Tips on how to use EPA's EnviroAtlas Interactive Map

EPA United States Environmental Protection Agency

EnviroAtlas — people • health • nature • economy

Search for data.

Add your own data or find additional data.

Search for your location.

Looking to do more? Analysis Tools can be found here, in this order:
Map Tools, ECAT Change Analysis, Compare My Area, Watershed Navigation, Raindrop, Elevation Profile, Save Session, Select

Change your basemap (satellite, etc.).

Use these two buttons to find **data layers**. The apple-globe icon has environmental data and the house icon has demographic data.

Sample data layers/maps:

Source	Category	Variable
EnviroAtlas Data	Land Cover: Type	Percent Wetlands
EnviroAtlas Data	Hydrologic Features	NHDPlus V2 Features (*waterbodies*)
EnviroAtlas Data	Political Boundaries	State & County lines
2012-2016 ACS	Income/Poverty	Households below Poverty Level
2012-2016 ACS	Population	Percent population under age 18

Ready to use the map you've made? Use the "Snipping Tool" on your computer to take a screenshot.

After you've searched for your location, use these three dots to "Add a Marker."

You can do so much in the Layer List!
• View the legend for your layer by clicking on it
• Use the three dots to the right to alter transparency and/or draw other layers on top
