

Chemicals Subject to TSCA Section 12(b) Export Notification Requirements

(March 30, 2018)

All of the chemical substances appearing on this list are subject to the Toxic Substances Control Act (TSCA) section 12(b) export notification requirements delineated at 40 CFR part 707, subpart D. The chemicals in the following tables are listed under three (3) sections: **Substances to be reported by Notification Name**; **Substances to be reported by Mixture and Notification Name**; and **Category Tables**.

TSCA Regulatory Actions Triggering Section 12(b) Export Notification

TSCA section 12(b) requires any person who exports or intends to export a chemical substance or mixture to notify the Environmental Protection Agency (EPA) of such exportation if any of the following actions have been taken under TSCA with respect to that chemical substance or mixture:

- (1) data are required under section 4 or 5(b),
- (2) an order has been issued under section 5,
- (3) a rule has been proposed or promulgated under section 5 or 6, or
- (4) an action is pending, or relief has been granted under section 5 or 7.

Other Section 12(b) Export Notification Considerations

The following additional provisions are included in the Agency's regulations implementing section 12(b) of TSCA (i.e. 40 CFR part 707, subpart D):

- (a) No notice of export will be required for articles, except PCB articles, unless the Agency so requires in the context of individual section 5, 6, or 7 actions.
- (b) Any person who exports or intends to export polychlorinated biphenyls (PCBs) or PCB articles, for any purpose other than disposal, shall notify EPA of such intent or exportation under section 12(b). PCBs and PCB articles have the definitions published in 40 CFR 761.3.
- (c) Any person who would be prohibited by a section 5 or 6 regulation from exporting a chemical substance or mixture, but who is granted an exemption by EPA to export that chemical substance or mixture, shall notify EPA under section 12(b) of such intent to export or exportation.
- (d) An exporter will be subject to possible enforcement action (including penalties) for not complying with the applicable provisions of section 12(b).

Disclaimer

This listing is intended simply as an information resource to facilitate compliance with TSCA section 12(b). While EPA has attempted to be as accurate as possible in compiling this list, exporters subject to the requirements of section 12(b) should be aware that this list may contain unintended errors or omissions, and that the absence of a chemical from this list does not mean that export of the chemical is exempt from section 12(b) reporting requirements. Exporters should be aware that they have an affirmative obligation to review the *Federal Register* for future publication of actions that may trigger section 12(b) reporting obligations. This list should not be relied upon in lieu of relevant *Federal Register* documents, orders, or the *Code of Federal Regulations*, and in the event of a conflict between this list and any *Federal Register* document, order, or the *Code of Federal Regulations*, this list will not be considered controlling. Exporters are encouraged to check this list from time to time, as EPA intends to revise it periodically, and will do so without prior public notice. EPA also encourages exporters or others to alert the Agency to any errors or omissions in the list. Comments can be sent to ccd.citb@epa.gov.

Notes:

1. Chemical substances subject to TSCA section 4 actions "sunset after a specific period of time (see "Sunset Date/Status of TSCA Section 4 Testing, Reimbursement, and Reporting Requirements" and "TSCA Section 4-Triggered TSCA Section 12(b) Export Notification Requirements" at <http://www.epa.gov/opptintr/chemtest/pubs/sunset.html> for the latest sunset table and further information). Be aware that a section 4 chemical that has "sunset" may also be the subject of another TSCA action triggering export notice requirements so that export notice may still be required.

2. In some instances, the CAS Registry Number originally cited has been revised or replaced by CAS since the issuance of the triggering TSCA action. Consequently, other information sources and indices may reference this "new" CAS number for the same chemical substance and may or may not cross-reference the originally cited CAS Registry Number contained in the TSCA regulatory action. Where EPA is aware of such changes, a cross-reference from the new CAS number to the originally published CAS number is provided.
