RULES AND REGULATIONS

(29 U.S.C. 607) theretofore called the Act) for the review of changes and progress in the states and implementation of State Plans which have been approved under section 18(c) of the Act and Federal Register Notice 38 FR Part 52 containing the decision. On September 16, 1974 and January 30, 1975, the State of Connecticut submitted supplements to the plan involving developmental and State initiated changes (see Subpart B and E of 29 CFR Part 1953). On February 21 and September 25, 1975, notices were published in Federal Register (40 FR 7621 and 44157) concerning the submission of these supplements to the Assistant Secretary of Labor for Occupational Safety and Health and the fact that the question of their approval was in issue before him. Interested persons were afforded at least 30 days from the date of publication of the proposed supplements in the Federal Register to submit written comments or requests for an informal hearing concerning these supplements. The supplements consist of the Governor's Executive Order Number Twenty-Seventeen, the Affirmative Action Plan and the revised sections of Connecticut's Target Industries Program.

2. Issues. The Governor's Executive Order Number Twenty-Seventeen is in response to the State commitment under the requirements of 29 CFR 1952.303(a) of the State's developmental schedule to establish a Safety and Health Program to cover State employees. This directive implements the Connecticut Occupational Safety and Health Act wherein State and municipal employees are protected by the same standards, inspections, citations, discrimination procedures, recordkeeping and all remaining features of the Connecticut Act, as employees in the private sector.

Connecticut's Affirmative Action Plan is in response to the commitment made in the timetable in Appendix IV of its 18(b) plan to implement the Governor's Executive Order Number Eighteen, which reaffirms the intention to promote equal employment opportunity within the State service for all its citizens. The Affirmative Action Plan, among other things, organizes the responsible for developing programs, defines specific areas of concern, delegates responsibilities for determining the plan, compiling data, and outlines provisions for monitoring and evaluating the program. There were no public comments received on this supplement.

In addition to the foregoing developmental changes, the State has submitted as a State-initiated change a revised Target Industries Program. This revision reflects the results of the first full year of recordkeeping. Examination of these results has focused attention on those industries with high rates of job-related injuries. These high accident rate industries include: concrete work, roofing and metal work, lumber and wood products, iron and steel industries and concrete products. The Assistant Secretary has reviewed these supplements to determine its impact on the "at least as effective as" status of the plan.

3. Decision. After consideration of these plan supplements, it is hereby decided that they are approved under Subpart B and E of 29 CFR Part 1953. The decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally. In accordance with the decision, Subpart X of 29 CFR Part 1952 is amended as set forth below effective March 2, 1976.

Section 1952.304 is amended through the addition of new paragraphs (d) and (e) to read as follows:

§ 1952.304  Completed developmental steps.

(d) In accordance with § 1952.303(a), the Governor's Executive Order Number Twenty-Seventeen was issued implementing the coverage of State employees under the Connecticut Occupational Safety and Health Act.

(e) An approved Affirmative Action Plan has been adopted.

Secs. 8(g)(2), 12 Federal R. L. 61-568, 84 Stat. 1603, 1608; 29 U.S.C. 672(g)(2), 677)

Signed at Washington, D.C., this 26th day of February 1976.

MORTON CORN,
Assistant Secretary of Labor.

TITLE 40—Protection of Environment
CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY
SUBCHAPTER C—AIR PROGRAMS

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Clarifying Amendments

The Environmental Protection Agency is today taking action to clarify the contents of State Implementation Plans under the Clean Air Act. The Clean Air Act is today taking action to clarify the contents of State Implementation Plans under the Clean Air Act. The Clean Air Act is today taking action to clarify the contents of State Implementation Plans under the Clean Air Act.

BACKGROUND

At the heart of the Clean Air Act are "State Implementation Plans" ("SIPs") for the 55 States and territories. SIPs are the primary means by which the federal government regulates Ambient Air Quality Standards. SIPs are to be determined and maintained. SIPs measure standards in two basic ways: (1) A State may develop its own measures and submit them to EPA for approval under section 110(a); and (2) to the extent a State's own measures are adequate, EPA may develop its own substitute measures and promulgate them under section 110(c).

It is important that the State contents of each SIP be readily ascertainable because SIP requirements are enforceable by both the State and the Federal government. Moreover, citizens may bring suits in Federal courts under section 304 to enforce SIP requirements.

In the amendments appearing below, EPA is making changes in the way it formally identifies those measures which the States develop for EPA approval under section 110(a).

NEW PRACTICE

EPA publishes all SIP approval, disapproval, and promulgation actions in the Federal Register. Whenever the Agency promulgates SIPs on a State-wide basis, it will publish the terms of the State's own measures which EPA approves (or disapproves) under section 110(a). Rather, the present scheme for formalizing approvals and disapprovals of State-submitted material is as follows:

In each subpart of part 52, there is a section entitled "Identification of Plan." Paragraph (a) of each Identification section lists the title of each plan. Paragraph (b) of each Identification section lists the date the State submitted its original plan. Paragraph (c) of each Identification section lists a series of dates on which the State submitted supplemental information. This "supplemental information" encompasses a number of things, including new regulations, source compliance schedules, and other regulations, revised regulations, and amendments. EPA's practice has been to hold each "supplemental" submission merely by listing its date. There is also a paragraph (d) for a few States that are "in revision" by date only. There is no significant distinction between "plan revisions" and "supplemental information" in these terms have been used in part 52.

Each subpart also contains a statement to the effect that the State's submission is approved except as otherwise provided in the subpart. Thus, everything noted in the "Identification of Prior Section," including all of the State-submitted materials listed merely by date in paragraph (c) (and (d) in a few cases) of the Identification section, is considered an approved part of the SIP unless otherwise provided in the subpart.

NEW PRACTICE

EPA is today amending paragraph (e) of the "Identification of Plan" section in each subpart of part 52 for purposes of clarification. Over the last few years, States have submitted so many new or modified SIP provisions that it has become increasingly confusing to denote each submission merely by listing its date. Accordingly, each subpart is amended below to provide a more detailed explanation of each submission.
term “solid particulate matter” (1.2.1).

It should be noted that paragraph (c) of each Identification section now refers to all submissions as “plan revisions.”

EPA is using the term “revision” here in the broadest sense to indicate all changes and supplements to the original State submission. A perusal of the new paragraphs below shows that, almost by definition, such changes are not necessarily “revisions,” which do not impose requirements and are not readily enforceable, are not of course not the type of plan revisions which must be approved by EPA in accordance with sections 110 and 40 CFR Part 51. (Since the distinction in some paragraphs between “supplemental information” and “plan revisions” caused confusion and was at best nebulous, it is being dropped. Thus there will no longer be a separate paragraph in each plan section.) The text previously listed in a paragraph (c) will be listed along with all other “plan revisions” in paragraph (c).)

CONCLUSION

One seeking to determine the current requirements of each plan should thus keep in mind the following points. Those measures promulgated by EPA will appear in complete text in the applicable part of 40 CFR Part 55. State CCR 110 measures approved by EPA will constitute every measure listed in the “Identification” section which is not disapproved elsewhere in the same plan. Paragraph (c) of each Identification of Plan section therefore lists all State measures, for which EPA approval/disapproval action is no longer pending; it does not merely list approved submissions.)

The complete texts of the State submissions listed in each Identification of Plan section may be inspected at (1) the Public Information Reference Unit, Room 260, (2) the EPA Regional Office for the applicable State (see 40 CFR 55.16 for a list), and (3) the appropriate State air pollution control agency.

The Administrator hereby finds for good cause that it would be unnecessary and impracticable to subject these amendments to notice and public comment procedures or to delay their effectiveness since they merely clarify existing lists and impose no additional requirements.

(Rule Sec. 110, 301, Clean Air Act, as amended (42 U.S.C. 1856-8, 1857p))

RUSSELL E. THAIN,
Administrator.

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR FESTIVE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Asulam and 3,5-Dimethyl-4-(methylthio) phenyl methylcarbamate

Asulam and 3,5-Dimethyl-4-(methylthio) phenyl methylcarbamate

The Environmental Protection Agency (EPA) has promulgated regulations with respect to the establishment of tolerances for the following pesticide chemicals in Title 40 of the Code of Federal Regulations, Part 180, Subpart C:

Pesticide chemical Section No. Premutation date

Asulam 40 CFR 180.306 40 CFR 283.95
3,5-Dimethyl-4- (methylthio) phenyl methylcarbamate 40 CFR 180.306 40 CFR 283.95

These pesticide chemicals are members of the class of cholinesterase-inhibiting pesticides and were so identified at the time tolerances were established. Pesticides which have been identified as cholinesterase-inhibitors are listed in 40 CFR 180.305 (5).

(1) Where tolerances for inorganic bromide in or on the same raw agricultural commodity are set in two or more sections in this part, the overall quantity of bromide to be tolerated from use of two or more pesticide chemicals for which tolerances are established is the highest of the separate applicable tolerances.

(2) Where the bromide tolerance on lima beans from ethylene dibromide soil treatment is 2 parts per million on lima beans from methyl bromide fumigation is 50 parts per million, the overall inorganic bromide tolerance for lima beans grown on ethylene dibromide treated soil and also fumigated with methyl bromide after harvest is 50 parts per million.

(3) Where tolerances are established in terms of inorganic bromide residues—only from use of organic bromide fumigants on raw agricultural commodities, such tolerances are subject to the public health and no additional, concurrent tolerances for the organic pesticides chemicals from such use are necessary.

(4) Where tolerances are established for both calcium cyanide and hydrogen cyanide on the same raw agricultural commodity, the total amount of such pesticides shall not exceed the residue that permitted by the larger of the two tolerances, calculated as hydrogen cyanide.

(5) Where tolerances are established for residues of both O,S-diethyl S,R- (ethylthio)ethyl phosphorothioate and demeton (5-mixture of O,S-diethyl O-and S,R- (ethylthio)ethyl phosphorothioates) on the same raw agricultural commodity, the total amount of such pesticides shall not exceed the residue that permitted by the larger of the two tolerances, calculated as demeton.

(6) Where tolerances are established for residues of both phosphinotetrazoles (chlorinated mixture of camphene, pinene, and other terpenes, containing 80 percent chlorinated camphene containing 68-95 percent chlorine) and toxaphene (chlorinated camphene containing 67-99 percent chlorine) on the same raw agricultural commodity, the total amount of such pesticides shall not exceed the highest established tolerance calculated as chloroform.

(7) Where tolerances are established for more than one pesticide containing arsenic and in or on a raw agricultural commodity, the total amount of such pesticide shall not exceed the highest established tolerance calculated as Ar,O.

(8) Where tolerances are established for residues of both S,S,S-trimethyl phosphorothioate and tributyl phosphorothioate in or on the same raw agricultural commodity, the total residue of such pesticides shall not exceed the residue that permitted by the higher of the two tolerances, calculated as S,S,S-trimethyl phosphorothioate.

(9) Where tolerances are established for residues of a-naphthaleneacetic acid and/or a-naphthaleneacetic acid in or on the same raw agricultural commodity, the total amount of such pesticides shall not exceed the residue that permitted by the higher of the two tolerances, calculated as a-naphthaleneacetic acid.

(10) Where tolerances are established for residues of O,S-dimethyl phosphoramidodithioate, resulting from the use of acephate (O,S-dimethyl acetophosphoramidodithioate) and/or O,S-dimethyl phosphorothioate on the same agricultural commodity, the total amount of O,S-dimethyl phosphoramidodithioate
