Subject: Profoundly sad news; memorial info to share

All:

It is with profound sadness that we at Faith & Politics share with the 2018 TN- AL pilgrimage participants who are not yet aware of the unexpected health event and passing of Curtis Etherly, a great friend to FPI and our community. We were in prayer for him and his loved ones, since have joined in grieving the sudden and tremendous loss with his family, friends and the community.

Our friends are Coca Cola have made us aware of information regarding his memorials early next week and his family. I am providing that link below and a photograph of our time together in Selma as we remember Curtis.

<https://na01.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dignitymemorial.com%2Fobituaries%2Fwashtington-dc%2Fcurtis-etherly-7797614&data=02%7C01%7Cmattg%40microsoft.com%7C03caf887fbe643f26b5208d593f1ef4f%7C72f988bf86f141af91ab2d7cd011db47%7C1%7C0%7C636577589716887435&sdata=12SvjXZAlknIC56bn5mg4XDbQ9JqLPS%2FjQNckq8xPW0%3D&reserved=0>

We will be honoring Curtis' memory when we convene on April 12 for our first pilgrimage reunion.

In remembrance,
Joan

Subject: BP to boost U.S. investment after tax reform: CEO

Good afternoon Troy – I wanted to make sure you saw our CEO Bob Dudley's remarks today re: Tax and Regulatory Reform. Pasted below please find the relevant transcript excerpt from our analyst/earnings call this morning in London as well as a link to a Reuters story.

Please let me know if you have questions or would like any additional information.

Mary

<https://www.reuters.com/article/us-bp-us-tax/bp-to-boost-u-s-investment-after-tax-reform-ceo-idUSKBN1FQ1T7>

Subject: Extract from IR transcript - RWD re US.

Brendan Warn (BMO Capital):

Then just further on that point of fiscal change, since obviously the US tax reduction, where does that country now rank? Has it moved up in the positioning? How much more attractive has it made investing into the US?

Bob Dudley:

And you asked about the American business system now with lower taxes – what does it mean?

This is important for BP because we have been, over the last decade, America's largest energy investor – \$90 billion of capital over the last decade. That is separate and aside from the \$65 billion of obligations with Macondo.

So if you take what was one of the highest tax rates in the OECD at 35%, take it down to 21%, this is of course of enormous value to business in many ways. Net present value to BP is affected by this, despite these short-term charges and things that everyone is trying to sort out. So it is important for us. There is no doubt we will increase investments.

I imagine I can speak for... because I am around a lot of the US business community, the regulatory system of the United States is suddenly so much easier. It was becoming an avalanche of regulations in every direction, so permitting required sequential federal and state, and now they are in parallel.

Decisions are going to be made faster, and if they are not made faster, then, the infrastructure programmes they are talking about will not happen.

So from a business community standpoint it is quite transformation. There will be a lot of capital attracted to the US because of it in my opinion, and not just speaking from a BP perspective.

Subject: State-Fed Roundtable on O&G

Hi Troy. Just heard that ECOS is helping coordinate a state-federal roundtable requested by Administrator Pruitt on O&G compliance and related issues on January 23-24 gathering (1.5 days) at EPA R8 in Denver. Do you or your folks know anything about this or should I reach out to Susan Bodine? Thanks. Call me if that's easier. Not urgent.

Top EPA Presidential Nominees Approved By Senate EPW Committee

WASHINGTON (October 25, 2017) - Today, the U.S. Environmental Protection Agency (EPA) presidential nominees to head the Agency's air, water, chemical and legal offices were approved by the U.S. Senate Environment and Public Works Committee (EPW). The following nominations will soon be moved to the Senate chamber for a full vote:

Michael Dourson, nominee to be assistant administrator for the Office of Chemical Safety and Pollution Prevention.

Matthew Leopold, nominee to be assistant administrator for the Office of General Counsel at the EPA.

David Ross, nominee to be assistant administrator for the Office of Water at the EPA.

Bill Wehrum, nominee to be assistant administrator for the Office of Air and Regulation.

“I want to thank Chairman John Barrasso and Members of the Senate Environment and Public Works Committee for granting our nominees a fair Hearing and approving their nominations,” **said Administrator Scott Pruitt**. “These top leaders in their fields will bring positive change to EPA’s mission to protect human health and the environment. We look forward to a full Senate vote on these highly-qualified leaders.”

Subject: Ozone Cooperative Compliance Task Force

Troy – It's been a while. I hope you're enjoying life after BP and your role at EPA. Challenges abound, I'm sure.

I have been puzzled by something and since your name was mixed in I thought I'd ask you directly.

In the 6 June letter from Administrator Pruitt to Governor Ducey of AZ, the Administrator stated: "Additionally, pursuant to language in the recently-enacted FY 2017 omnibus bill, I have established an Ozone Cooperative Compliance Task Force ..." (and at the end of the letter he refers questions to you).

For the life of me, I can't find the statutory language. I've been digging in HR 244, but it's a big haystack and I've missed it completely.

Can you point me to the correct statutory language?

All the best,
Bob

Congress of the United States
House of Representatives
Washington, DC 20515-1806

September 28, 2017

The Honorable E. Scott Pruitt
Administrator
Office of the Administrator
U.S. Environmental Protection Agency
Mail code: 1101A
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Administrator Pruitt,

I am writing to express concern about the status of the Environmental Protection Agency (EPA)'s draft Integrated Risk Information System (IRIS) assessment of formaldehyde. The National Academy of Sciences harshly criticized the methodology that the EPA used to identify, evaluate and integrate the large and multi-disciplinary body of scientific studies related to the potential carcinogenicity of formaldehyde. Since 2011, the Agency has been working to revise the 2010 draft formaldehyde IRIS assessment in response to numerous substantive recommendations made by the National Academy of Sciences (NAS).

The Agency should produce regulation that protects human health from the dangers of toxic chemicals, and it should ensure that those regulatory requirements are grounded in a thorough and objective review of all the relevant scientific evidence and economic impact. I recently had the opportunity to tour one of the largest formaldehyde manufacturing plants in the country, which is located in my state. It was a reminder of the influence the facility has on the surrounding community, in addition to the many building and construction and automotive applications of this chemical.

It is my understanding that the University of North Carolina (UNC) is hosting an important scientific workshop in October, focused on a discussion of several compelling new scientific studies and new analyses of existing studies, which may have called into question the validity of the Agency's findings. A scientifically flawed, but influential, IRIS assessment will have a devastating economic impact. Furthermore, without a clear understand of the health risks associated with formaldehyde we could potentially expose the surrounding communities to even greater health risks.

For these reasons, I am respectfully requesting that you commit to withholding any further action on the development of the draft IRIS assessment of formaldehyde until the findings from the upcoming science workshop at UNC are fully considered and those findings are appropriately incorporated. It is my hope the deliberations of this important workshop will help inform the Agency on how to appropriately integrate the best available human and animal data to draw conclusions about potential cancer risks.

Before the risk values embedded in the Agency's assessment are used in regulatory decision making, I encourage the Agency to ensure that the regulations governing the manufacturing of formaldehyde are grounded in sound science. To me, the health and safety of the community is a paramount concern. Acting without the best or accurate science will leave a devastating impression on the American people that the Agency cannot take lightly.

A handwritten signature in black ink, appearing to read "Garret Graves".

Sincerely,

Garret Graves
Member of Congress

October 3, 2017

The Honorable John Barrasso
Chairman
Committee on Environment & Public Works
United States Senate
Washington, DC 20510

The Honorable Thomas Carper
Ranking Member
Committee on Environment & Public Works
United States Senate
Washington, DC 20510

Re: Ensuring a Fully Staffed and Functional Environmental Protection Agency

Dear Chairman Barrasso and Ranking Member Carper:

We are writing on behalf of millions of businesses, large and small, to urge you to move as quickly as possible to advance the four nominees currently pending before your Committee for Assistant Administrators of the United States Environmental Protection Agency (EPA). Our organizations represent many major sectors of the American economy—including aerospace, agriculture, apparel, automotive, building and construction materials, chemical and raw material production, consumer and industrial goods, distribution, electronics, energy, equipment manufacturers, food and grocery, footwear, healthcare products and medical technology, information technology, mining and metals, paper and wood products, plastics, retail, storage, tire manufacturers, and travel goods.

The mission of the EPA is to protect human health and the environment. However, more than eight months into the new Administration, the EPA lacks any Senate-confirmed Assistant Administrators to carry out this mission. The EPA's activities have a significant impact on each of our industries, the products we make or the services we provide, and the millions of workers we represent. It is therefore of significant importance to our groups that EPA is appropriately and fully staffed. This holds especially true for individuals in key leadership positions. Consequently, to ensure that EPA's vast workload can be efficiently and effectively achieved and implemented, we urge you and the Senate Environment & Public Works Committee to move expeditiously towards confirmation for the following nominees:

- Michael Dourson, for EPA Assistant Administrator, Office of Chemical Safety & Pollution Prevention;
- Matthew Leopold, for EPA Assistant Administrator, Office of the General Counsel;
- David Ross, for EPA Assistant Administrator, Office of Water; and
- William Wehrum, for EPA Assistant Administrator, Office of Air & Radiation.

We appreciate your assistance in this important and timely matter.

Sincerely,

Mary,

Happy Memorial Day, and huge congrats on your new job! Sad for Geoff to leave the states, but very happy for his new opportunity as well.

Please note my EPA email address: Dravis.samantha@epa.gov - need to send correspondence here.

I will send this along to Administrator Pruitt's scheduling team and try to set this up ASAP. Thanks and look forward to seeing you soon!

Best,

Samantha

Hello Samantha -

I hope you are well and have something fun planned for the long weekend!

I am writing to request a meeting with Administrator Pruitt and the Head of BP's Fuels North America business, Doug Sparkman. Doug is planning to be in DC on June 28-29. The purpose of the meeting would be introductory -- to explain BP's downstream business in the US, with a particular focus on Point of Obligation, and of course any other issues you all would like us to address.

Thank you in advance for your consideration. I look forward to hearing from you!

Sincerely,

Mary

Hi Avi – It was nice speaking with you just now. As I mentioned, we would be so grateful if you'd be willing to provide a short statement or letter in support of Susan's nomination prior to her EPW confirmation hearing on June 7. Please feel free to call or email anytime with questions. We really appreciate your help.

Best regards,
Amy

Hi Troy. A colleague from my previous company asked if I would mind introducing you virtually to Jon Sanford, who is interested in the EPA Region 1 Administrator appointment. Jon's details are attached and I've cc'd him on this email so you can connect directly.

Hope to catch up next time I'm in DC!

Best regards,
Lorrie

Dear Lorrie,

It has been a long time since we were last in touch. I hope that you are doing well and hope that you don't mind me reaching out to ask a favor of you.

Jon Sanford, a friend of mine for the past 30 years, is trying to connect with Troy Lyons, who was Manager of Federal Government Affairs at Hess.

If you know Troy, would you be kind enough to pass this email along to him and copy Jon so that Jon can get connected to Troy? I would greatly appreciate if you could assist in this way and I know Jon would as well. Thank you!

Best until our paths cross again,

DORON

To: dgrosman@mba1986.hbs.edu
Subject: Sanford: EPA Region 1 Administrator

Dear Doron,

Thanks for agreeing to help. As I mentioned, I am actively trying to get appointment as EPA Region 1 Administrator, and I am trying to get my resume highlighted within the EPA Office of Congressional and Intergovernmental Relations, which is the EPA Office that deals with regional issues.

The new Associate Administrator for this EPA Office is Troy Lyons, who was formerly a Manager for Federal Governmental Affairs at Hess Corporation. My goal is to reach out to Troy Lyons, and get my information passed to him from someone he knows.

I understand that you know Lorrie Hecker, Director of Global Communications at Hess Corporation. Would you kindly ask her if she knows Troy Lyons, and if so, would she be willing to forward him my information?

Getting a political appointment requires building as strong a political base as possible. As I mentioned, so far I have the backing of Vincent DeVito, the Trump campaign manager for Massachusetts and Ron Kaufman, the Massachusetts GOP National Committeeman, who was an early Massachusetts Trump supporter. I have gotten my resume in front of Reince Preibus, the Chief of Staff to the President, Gary Cohn, the Director of the National Economic Council, and Justin Clark, the Deputy Assistant to the President and Director of Intergovernmental Affairs at the White House. And, I have also successfully reached out to Gov. Baker (R) of Massachusetts, Gov. Scott (R) of Vermont and Sen. Collins (R) of Maine.

In addition, I have the support of the Recreational Fishing Alliance, which was an early backer of President Trump (<https://www.joinrfa.org/2016/11/rfa-anticipates-positive-change-under-president-trumps-leadership/>), and the support of the Plymouth, MA Chamber of Commerce. I also have the support of numerous former environmental engineering clients, who have written letters to Administrator Pruitt on my behalf.

I am very keen on getting the EPA Region 1 Administrator appointment, and would be grateful for any assistance you could offer me.

Regards,

Jon Sanford

I thought I would send you BP's latest holding statement as well as the latest UC press release I have for your background (pasted below).

Feel free to contact me even today (mobile number below) if you or Ryan would like to talk.

A couple of quick questions:

1. <!--[if !supportLists]--><!--[endif]-->I was thinking I would provide an update later today or tomorrow morning to Ryan Jackson (who I met at the meeting I joined with John M and Pruitt, with Samantha attending also). I also could contact him even later today depending on events or if he wants to hear today. Could you send me his email and cell contact info?
2. <!--[if !supportLists]--><!--[endif]-->Suzanne asked me to check to see if you have had any Congressional inquiries on the matter.

Thanks and all the best,

Bob Stout

FINAL BP holding statement on Alaska release – as of 4:30 p.m. CST on 4-15-17

- BP is continuing efforts to secure a well at Prudhoe Bay field that experienced an unplanned release of hydrocarbons on Friday.
- Based on an overflight with infrared cameras, the release appears to be contained to the gravel pad surrounding the wellhead and has not reached the tundra.
- A full assessment of the impacted area will be made and initial remediation plans developed once the well is secured.
- The focus today is on developing plans to fully and safely secure the well.
- There have been no injuries and no reports of harm to wildlife. Safety will remain our highest priority as we work through this process.
- We are now working in a Unified Command structure to ensure close coordination with local, state and federal officials.

Unified Command Incident Update 15 April 4:45 PM NEWS RELEASE

Incident Name: BPXA Flow Station 1 Drill Site 2 Well 3 Discharge, Prudhoe Bay, Alaska

Source: Unified Command Joint Information Center

Contact: Alaska DEC PIO 907-465-5009 / U.S. EPA PIO 206-900-3309 / BPXA PIO dawn.patience@bp.com

BPXA, Alaska DEC, U.S. EPA and North Slope Borough Form Unified Command in Response to Oil and Gas Well Discharge Near Prudhoe Bay, Alaska

Report as of 3:00 pm AKDT on 15 April 2017, Note: All times are Alaska Time

A Unified Command, consisting of responders from Alaska Department of Environmental Conservation (ADEC), U. S. Environmental Protection Agency (U.S. EPA), the North Slope Borough, and BP Exploration Alaska (BPXA) has been established to respond to the BP Flow Station 1 Drill Site 2 Well 3 natural gas and crude oil discharge near Prudhoe Bay, Alaska. The Unified Command will ensure safe and efficient coordination of resources and information amongst BPXA and state and federal regulators. To date, there have been no injuries and no reported impacts to wildlife.

BPXA Well 3 is located in the Greater Prudhoe Bay area, approximately 5 miles from the Deadhorse Airport on Alaska's North Slope. On April 14, 2017, at approximately 7:30 am, BPXA employees discovered an uncontrolled gas release from the top of Well 3. At approximately 8:15 am, BPXA confirmed the crude spray from the top of the well house and reported the spill to ADEC via the Fairbanks spill reporting line and to U.S. EPA via the National Response Center.

The well is currently venting gas, which caused a spray of crude to impact the well pad. A Forward Looking Infrared or FLIR overflight shows that the crude spray plume did not leave the pad, however, the situation is not safe yet for responders to access the area and confirm that there have been no impacts to adjacent tundra. No volume estimate for crude spray released is available at this time. Two leaks have been identified on the well, one near the top and one further down the well assembly. The top leak was misting oil in conjunction with releasing natural gas, but the activation of the surface safety valve has stopped the release from this point. The bottom leak is currently

leaking gas as well as some minor amount of crude oil. The well structure is housed in a metal "well house" which is helping to contain any oil spray.

ADEC and U.S. EPA have mobilized response personnel to the Unified Incident Command Post located on the North Slope. Responders attempted to secure the well last night, however, this operation was unsuccessful due to safety concerns and damage to a well pressure gauge. Continuous air monitoring has been established around the well, and the situation remained stable overnight. Responders are not able to safely assess the impacted area until the well has been controlled.

The Unified Command continues working to formulate a plan to bring the well under control. Once well control has been achieved, BPXA will work with their Oil Spill Response Organization, Alaska Clean Seas (ACS), to delineate the impacted area. Cleanup plans will be developed through the Incident Command System and with guidance from the Unified Command.

The cause of the discharge is unknown at this time. ADEC and U.S. EPA are coordinating with BPXA and the Alaska Oil and Gas Conservation Commission to investigate the cause of the discharge, following the securing of the well.

Recipient

Unknown To address

How to Fix It

The email address might be misspelled or it might not exist. Try one or more of the following:

- **Retype the recipient's address, then resend the message** - If you're using Outlook, open this non-delivery report message and click **Send Again** from the menu or ribbon. In Outlook on the web, select this message, and then click the "**To send this message again, click here.**" link located just above the message preview window. In the To or Cc line, delete and then retype the entire recipient's address (ignore any address suggestions). After typing the complete address, click **Send** to resend the message. If you're using an email program other than Outlook or Outlook on the web, follow its standard way for resending a message. Just be sure to delete and retype the recipient's entire address before resending it.
- **Remove the recipient from the recipient Auto-Complete List, then resend the message**
- If you're using Outlook or Outlook on the web, follow the steps in the "Remove the recipient from the recipient Auto-Complete List" section of [this article](#). Then resend the message. Be sure to delete and retype the recipient's entire address before clicking **Send**.
- **Contact the recipient by some other means**, (by phone, for example) to confirm you're using the right address. Ask them if they've set up an email forwarding rule that could be forwarding your message to an incorrect address.

If the problem continues, forward this message to your email admin. If you're an email admin, refer to the **More Info for Email Admins** section below.

Was this helpful? [Send feedback to Microsoft](#).

More Info for Email Admins

Status code: 550 5.1.351

When Office 365 tried to send the message, the external email server returned an error stating that the recipient is unknown or the mailbox is unavailable. This error was reported by an email server outside Office 365.

If you or the sender can't fix the problem, contact the responsible party's email admin - Give them the error code and error message from this non-delivery report (NDR) to help them troubleshoot the issue. To determine who the responsible party might be, check the error for information about where the problem is happening. For example, look for a domain name like contoso.com. A domain name in the error might suggest who is responsible for the error. It could be the recipient's email server, or it could be a third-party service that your organization or the recipient's organization is using to process or filter email messages.

Although the sender might be able to fix the issue by correcting the recipient address, it's likely that only the recipient's email admin can fix the problem. Unfortunately, it's unlikely Office 365 Support will be able to help with these kinds of externally reported errors.

Subject: Who is the scheduler for the Acting Administrator?

Troy, sorry to bother you with an administrative question, but the yellow books lists Madeline Morris whom I have emailed but when I call her number I get someone else. Concerned that my request for a meeting is lost in the ether. Any help would be really appreciated!

Subject: Statoil is now Equinor

equinor

Dear Assistant Administrator Lyons,

For almost 50 years, Statoil has been one of the world's leading providers of energy, creating substantial value and contributing to the development of society. We are now delivering energy to more than 170 million people globally.

Today, I am delighted to inform you of an exciting new development. At our annual general meeting on May 15, the shareholders voted to change the name of the company. Statoil is now Equinor.

Our new name supports our strategy to transition from a focused oil and gas company to a broad energy major. The global energy markets are facing major changes and for Equinor this is a business opportunity. Our name reflects both our Norwegian origin and our equitable and balanced approach to energy and nature. As we look toward the future of our company, our industry, and society, our ambition is to drive important advancements in carbon-efficient oil and gas production, as well as strong growth in renewable energy.

While our name has changed, our strategy and our core values – Courageous, Collaborative, Open, and Caring – remain the same. Equinor has been present in the US for more than 30 years, invested over \$45 billion in projects since 2004, and supports thousands of jobs through our operations and supply chain. The US is a core growth area for our business and we remain committed to shaping the future of energy here by pushing the boundaries of technology, innovation, and imagination.

I look forward to engaging with you in the future on how Equinor can support economic growth and energy security in the US. In the interim, should you have any questions please do not hesitate to reach out to me. I also invite you to learn more on our new website: www.equinor.com.

Best regards,

Geir Westgaard

Vice President
Political & Public Affairs

Hi Troy!

Lee, Barry and I will be at EPA for a 1:45PM meeting with the Administrator today. Would you have some time to say hello afterwards a little after 2? No pressure if you're swamped, just thought I check in while I was in your neck of the woods.

Thanks! Hope all goes well!

Hey Troy!!

So good to hear from you and congratulations on your new role! I am heading to Chapel Hill end of June to start full-time business school and am really thrilled to be a Tar Heel. I really hope your family is doing well and please get in touch with me if you are even in the Carolinas. I would love to meet up.

I will send you my new school e-mail as soon as I get it.

Talk soon!

Subject: Re: Background Information for East Chicago Visit

Thanks, Bob. Yes I will be traveling w the Administrator and will be joined by Gov Holcomb and senators young and Donnelly.

This is helpful-I was unaware of the Anaconda/ARCO relationship

Will call tomorrow

Troy:

I understand from Joe Ellis that you may be joining and staffing Administrator Pruitt on his upcoming visit to East Chicago. In that connection, I thought it might be helpful for you to have some basic information as summarized below regarding the historical background of operations at the site and the responsibilities that Atlantic Richfield has assumed in the environmental clean-up at the property.

As always, please let us know if you or your colleagues have any questions or if further information or briefing would be helpful on any of these points.

Best regards (and safe travels),

Bob Stout

Ex. 6

Background Information

- Atlantic Richfield never owned or operated a facility on the East Chicago property.
- A different company that later merged into the Anaconda Company operated at the site until 1946, when it sold the property along with the building and manufacturing facilities. Numerous companies operated industrial facilities at the property during the more than two-decade gap between Anaconda's sale of the property in 1946 and the sale of the property to the East Chicago Housing Authority in 1970. In addition, other companies operated entirely separate lead-related businesses in the vicinity of the East Chicago property.

- In 1977, more than 30 years after the Anaconda Company ceased operations and sold the property, and years after the sale to the Housing Authority, Atlantic Richfield acquired Anaconda.
- As the successor to Anaconda, Atlantic Richfield has assumed certain responsibilities related to the environmental clean-up of the property. Atlantic Richfield has worked cooperatively with the EPA for many years on remediation efforts at the site, including the 2014 Consent Decree that Atlantic Richfield signed along with DuPont/Chemours and the Administrative Order on Consent signed last month. Atlantic Richfield is pleased that United States Metals Refining Company has joined Atlantic Richfield and DuPont/Chemours in contributing to cleanup costs and efforts. Atlantic Richfield is hopeful that other responsible parties will soon step forward as well.
- Through the 2014 consent decree, Atlantic Richfield and DuPont agreed to spend an estimated \$21 million to pay EPA's costs to excavate and remove contaminated soil in Zone 1 (the West Calumet housing complex) and Zone 3 (the eastern portion of the Site), and to properly dispose of the soil. Last month's Administrative Order on Consent provides millions of dollars to fund the EPA's efforts to remove contaminated soil from Zone 2 (the central portion of the Site) and perform indoor dust sampling and cleaning on residential properties in Zones 2 and 3.
- All remediation of the East Chicago site is being directed by the EPA.

> Dear Doron,
>
> Thanks for agreeing to help. As I mentioned, I am actively trying to get appointment as EPA Region 1 Administrator, and I am trying to get my resume highlighted within the EPA Office of Congressional and Intergovernmental Relations, which is the EPA Office that deals with regional issues.
> The new Associate Administrator for this EPA Office is Troy Lyons, who was formerly a Manager for Federal Governmental Affairs at Hess Corporation. My goal is to reach out to Troy Lyons, and get my information passed to him from someone he knows.
> I understand that you know Lorrie Hecker, Director of Global Communications at Hess Corporation. Would you kindly ask her if she knows Troy Lyons, and if so, would she be willing to forward him my information?
>
> Getting a political appointment requires building as strong a political base as possible. As I mentioned, so far I have the backing of Vincent DeVito, the Trump campaign manager for Massachusetts and Ron Kaufman, the Massachusetts GOP National Committeeman, who was an early Massachusetts Trump supporter. I have gotten my resume in front of Reince Preibus, the Chief of Staff to the President, Gary Cohn, the

Director of the National Economic Council, and Justin Clark, the Deputy Assistant to the President and Director of Intergovernmental Affairs at the White House. And, I have also successfully reached out to Gov. Baker (R) of Massachusetts, Gov. Scott (R) of Vermont and Sen. Collins (R) of Maine.

>
> In addition, I have the support of the Recreational Fishing Alliance, which was an early backer of President Trump (<https://www.joinrfa.org/2016/11/rfa-anticipates-positive-change-under-president-trumps-leadership/>), and the support of the Plymouth, MA Chamber of Commerce. I also have the support of numerous former environmental engineering clients, who have written letters to Administrator Pruitt on my behalf.

>
> I am very keen on getting the EPA Region 1 Administrator appointment, and would be grateful for any assistance you could offer me.

>
> Regards,
