March 2019

DISCLAIMER: The U.S. Environmental Protection Agency (EPA) is posting the following Harmonized Tariff Schedule (HTS) codes as general guidance for the various types of imported articles that may require Toxic Substances Control Act (TSCA) Section 13 import certification, as required by the Formaldehyde Standards for Composite Wood Products final rule, published December 12, 2016. Although EPA has attempted to identify a large universe of HTS codes that would be associated with articles regulated by the rule, this list is not exhaustive, and in some cases may be over-inclusive. Thus, this list should not be considered conclusive of articles that do or do not require TSCA Section 13 import certification. Any entity importing an article is responsible for determining themselves if the imported article is or contains regulated composite wood products, and if yes, is responsible for completing the TSCA Section 13 import certification process as required by 40 CFR 770.30(d) regardless of whether the product HTS code is represented in this list or not. EPA has no plans to keep this list current but may choose to update the list periodically and will indicate how current the document is by using a month/year association with the posted version on this webpage. For any information related to the TSCA Section 13 import certification or this list, please contact the TSCA Hotline at (202) 554-1404 or Tsca-hotline@epa.gov.
