

FRESHWATER HABs NEWSLETTER

[Great Lakes and Fresh Water Algal Bloom Information Act \(HR 1893\)](#)

Bill introduced by the U.S. House of Representatives requiring the Administrator of the National Oceanic and Atmospheric Administration to create an electronic database of research and information on the causes of, and corrective actions being taken with regard to, algal blooms in the Great Lakes, their tributaries, and other surface fresh waters, and for other purposes.

[Harmful Algal Bloom and Hypoxia Research and Control Amendments Act of 2017 \(S. 1057\)](#)

This Act builds on previous authorizations by: (1) requiring more collaboration between agencies; (2) by granting the federal government the authority to declare severe algal blooms or hypoxic events as "Events of National Significance," triggering access to disaster-like funding; and (3) by allowing private donations to be used to fund recovery for "Events of National Significance."
