained from the Navajo Abandoned Mine Land Reclamation Program (NAMLRP) Point Features Database:

NAMLRP Status of the mine site: Reclaimed: Yes

Waste Pile onsite: No

NAMLRP Project Number: NA-0155B

NAMLRP Mine features: 1 Rim Strip / Pit

The following information was obtained from field observations collected during the 2010 site screening:

Provide description and status of all mine sites and features at site. Include all waste piles, adits, pits and other features, and indicate whether they are open, closed, covered, capped, buried or unreclaimed. Indicate approximate size, shape and extent, including description of any reclamation caps. Note condition of all caps.

Observed reclamation work and status:

Adits

None

Waste Piles

None

Pits

None

Shafts

None

Other Debris and Mine Features

Large depression area in the center of the site

Part IV

Site observations and Environs

Observed Structures: list number of and describe human habitation status of structures at the following distances from mine:

0 to 200 feet: None

200 feet to 0.25 mile: None

Observed Public or commercial structure: list and describe all schools, clinics, Chapter Houses, places of business and any other structure used by members of the community at the following distances:

0 to 200 feet: None

200 feet to 0.25 mile: None

Levels measured around the perimeter(s) of the identified structure(s):

None

Observed water sources: list the number and type of wells and surface water sources that are potentially used for human consumption at the following distances from the mine:

0 to 0.25 miles: None

0.25 miles to 4 miles: Windmill Well approximately 3.25 mi SW of the site 141, 3.5 mi SW of site 232; Little Colorado River Basin approximately 1.25 mi E of site 141, 1 mi E of site 232.

Sensitive environments: note and describe all sensitive environments located within visible range of the mine site, including: wetlands, endangered species, habitats and approximate locations of sites that may be under protection of the government of the Navajo Nation.

None

Known Site History: include information from interviews with Chapter officials and residents. Note information on mine ownership, type of mining operation, period of operation, known amount of production, and any other information as provided.

Charles Huskon No. 10 mine claim consists of 2 separate mine sites (#'s 141, 232) with a total combined area of 169,097.93 m². The mine claim was identified as being operational from 1953 to 1961. Historical documents showed the operator of the mine as the Arrowhead Uranium Corporation from 1953 to 1954, and the Rare Metals Corporation from 1956 to 1961. While operational, the mine had a total reported production volume of 17,084 tons. No other historical information or any additional ownership / lease information was identified in the EPA/AUM database.

Part V Response Action Summary

Summary of Evaluation Factors:

Accessibility:

Was the mine easily accessible to potential human activity?

Yes

Radiological Measurements:

Were any gamma radiation measurements collected at the mine greater than two times the site-specific background levels?

Yes

Waste Piles:

Were any unreclaimed waste piles observed at the mine with gamma radiation measurements greater than two times the site-specific background levels?

No

Structures:

Were any structures observed within 200 feet of the mine?

No

Potential Drinking Water Sources:

Were any potential drinking water sources observed within 4 miles of the mine?

Yes

Reclamation:

Was the mine reported to be previously reclaimed, or did the mine appear to be reclaimed?

Yes (reclamation cap in center of site 141)
