

Laboratories Approved by EPA to Support UCMR 4

These laboratories met the application and Proficiency Testing (PT) criteria for the fourth Unregulated Contaminant Monitoring Rule (UCMR 4) Laboratory Approval Program for the Assessment Monitoring (AM) methods indicated. These laboratories can analyze UCMR 4 samples using only those methods next to their names. This approved laboratory list is subject to change. Laboratories that withdraw or fail to meet the method and program quality control requirements will be permanently removed from the list.

End of List

¹ SVOCs - Semivolatile Organic Compounds

² HAAs - Haloacetic Acids

Large public water systems (PWSs) are required to use laboratories approved by EPA to analyze their UCMR 4 samples. EPA will arrange for samples from small PWSs to be analyzed by approved laboratories under contract to the agency. Laboratory participation in the approval program is voluntary, and is specific to laboratories analyzing samples for UCMR 4. The laboratories' approval status indicates they have demonstrated specific capabilities using the designated method(s).

PWSs are responsible for their UCMR 4 results, and must ensure that their laboratories are following the methods and meeting the quality assurance/quality control (QA/QC) criteria specified in UCMR 4. Laboratories must post sample analytical results and required QC data electronically via the Safe Drinking Water Accession and Review System (SDWARS) within 120 days of the sample collection date. EPA may revoke a laboratory's UCMR 4 approval status if the laboratory does not adhere to QA/QC procedures and criteria, or fails to post data to SDWARS in a timely and accurate manner. If EPA revokes approval, the laboratory's name will no longer appear on this list. Once approval has been revoked, it cannot be reinstated during the UCMR 4 monitoring period.

Please send questions to: UCMR_Lab_Approval@epa.gov

Laboratories Authorized by EPA to Analyze UCMR 4 Bromide and TOC Samples - Indicators for HAA Monitoring

These laboratories met the UCMR 4 Laboratory Approval Program application criteria and submitted documentation that they are authorized by their primacy state to analyze TOC and/or bromide compliance monitoring samples under the Stage 2 Disinfectants and Disinfection Byproducts Rule; the latter is a condition of UCMR 4. These laboratories can analyze UCMR 4 samples using only those methods. This laboratory list is subject to change. Laboratories that withdraw or fail to meet method and program quality control requirements will be permanently removed from the list.
