Subject: RE: FNF Completeness Letter - Request for Coverage (Concrete Batch Plant General Permit)

Good Afternoon Tressia,

We have almost completed our review of the Tribal Minor NSR General Permit application for a Concrete Batch Plant for FNF Construction. Please provide the following information, mostly for clarification, so we may move forward on our review of the application.

1. The table below was provided in the permit application. Please confirm that the "Make/Model" for the engine (Unit ID # 9) is "Accumix 600B". **Yes**
2. Please confirm whether Unit ID # 1-8 make up the entire proposed soil cement mixing plant. **Units 1 – 9 make up the entire plant**
3. Regarding ESA, Criterion D of Appendix A appears inappropriate, because it does not appear that there was coordination with the Service(s) regarding this specific project. It appears that the project may fall under Criterion A or B. Please provide this information in light of this. **A is the correct choice.**
4. Regarding historic properties, according to FNF's Categorical Exclusion Submittal, a cultural resource survey was previously conducted on the airport property by the Navajo Nation Historic Preservation Department (NNHPD). It appears that NNHPD conducted/finalized this survey in 1993. Can you specify whether there is more recent documentation available and provide this information? **There is no more recent information.**
