

Registration Review Status Update PPDC Meeting November 1, 2017 – Session 5

Background

- FIFRA requires EPA to complete the registration review of each pesticide or pesticide case, which may be composed of 1 or more active ingredients and the products associated with the active ingredients, not later than October 1, 2022.
- 736 “cases” which encompasses 1,100 pesticide active ingredients
 - 457 conventional pesticide cases
 - 151 antimicrobial pesticide cases
 - 128 biopesticide cases
- Registration Review process involves
 - Preliminary (60-day public comment), Final Work Plan, Data Call-In
 - DRA - Draft Risk Assessment (*60-day public comment*)
 - PID - Proposed Interim Decision (*60-day public comment*)
 - ID/FD - Interim or Final Decisions
- Labels will be amended per interim or final decisions

Status Update (end of Fiscal Year 2017)

- Conventional pesticides
 - All preliminary and final work plans complete
 - Issue remaining data call-Ins in 2018
 - ~184 draft risk assessments to complete (40% remaining)
 - ~273 proposed interim decisions to complete (60% remaining)
 - ~295 final or interim decisions to complete (64% remaining)
- Antimicrobial pesticides
 - Data Call-Ins complete 2018
 - All preliminary work plans complete
 - ~92 draft risk assessments to complete (61% remaining)
 - ~93 proposed interim decisions to complete (62% remaining)
 - ~99 final or interim decisions to complete (65% remaining)
- Biopesticides
 - All preliminary work plans complete
 - Most cases call for no new data and no new risk assessment
 - ~91 draft risk assessments/ proposed interim decisions to complete (71% remaining)
 - ~94 final or interim decisions to complete (73% remaining)
