Dan and Emily,
In addition to Sonja's changes flagged by the FR office on pages 34 and 39, on pages 95 and 97 they have deleted the definitions of operation and final closure. I know that we put those definitions in the preamble to emphasize the changes, but see if you are OK with their deletion or would like to modify that language (even if it is to put a statement in like "see the definition section").

Subject: Making a docket available to the public before publication of the final rule in the Federal Register

Hi Assem –

I understand from talking with Amparo Castillo that you are the OAR docket manager, and as such are the docket manager for Docket ID No. EPA-HQ-OAR-2008-0218. The Administrator signed the final rule associated with this docket on December 20, 2016. The final rule has not yet been published in the Federal Register so this docket has not been opened for viewing by the public. I understand from talking with Amparo that it is possible to open the docket now for the public rather than waiting to do so on the day the rule is published in the Federal Register. Is that true? If so, what process do we need to follow to make that happen?

I would appreciate you sending me any information we need to make this request. We are in a bit of a hurry to open this docket so I would really appreciate receiving that information today so we can get the process started.

You can reach me at 703-664-0258 if you have any questions.

Thanks,

Susan Stahle

Sonja,
Thanks. I looked over the document. Given that Dan has said everything is in the docket and that the document in question is a pdf and has final in the footer, and that the RTC document has been done for a while, I am pretty sure it is the final version and that the issue is with the "draft" in the file name rather than the contents of the file. However, let's wait until Monday to open the docket after we can confirm with Dan and Tony and we will resubmit the file without "draft" in the title.

Dan, Tony, Tom, Can any of you confirm whether the document identified by Assem is ready to be processed and posted. Recall that the CAA requires us to have all documents relied on in the rulemaking in the docket by the date of signature of the final rule. Also, can someone confirm that all of the written exchanges with OMB were added to the docket?

Thanks all for your help. Regards – Sonja

Subject: Making a docket available to the public before publication of the final rule in the Federal Register

Hi Assem –

I understand from talking with Amparo Castillo that you are the OAR docket manager, and as such are the docket manager for Docket ID No. EPA-HQ-OAR-2008-0218. The Administrator signed the final rule associated with this docket on December 20, 2016. The final rule has not yet been published in the Federal Register so this docket has not been opened for viewing by the public. I understand from talking with Amparo that it is possible to open the docket now for the public rather than waiting to do so on the day the rule is published in the Federal Register. Is that true? If so, what process do we need to follow to make that happen?

I would appreciate you sending me any information we need to make this request. We are in a bit of a hurry to open this docket so I would really appreciate receiving that information today so we can get the process started.

You can reach me at 703-664-0258 if you have any questions.

Thanks,

Susan Stahle

MEMORANDUM

SUBJECT: Posting EPA-HQ-OAR-2008-0218 to Regulations.gov for Public Access

FROM: Daniel Schultheisz
Office of Radiation and Indoor Air
Office of Air and Radiation

Tom Peake for Dan Schultheisz

Thru: Alan Perrin *Lee Veal for ADP*
Acting Division Director, Radiation Protection Division
Office of Radiation and Indoor Air
Office of Air and Radiation

This memorandum authorizes the posting of EPA-HQ-OAR-2008-0218 to Regulations.gov for public access.

On December 20, 2016, Administrator McCarthy signed the final rule entitled "Revisions to National Emission Standards for Radon Emissions from Operating Mill Tailings" (Subpart W Final Rule). This final rule is posted on EPA's website at <https://www.epa.gov/radiation/subpart-w-rulemaking-activity>. The Subpart W Final Rule has not yet been published in the Federal Register and it is uncertain when publication will occur. EPA desires to make the docket for this final rule available to the public now rather than wait until the final rule is published in the Federal Register.

Subject: RE: Making a docket available to the public before publication of the final rule in the Federal Register

All,
After talking with Ray Lee I am confused as to why we need a new docket. Ray says that the final rule uses the same docket as the proposed rule, and we just put the final rule documents in the existing docket. If I understand Ray correctly, we could just populate the existing docket now with the supporting documents we used.

I sent Ray the memo in Sue's email and he is looking at it.

This is probably worth doing even if it only gives us an extra day or so before publication.

Sonja –

As you can see below, it is possible to open the docket for this rule now. I have taken the memo template Assem sent and am attaching a revised version that I believe will be what he needs to open the docket. It has one placeholder for ORIA to fill in and I highlighted the

Schultheisz, Daniel <Schultheisz.Daniel@epa.gov>; Peake, Tom <Peake.Tom@epa.gov>

Subject: Making a docket available to the public before publication of the final rule in the Federal Register

Hi Assem –

I understand from talking with Amparo Castillo that you are the OAR docket manager, and as such are the docket manager for Docket ID No. EPA-HQ-OAR-2008-0218. The Administrator signed the final rule associated with this docket on December 20, 2016. The final rule has not yet been published in the Federal Register so this docket has not been opened for viewing by the public. I understand from talking with Amparo that it is possible to open the docket now for the public rather than waiting to do so on the day the rule is published in the Federal Register. Is that true? If so, what process do we need to follow to make that happen?

I would appreciate you sending me any information we need to make this request. We are in a bit of a hurry to open this docket so I would really appreciate receiving that information today so we can get the process started.

You can reach me at 703-664-0258 if you have any questions.

Thanks,

Susan Stahle

Stephanie:

Attached is a revision that addresses OFR comments in redline-strikeout. These revisions incorporate review by OGC.

I note two edits that were not highlighted by OFR. On page 105, a paragraph was re-formatted by OFR. This formatting issue seems to have resulted when a set-off quote became combined with the preceding paragraph (probably when creating the final clean version), so that the entire paragraph was indented. I have revised this to keep the quote within the paragraph.

In the regulatory text, section 61.255(c)(1) refers to the CDX website (page 142). I have updated this reference. This change was requested from OP along with a similar change to footnote 19 (page 83), by hand-marking the printed version submitted to the OFR. The change was made in footnote 19, but not in the regulatory text.

Please let me know if you have any questions or need more information. Thanks.

It looks like OFR did not incorporate all the revisions on p. 95 regarding the proposed revision to the definition of operation. I thought your addition provided nice clarification regarding what we proposed and it's worth including. That said, the sentence is accurate as written in the OFR's most recent version.

Stephanie:

I have reviewed the document, and found two places where ORIA edits were not incorporated by OFR. These are described below.

Page 95, last sentence above the deleted definition:

OFR version: "...definitions at 40 CFR 61.251 to remove the reference to "new" tailings..."

ORIA edit: "...definitions at 40 CFR 61.251 to ~~replace~~ remove the reference to "new" tailings with the broader term "uranium byproduct material or tailings" ..." (the trailing comma can be retained at OFR discretion)

Explanation: more precise indication of the change addresses removal of reg text.

Page 105, first full paragraph reformatted by OFR:

ORIA edit: Text following "40 CFR part 192:" in the third sentence should be in quotation marks (i.e., should read "Even if a portion...as defined by 40 CFR 192.31(q)" before the FR citation).

Explanation: This single paragraph was originally an introductory paragraph ending with "40 CFR part 192:" that was followed by an off-set FR citation. In creating the clean version of the document, it appears these two separate pieces became combined as one off-set paragraph. The simplest solution is to retain the quoted material within the paragraph, but add the quotation marks.

We appreciate the opportunity to review the document. Please let me know if there are questions.

Thanks.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

Attached is a revision that addresses OFR comments in redline-strikeout. These revisions incorporate review by OGC.

I note two edits that were not highlighted by OFR. On page 105, a paragraph was re-formatted by OFR. This formatting issue seems to have resulted when a set-off quote became combined with the preceding paragraph (probably when creating the final clean version), so that the entire paragraph was indented. I have revised this to keep the quote within the paragraph.

In the regulatory text, section 61.255(c)(1) refers to the CDX website (page 142). I have updated this reference. This change was requested from OP along with a similar change to footnote 19 (page 83), by hand-marking the printed version submitted to the OFR. The change was made in footnote 19, but not in the regulatory text.

Please let me know if you have any questions or need more information. Thanks.

Hello,

Attach you will find OFR edits and comments to your document for your approval.

As a Reminder: Please do not use the “accept” nor “reject” feature for any of the changes, please leave the redline/strikeout if it’s apparent in the OFR Word file and make sure your edits, if any, are also apparent in redline/strikeout

NOTE from OFR:

Hello again – edits to a rule are attached for your review. Also, please see the requests for replacement text on pp. 34 and 39. Thanks --

Thanks Daniel,

I reviewed your edits and I am pretty sure both edits not done by OFR are intentional because: 1) “replace” in the text you are using is not acceptable for OFR publication; and 2) the quotations: you will be quoting text already published in the Federal Register.

Just so you will know that I am forwarding your concerns and see if we can work it out with OFR to make 1 or both these edits. I am heading to 2 meetings now, so hopefully I will have a response when I return.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

I have reviewed the document, and found two places where ORIA edits were not incorporated by OFR. These are described below.

Page 95, last sentence above the deleted definition:

OFR version: "...definitions at 40 CFR 61.251 to remove the reference to "new" tailings..."

ORIA edit: "...definitions at 40 CFR 61.251 to ~~replace~~remove the reference to "new" tailings **with the broader term "uranium byproduct material or tailings"...**" (the trailing comma can be retained at OFR discretion)

Explanation: more precise indication of the change addresses removal of reg text.

Page 105, first full paragraph reformatted by OFR:

ORIA edit: Text following "40 CFR part 192:" in the third sentence should be in quotation marks (i.e., should read "Even if a portion...as defined by 40 CFR 192.31(q)" before the FR citation).

Explanation: This single paragraph was originally an introductory paragraph ending with "40 CFR part 192:" that was followed by an off-set FR citation. In creating the clean version of the document, it appears these two separate pieces became combined as one off-set paragraph. The simplest solution is to retain the quoted material within the paragraph, but add the quotation marks.

We appreciate the opportunity to review the document. Please let me know if there are questions. Thanks.

Thanks. Please let me know what they say. We may be able to modify the language for the first one. For the second, it appeared at first to be just a question of formatting. If there is concern about having the FR citation in the document, that is a much more substantive comment that touches on the rationale for an aspect of the rule. As it stands now, that paragraph will be confusing to readers.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Dan, Unfortunately, it is true that OFR will not allow quotations from other FR notices. You may need to paraphrase the quote or make other edits to make the paragraph clear.

Sonja L. Rodman, Assistant General Counsel for Air Toxics, Consumer Protection and Indoor Air / Office of General Counsel / U.S. Environmental Protection Agency / (202) 564-4079 / 202-768-2120 (cell)

Thanks. Please let me know what they say. We may be able to modify the language for the first one. For the second, it appeared at first to be just a question of formatting. If there is concern about having the FR citation in the document, that is a much more substantive comment that touches on the rationale for an aspect of the rule. As it stands now, that paragraph will be confusing to readers.

Thanks Daniel,

I reviewed your edits and I am pretty sure both edits not done by OFR are intentional because: 1) “replace” in the text you are using is not acceptable for OFR publication; and 2) the quotations: you will be quoting text already published in the Federal Register.

Just so you will know that I am forwarding your concerns and see if we can work it out with OFR to make 1 or both these edits. I am heading to 2 meetings now, so hopefully I will have a response when I return.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

I have reviewed the document, and found two places where ORIA edits were not incorporated by OFR. These are described below.

Page 95, last sentence above the deleted definition:

OFR version: “...definitions at 40 CFR 61.251 to remove the reference to “new” tailings...”

ORIA edit: “...definitions at 40 CFR 61.251 to ~~replace~~ remove the reference to “new” tailings **with the broader term “uranium byproduct material or tailings”**...” (the trailing comma can be retained at OFR discretion)

Explanation: more precise indication of the change addresses removal of reg text.

Page 105, first full paragraph reformatted by OFR:

ORIA edit: Text following “40 CFR part 192:” in the third sentence should be in quotation marks (i.e., should read “Even if a portion...as defined by 40 CFR 192.31(q)” before the FR citation).

Explanation: This single paragraph was originally an introductory paragraph ending with “40 CFR part 192:” that was followed by an off-set FR citation. In creating the clean version of the document, it appears these two separate pieces became combined as one off-set paragraph. The simplest solution is to retain the quoted material within the paragraph, but add the quotation marks.

We appreciate the opportunity to review the document. Please let me know if there are questions.
Thanks.

Stephanie:

Attached is a revision that addresses OFR comments in redline-strikeout. These revisions incorporate review by OGC.

I note two edits that were not highlighted by OFR. On page 105, a paragraph was re-formatted by OFR. This formatting issue seems to have resulted when a set-off quote became combined with the preceding paragraph (probably when creating the final clean version), so that the entire paragraph was indented. I have revised this to keep the quote within the paragraph.

In the regulatory text, section 61.255(c)(1) refers to the CDX website (page 142). I have updated this reference. This change was requested from OP along with a similar change to footnote 19 (page 83), by hand-marking the printed version submitted to the OFR. The change was made in footnote 19, but not in the regulatory text.

Please let me know if you have any questions or need more information. Thanks.

I hate opening this can of worms, but on the very same page (105) there is a quotation from the FR that was not in any way touched by OFR. I'm sure there are others, as the FR is the primary source for explaining what we have done. Example: footnote 10 on page 48.

Having said that, I was just thinking that if a paraphrase will make them happy, it should not be difficult. I am just looking for some clarity and consistency.

Hello,

Attached you will find OFR edits and comments to your document for your approval.

As a Reminder: Please do not use the “accept” nor “reject” feature for any of the changes, please leave the redline/strikeout if it’s apparent in the OFR Word file and make sure your edits, if any, are also apparent in redline/strikeout

NOTE from OFR:

Hello again – edits to a rule are attached for your review. Also, please see the requests for replacement text on pp. 34 and 39. Thanks --

Stephanie Morris

Thanks. Please let me know what they say. We may be able to modify the language for the first one. For the second, it appeared at first to be just a question of formatting. If there is concern about having the FR citation in the document, that is a much more substantive comment that touches on the rationale for an aspect of the rule. As it stands now, that paragraph will be confusing to readers.

Thanks Daniel,

I reviewed your edits and I am pretty sure both edits not done by OFR are intentional because: 1) “replace” in the text you are using is not acceptable for OFR publication; and 2) the quotations: you will be quoting text already published in the Federal Register.

Just so you will know that I am forwarding your concerns and see if we can work it out with OFR to make 1 or both these edits. I am heading to 2 meetings now, so hopefully I will have a response when I return.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

I have reviewed the document, and found two places where ORIA edits were not incorporated by OFR. These are described below.

Page 95, last sentence above the deleted definition:

OFR version: “...definitions at 40 CFR 61.251 to remove the reference to “new” tailings...”

ORIA edit: “...definitions at 40 CFR 61.251 to ~~replace~~remove the reference to “new” tailings **with the broader term “uranium byproduct material or tailings” ...**” (the trailing comma can be retained at OFR discretion)

Explanation: more precise indication of the change addresses removal of reg text.

Page 105, first full paragraph reformatted by OFR:

ORIA edit: Text following “40 CFR part 192:” in the third sentence should be in quotation marks (i.e., should read “Even if a portion...as defined by 40 CFR 192.31(q)” before the FR citation).

Explanation: This single paragraph was originally an introductory paragraph ending with “40 CFR part 192:” that was followed by an off-set FR citation. In creating the clean version of the document, it appears these two separate pieces became combined as one off-set paragraph. The simplest solution is to retain the quoted material within the paragraph, but add the quotation marks.

We appreciate the opportunity to review the document. Please let me know if there are questions.
Thanks.

Stephanie:

Attached is a revision that addresses OFR comments in redline-strikeout. These revisions incorporate review by OGC.

I note two edits that were not highlighted by OFR. On page 105, a paragraph was re-formatted by OFR. This formatting issue seems to have resulted when a set-off quote became combined with the preceding paragraph (probably when creating the final clean version), so that the entire paragraph was indented. I have revised this to keep the quote within the paragraph.

In the regulatory text, section 61.255(c)(1) refers to the CDX website (page 142). I have updated this reference. This change was requested from OP along with a similar change to footnote 19 (page 83), by hand-marking the printed version submitted to the OFR. The change was made in footnote 19, but not in the regulatory text.

Please let me know if you have any questions or need more information. Thanks.

Dan and Emily,
In addition to Sonja's changes flagged by the FR office on pages 34 and 39, on pages 95 and 97 they have deleted the definitions of operation and final closure. I know that we put those definitions in the preamble to emphasize the changes, but see if you are OK with their deletion or would like to modify that language (even if it is to put a statement in like "see the definition section").

Subject: Making a docket available to the public before publication of the final rule in the Federal Register

Hi Assem –

I understand from talking with Amparo Castillo that you are the OAR docket manager, and as such are the docket manager for Docket ID No. EPA-HQ-OAR-2008-0218. The Administrator signed the final rule associated with this docket on December 20, 2016. The final rule has not yet been published in the Federal Register so this docket has not been opened for viewing by the public. I understand from talking with Amparo that it is possible to open the docket now for the public rather than waiting to do so on the day the rule is published in the Federal Register. Is that true? If so, what process do we need to follow to make that happen?

I would appreciate you sending me any information we need to make this request. We are in a bit of a hurry to open this docket so I would really appreciate receiving that information today so we can get the process started.

You can reach me at 703-664-0258 if you have any questions.

Thanks,

It looks like OFR did not incorporate all the revisions on p. 95 regarding the proposed revision to the definition of operation. I thought your addition provided nice clarification regarding what we proposed and it's worth including. That said, the sentence is accurate as written in the OFR's most recent version.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

Attached is a revision that addresses OFR comments in redline-strikeout. These revisions incorporate review by OGC.

I note two edits that were not highlighted by OFR. On page 105, a paragraph was re-formatted by OFR. This formatting issue seems to have resulted when a set-off quote became combined with the preceding paragraph (probably when creating the final clean version), so that the entire paragraph was indented. I have revised this to keep the quote within the paragraph.

In the regulatory text, section 61.255(c)(1) refers to the CDX website (page 142). I have updated this

reference. This change was requested from OP along with a similar change to footnote 19 (page 83), by hand-marking the printed version submitted to the OFR. The change was made in footnote 19, but not in the regulatory text.

Please let me know if you have any questions or need more information. Thanks.

Hello,

Attached you will find OFR edits and comments to your document for your approval.

As a Reminder: Please do not use the “accept” nor “reject” feature for any of the changes, please leave the redline/strikeout if it’s apparent in the OFR Word file and make sure your edits, if any, are also apparent in redline/strikeout

NOTE from OFR:

Hello again – edits to a rule are attached for your review. Also, please see the requests for replacement text on pp. 34 and 39. Thanks --

It looks like OFR did not incorporate all the revisions on p. 95 regarding the proposed revision to the definition of operation. I thought your addition provided nice clarification regarding what we proposed and it's worth including. That said, the sentence is accurate as written in the OFR's most recent version.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

I have reviewed the document, and found two places where ORIA edits were not incorporated by OFR. These are described below.

Page 95, last sentence above the deleted definition:

OFR version: "...definitions at 40 CFR 61.251 to remove the reference to "new" tailings..."

ORIA edit: "...definitions at 40 CFR 61.251 to ~~replace~~~~remove~~ the reference to "new" tailings **with the broader term "uranium byproduct material or tailings"...**" (the trailing comma can be retained at OFR discretion)

Explanation: more precise indication of the change addresses removal of reg text.

Page 105, first full paragraph reformatted by OFR:

ORIA edit: Text following "40 CFR part 192:" in the third sentence should be in quotation marks (i.e., should read "Even if a portion...as defined by 40 CFR 192.31(q)" before the FR citation).

Explanation: This single paragraph was originally an introductory paragraph ending with "40 CFR part 192:" that was followed by an off-set FR citation. In creating the clean version of the document, it appears these two separate pieces became combined as one off-set paragraph. The simplest solution is to retain the quoted material within the paragraph, but add the quotation marks.

We appreciate the opportunity to review the document. Please let me know if there are questions.
Thanks.

Thanks Daniel,

I reviewed your edits and I am pretty sure both edits not done by OFR are intentional because: 1) “replace” in the text you are using is not acceptable for OFR publication; and 2) the quotations: you will be quoting text already published in the Federal Register.

Just so you will know that I am forwarding your concerns and see if we can work it out with OFR to make 1 or both these edits. I am heading to 2 meetings now, so hopefully I will have a response when I return.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

Attached is a revision that addresses OFR comments in redline-strikeout. These revisions incorporate review by OGC.

I note two edits that were not highlighted by OFR. On page 105, a paragraph was re-formatted by OFR. This formatting issue seems to have resulted when a set-off quote became combined with the preceding paragraph (probably when creating the final clean version), so that the entire paragraph was indented. I have revised this to keep the quote within the paragraph.

In the regulatory text, section 61.255(c)(1) refers to the CDX website (page 142). I have updated this reference. This change was requested from OP along with a similar change to footnote 19 (page 83), by hand-marking the printed version submitted to the OFR. The change was made in footnote 19, but not in the regulatory text.

Please let me know if you have any questions or need more information. Thanks.

Hello,

Attach you will find OFR edits and comments to your document for your approval.

As a Reminder: Please do not use the “accept” nor “reject” feature for any of the changes, please leave the redline/strikeout if it’s apparent in the OFR Word file and make sure your edits, if any, are also apparent in redline/strikeout

NOTE from OFR:

Hello again – edits to a rule are attached for your review. Also, please see the requests for replacement text on pp. 34 and 39. Thanks --

Thanks. Please let me know what they say. We may be able to modify the language for the first one. For the second, it appeared at first to be just a question of formatting. If there is concern about having the FR citation in the document, that is a much more substantive comment that touches on the rationale for an aspect of the rule. As it stands now, that paragraph will be confusing to readers.

Thanks Daniel,

I reviewed your edits and I am pretty sure both edits not done by OFR are intentional because: 1) “replace” in the text you are using is not acceptable for OFR publication; and 2) the quotations: you will be quoting text already published in the Federal Register.

Just so you will know that I am forwarding your concerns and see if we can work it out with OFR to make 1 or both these edits. I am heading to 2 meetings now, so hopefully I will have a response when I return.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

I have reviewed the document, and found two places where ORIA edits were not incorporated by OFR. These are described below.

Page 95, last sentence above the deleted definition:

OFR version: "...definitions at 40 CFR 61.251 to remove the reference to "new" tailings..."

ORIA edit: "...definitions at 40 CFR 61.251 to ~~replace~~remove the reference to "new" tailings **with the broader term "uranium byproduct material or tailings"...**" (the trailing comma can be retained at OFR discretion)

Explanation: more precise indication of the change addresses removal of reg text.

Page 105, first full paragraph reformatted by OFR:

ORIA edit: Text following "40 CFR part 192:" in the third sentence should be in quotation marks (i.e., should read "Even if a portion...as defined by 40 CFR 192.31(q)" before the FR citation).

Explanation: This single paragraph was originally an introductory paragraph ending with "40 CFR part 192:" that was followed by an off-set FR citation. In creating the clean version of the document, it appears these two separate pieces became combined as one off-set paragraph. The simplest solution is to retain the quoted material within the paragraph, but add the quotation marks.

We appreciate the opportunity to review the document. Please let me know if there are questions.
Thanks.

I hate opening this can of worms, but on the very same page (105) there is a quotation from the FR that was not in any way touched by OFR. I'm sure there are others, as the FR is the primary source for explaining what we have done. Example: footnote 10 on page 48.

Having said that, I was just thinking that if a paraphrase will make them happy, it should not be difficult. I am just looking for some clarity and consistency.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

Attached is a revision that addresses OFR comments in redline-strikeout. These revisions incorporate review by OGC.

I note two edits that were not highlighted by OFR. On page 105, a paragraph was re-formatted by OFR. This formatting issue seems to have resulted when a set-off quote became combined with the preceding paragraph (probably when creating the final clean version), so that the entire paragraph was indented. I have revised this to keep the quote within the paragraph.

In the regulatory text, section 61.255(c)(1) refers to the CDX website (page 142). I have updated this reference. This change was requested from OP along with a similar change to footnote 19 (page 83), by hand-marking the printed version submitted to the OFR. The change was made in footnote 19, but not in the regulatory text.

Please let me know if you have any questions or need more information. Thanks.

Thanks. Please let me know what they say. We may be able to modify the language for the first one. For the second, it appeared at first to be just a question of formatting. If there is concern about having the FR citation in the document, that is a much more substantive comment that touches on the rationale for an aspect of the rule. As it stands now, that paragraph will be confusing to readers.

Thanks Daniel,

I reviewed your edits and I am pretty sure both edits not done by OFR are intentional because: 1) “replace” in the text you are using is not acceptable for OFR publication; and 2) the quotations: you will be quoting text already published in the Federal Register.

Just so you will know that I am forwarding your concerns and see if we can work it out with OFR to make 1 or both these edits. I am heading to 2 meetings now, so hopefully I will have a response when I return.

Subject: RE: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Stephanie:

I have reviewed the document, and found two places where ORIA edits were not incorporated by OFR. These are described below.

Page 95, last sentence above the deleted definition:

OFR version: "...definitions at 40 CFR 61.251 to remove the reference to "new" tailings..."

ORIA edit: "...definitions at 40 CFR 61.251 to ~~replace~~remove the reference to "new" tailings **with the broader term "uranium byproduct material or tailings"...**" (the trailing comma can be retained at OFR discretion)

Explanation: more precise indication of the change addresses removal of reg text.

Page 105, first full paragraph reformatted by OFR:

ORIA edit: Text following "40 CFR part 192:" in the third sentence should be in quotation marks (i.e., should read "Even if a portion...as defined by 40 CFR 192.31(q)" before the FR citation).

Explanation: This single paragraph was originally an introductory paragraph ending with "40 CFR part 192:" that was followed by an off-set FR citation. In creating the clean version of the document, it appears these two separate pieces became combined as one off-set paragraph. The simplest solution is to retain the quoted material within the paragraph, but add the quotation marks.

We appreciate the opportunity to review the document. Please let me know if there are questions.
Thanks.

Hi Kent, these are the program office concerns with the updated edits...please provide your take on their concerns and I found his edit on page 104 (you may find it on 105)

Stephanie:

I have reviewed the document, and found two places where ORIA edits were not incorporated by OFR. These are described below.

Page 95, last sentence above the deleted definition:

OFR version: "...definitions at 40 CFR 61.251 to remove the reference to "new" tailings..."

ORIA edit: "...definitions at 40 CFR 61.251 to ~~replace~~ remove the reference to "new" tailings **with the broader term "uranium byproduct material or tailings" ...**" (the trailing comma can be retained at OFR discretion)

Explanation: more precise indication of the change addresses removal of reg text.

Page 105, first full paragraph reformatted by OFR:

ORIA edit: Text following "40 CFR part 192:" in the third sentence should be in quotation marks (i.e., should read "Even if a portion...as defined by 40 CFR 192.31(q)" before the FR citation).

Explanation: This single paragraph was originally an introductory paragraph ending with "40 CFR part 192:" that was followed by an off-set FR citation. In creating the clean version of the document, it appears these two separate pieces became combined as one off-set paragraph. The simplest solution is to retain the quoted material within the paragraph, but add the quotation marks.

We appreciate the opportunity to review the document. Please let me know if there are questions.
Thanks.

I responded to the program office with the following:

Thanks Daniel,

I reviewed your edits and I am pretty sure both edits not done by OFR are intentional because: 1) "replace" in the text you are using is not acceptable for OFR publication; and 2) the quotations: you will be quoting text already published in the Federal Register.

Just so you will know that I am forwarding your concerns and see if we can work it out with OFR to make 1 or both these edits. I am heading to 2 meetings now, so hopefully I will have a response when I return.

Subject: RE: FRL-9957-54-OAR; 16-31425

Good morning Kent, below is the program office response and please see attach.

Stephanie:

Attached is a revision that addresses OFR comments in redline-strikeout. These revisions incorporate

review by OGC.

I note two edits that were not highlighted by OFR. On page 105, a paragraph was re-formatted by OFR. This formatting issue seems to have resulted when a set-off quote became combined with the preceding paragraph (probably when creating the final clean version), so that the entire paragraph was indented. I have revised this to keep the quote within the paragraph.

In the regulatory text, section 61.255(c)(1) refers to the CDX website (page 142). I have updated this reference. This change was requested from OP along with a similar change to footnote 19 (page 83), by hand-marking the printed version submitted to the OFR. The change was made in footnote 19, but not in the regulatory text.

Please let me know if you have any questions or need more information. Thanks.

Stephanie Morris

Subject: RE: FRL-9957-54-OAR; 16-31425

Hi Kent, these are the program office concerns with the updated edits...please provide your take on their concerns and I found his edit on page 104 (you may find it on 105)

Stephanie:

I have reviewed the document, and found two places where ORIA edits were not incorporated by OFR. These are described below.

Page 95, last sentence above the deleted definition:

OFR version: "...definitions at 40 CFR 61.251 to remove the reference to "new" tailings..."

ORIA edit: "...definitions at 40 CFR 61.251 to ~~replace~~remove the reference to "new" tailings **with the broader term "uranium byproduct material or tailings" ...**" (the trailing comma can be retained at OFR discretion)

Explanation: more precise indication of the change addresses removal of reg text.

Page 105, first full paragraph reformatted by OFR:

ORIA edit: Text following "40 CFR part 192:" in the third sentence should be in quotation marks (i.e., should read "Even if a portion...as defined by 40 CFR 192.31(q)" before the FR citation).

Explanation: This single paragraph was originally an introductory paragraph ending with "40 CFR

part 192:” that was followed by an off-set FR citation. In creating the clean version of the document, it appears these two separate pieces became combined as one off-set paragraph. The simplest solution is to retain the quoted material within the paragraph, but add the quotation marks.

We appreciate the opportunity to review the document. Please let me know if there are questions. Thanks.

I responded to the program office with the following:

Thanks Daniel,

I reviewed your edits and I am pretty sure both edits not done by OFR are intentional because: 1) “replace” in the text you are using is not acceptable for OFR publication; and 2) the quotations: you will be quoting text already published in the Federal Register.

Just so you will know that I am forwarding your concerns and see if we can work it out with OFR to make 1 or both these edits. I am heading to 2 meetings now, so hopefully I will have a response when I return.

Thanks. Please let me know what they say. We may be able to modify the language for the first one. For the second, it appeared at first to be just a question of formatting. If there is concern about having the FR citation in the document, that is a much more substantive comment that touches on the rationale for an aspect of the rule. As it stands now, that paragraph will be confusing to readers.

Attached is a revision that addresses OFR comments in redline-strikeout. These revisions incorporate review by OGC.

I note two edits that were not highlighted by OFR. On page 105, a paragraph was re-formatted by OFR. This formatting issue seems to have resulted when a set-off quote became combined with the preceding paragraph (probably when creating the final clean version), so that the entire paragraph was indented. I have revised this to keep the quote within the paragraph.

In the regulatory text, section 61.255(c)(1) refers to the CDX website (page 142). I have updated this reference. This change was requested from OP along with a similar change to footnote 19 (page 83), by hand-marking the printed version submitted to the OFR. The change was made in footnote 19, but not in the regulatory text.

Please let me know if you have any questions or need more information. Thanks.

Subject: OFR edits: [EPA-HQ-OAR-2008-0218; FRL-9957-54-OAR]

Hello,

Attach you will find OFR edits and comments to your document for your approval.

As a Reminder: Please do not use the “accept” nor “reject” feature for any of the changes, please leave the redline/strikeout if it’s apparent in the OFR Word file and make sure your edits, if any, are also apparent in redline/strikeout

NOTE from OFR:

Hello again – edits to a rule are attached for your review. Also, please see the requests for replacement text on pp. 34 and 39. Thanks --

Stephanie Morris
