FINANCIAL BENEFITS
Marnin Lebovits

PROJECTS AT A GLANCE
Marnin Lebovits
The Water Infrastructure Finance and Innovation Act (WIFIA) program accelerates investment in our nation’s water and wastewater infrastructure by providing long-term, low-cost, supplemental credit assistance under customized terms to creditworthy water and wastewater projects of national and regional significance.
CURRENT STATUS - LOANS

• The WIFIA program has invited 89 borrowers to submit applications from three selection rounds
• WIFIA has closed loans with all FY 2017 borrowers
• WIFIA has received applications from all FY 2018 borrowers who chose to submit and is working to close the remaining loans
• WIFIA is still receiving applications from FY 2019 borrowers
CURRENT STATUS - FUNDING

• WIFIA will have approximately $5.5 billion in loans available to finance approximately $11 billion in water infrastructure investment with its 2020 appropriation.

• WIFIA estimates that it will publish a Notice of Funding Availability (NOFA) for both the base program and SWIFIA program in Summer 2020.

• This timing is necessary due to the additional requirements mandated by the Appropriations Act, which must be completed prior to issuing the 2020 NOFA.
FY 2020 SUBSIDY

A small amount of federal funds supports a much larger amount of infrastructure investment

• Congress only appropriates money to cover the estimated losses for projects
• The remaining loan amount is borrowed from and repaid to Treasury
• Since WIFIA loans finance up to 49%, they stimulate additional investment in the project

$55 MILLION IN Appropriations

$5.5 BILLION IN Loans

PROGRAM
FEATURES &
FLEXIBILITIES
PROGRAM FEATURES

- **$5 MIL**
  Minimum project size for small communities (population of 25,000 or less). WIFIA has closed two loans from small community borrowers.

- **49%**
  Maximum portion of eligible project costs that WIFIA can fund. WIFIA has provided 49% funding to 70% of closed loans.

- **35 YEARS**
  Maximum final maturity date from substantial completion. To date, 17 WIFIA borrowers have taken advantage of the 35 year repayment period.

- **5 YEARS**
  Maximum time that repayment may be deferred after substantial completion of the project. Many borrowers have chosen to defer repayment for five years or less.
WIFIA BENEFITS & FLEXIBILITIES

• Very low interest rate
  o To date, WIFIA borrowers have received interest rates between 0.83% and 3.36%; average interest rate is 2.26%

• Capitalized interest
  o Miami and Morro Bay used this flexibility

• Highly flexible repayment schedule
  o Indiana Finance Authority has a customized repayment schedule

• Ability to preserve a borrower’s senior debt capacity
  o The City of San Diego, Miami, and Toho Water Authority all have subordinate liens
WIFIA BENEFITS & FLEXIBILITIES

• Ability to backload repayments
  o Metropolitan St. Louis Sewer District has a backloaded repayment schedule

• Modify disbursement schedule after loan closing
  o WIFIA allowed Narragansett Bay Commission to change their disbursement schedule after loan close because it was in the same fiscal year

• Simple pro-forma requirement for annual reporting
  o WIFIA does not require a detailed finance model for annual reporting, the borrower can choose a simplified version
STATE REVOLVING FUNDS AND WIFIA

Shared Goals & Features

- The SRFs and WIFIA provide sources of low-cost infrastructure financing for much needed water infrastructure improvements
- The programs work in tandem to provide needed funding across a wide breadth of project types and sizes

Program Differences

- WIFIA can close a loan with a borrower before or after SRF funding is finalized
- The SRFs, by design, provide benefits to smaller projects, typically under $100 million, in communities that often have limited access to funding
- WIFIA is designed to provide benefits to much larger projects, typically over $100 million
- At the time of loan close, 11 WIFIA borrowers were working or had secured SRF project financing
LENDING MONEY TO SRFs

• WIFIA can also loan money directly to SRF programs
• WIFIA has closed a loan with the Indiana Finance Authority and has invited the New Jersey Infrastructure Bank to submit an application
• Thanks to new legislation, SRF programs can receive financing through WIFIA’s base program or SWIFIA
• SWIFIA can provide financing to those SRF programs in cases where EPA accepts an existing indenture or the SRF program accepts SWIFA standard terms
• If the SRF program wants customized loan terms, the SRF program can submit an application through the WIFIA program
LOAN PROCESS

Project Selection

• Notice of Funding Availability
• Letter of Interest submission
• Letter of Interest evaluation
• Invitation to apply

Project Review, Negotiation, and Closing

• Application submission
• Application evaluation
• Due diligence
• Term sheet negotiation
• Loan agreement negotiation
• Closing

Approval and Closing

Up to 365 days | 1-3 months | 2-6 months | 1-3 months
PROJECT SELECTION IS COMPETITIVE

Project selection is a competitive process to identify projects to invite to apply which are:

- Eligible
- Creditworthy
- Technically feasible
- Meet the public policy goals outlined in the WIFIA statute and regulation
GENERAL TIPS

- Use the letter of interest form available at https://www.epa.gov/wifia/wifia-application-materials
- Read the instructions in the NOFA and the program handbook prior to completing your letter of interest
- Answer every question, when relevant provide additional supporting material to support your answer
- Provide specific references when pointing to supporting documents
- Remember your audience is learning about your system for the first time and needs contextual information to understand your project
- Submit early in order to avoid issues with large file sizes at the deadline
- Attend one of the webinars offered following the NOFA release
- Ask questions—contact WIFIA program staff at wifia@epa.gov
INVITATION TO APPLY

EPA intends to loan to the projects that it invites to apply

Selected projects
• Notified in writing of selection
• Within 30 days of the invitation, EPA will meet with the entity to discuss the application process
• The application deadline is 365 days from the notification date
• EPA will publicly announce selected projects

Non-selected projects
• Notified in writing that they were not selected
• May request a de-brief
• Must re-submit their LOI to be considered in future rounds
APPLICATION PROCESS

Each application review is tailored to reflect the complexity and risk of the proposed project.

Each project is reviewed for:
• Creditworthiness
• Engineering due diligence
• Legal aspects of the proposed project and credit structure
FINANCIAL BENEFITS
INTEREST RATE SAVINGS

NO CARRYING COSTS

Disbursements

• WIFIA loans allow multiple disbursements, synchronized with funding needs at no additional cost
• Undisbursed WIFIA amounts do not accrue interest
• WIFIA allows prepayment at no cost
CARRYING COST SAVINGS

Outstanding Debt Balance of WIFIA Loan Used for $90 Million Construction Financing

Outstanding Debt Balance of Bond Used for $90 Million Construction Financing
COMBINING FEATURES CREATES MORE SAVINGS

• WIFIA’s low interest rate and the avoidance of negative arbitrage provides significant savings
• For $100 million in total financing, financing with a non-sculpted 49% WIFIA loan can result in approximate savings equal to 20% of the total financing amount (~$20 million)
COMBINING FEATURES CREATES MORE SAVINGS

Standalone Bond Balance Through Maturity

51% Bond and 49% WIFIA Loan Balances Through Maturity
COMBINING FEATURES CREATES MORE SAVINGS
FLEXIBLE FINANCIAL TERMS

Customized repayment schedule

- Repayment period is 35 years from substantial completion
- Payments may be deferred up to 5 years following substantial completion
- WIFIA loans can be amortized to complement other debt repayments
- Customizing the WIFIA debt repayment schedule can increase overall savings by reducing the interest expense associated with bond financing. For instance, backloading WIFIA repayment allows for higher bond debt service, and therefore, lower bond interest expense
- For a total $100 million debt financing, financing with a sculpted 49% WIFIA loan can result in approximate savings equal to 26.8% of the financing amount (~$26.8 million)
VALUE COMES FROM THE SUM OF THESE SAVINGS FEATURES

Stand-alone Bond Balance Through Maturity

51% Bond and 49% WIFIA "Sculpted" Loan Balances
VALUE COMES FROM THE SUM OF THESE SAVINGS FEATURES

Projected Savings from Sculpted WIFIA Loan as a Percentage of the 49% WIFIA Loan

- Sculpting Impact - Interest Rate
- Unsculpted Interest Rate
- Sculpting Impact - Neg Arb
- Unsculpted Negative Arbitrage
