

TSCA New Chemicals Notices Received January, 2021

Case No.	Version	Received Date	Manufacturer	Use	Chemical
SN-19-0004A	4	06/04/2019	CBI	(S) A lubricating agent used in the production of automotive disc brakes	(G) Pitch coke
SN-19-0005A	2	05/28/2019	Molecular Rebar Design	(G) Conductive ink	(S) Functionalized multiwall carbon nanotubes
P-16-0442A	4	06/26/2019	CBI	(G) Polymer for coatings	(G) Carboxylic acids, unsaturated alkanediol, substituted alkylpropyl, substituted isocyanatocycloalkane
P-16-0443A	4	06/26/2019	CBI	(G) Polymer for coatings	(G) Carboxylic acids, unsaturated disubstituted amine, alkanediol, alkanedioic acid and substituted alkylamine
P-16-0444A	4	06/26/2019	CBI	(G) Polymer for coatings	(G) Amine salted polyurethane
P-16-0445A	4	06/26/2019	CBI	(G) Polymer for coatings	(G) Carboxylic acids, unsaturated substituted alkanediamine, alkanedioic acid and substituted alkylamine
P-17-0007A	5	06/13/2019	CBI	(S) Intermediate	(G) Dialkyl 7,10-dioxane, dithiane
P-17-0239A	6	06/11/2019	CBI	(G) Adhesive for open non-descriptive use	(G) Substituted carboxylic acid, 1-methylbenzene, hexanedioic acid, hydroxypoly[oxy(methyl-1,2-ethoxyisocyanatobenzene)], 2,2'-oxybis[1,2-propanediol]
P-17-0299A	3	06/06/2019	CBI	(G) Paint additive	(G) 2-Propenoic acid, alkyl-, polyethylene glycol methacrylate
P-17-0345A	2	06/07/2019	CBI	(G) Resin intermediate	(G) Polyurethane, methacrylate
P-17-0389A	6	06/24/2019	CBI	(G) Polymer precursor	(G) Alkyl oil, polymer with 1,4-Alkyl oil, hydrogenated rosin, trimethylolpropane
P-18-0009A	5	06/24/2019	CBI	(G) Lubricant additive	(G) Phosphonic acid, dimethyl ester
P-18-0044A	3	06/24/2019	CBI	(G) Intermediate species	(G) Fatty acids
P-18-0045A	3	06/24/2019	CBI	(G) Application coating	(G) Fatty acids, alkyl esters
P-18-0050	1	11/16/2017	CBI	(G) Raw material in industrial coatings	(G) Alkane, diisocyanato-, homo- and polyalkylene glycol mono-amine
P-18-0061A	3	06/24/2019	CBI	(G) Industrial coating hardeners	(G) Alkyl methacrylates, polymers, hydroxyalkyl acrylates, novalac with organic amines
P-18-0078A	4	06/26/2019	CBI	(G) Paint	(G) 2-Alkenoic acid, 2-alkyl-, 2-2-alkenoate, 2-substituted alkyl 2-2-alkyl-2-alkenoate, tert alkylphenol

Case No.	Version	Received Date	Manufacturer	Use	Chemical
P-18-0122A	6	06/04/2019	Polymer Ventures, Inc.	(G) Paper additive	(G) Alkylamide, polymer with a polycyanamide, alkyl acid salt.
P-18-0125A	2	06/18/2019	NOLTEX L.L.C.	(G) Reagent in coating material	(G) Oxoalkylcarboxylic acid, so
P-18-0197A	2	06/21/2019	CBI	(G) Polymer composite additive	(G) Metal, alkylcarboxylate oxo
P-18-0207A	3	06/21/2019	CBI	(G) Polymer composite additive	(G) Metal, oxo alkylcarboxylate
P-18-0239A	3	06/26/2019	CBI	(G) Reactant in coating	(G) N-alkyl propanamide
P-18-0240A	3	06/26/2019	CBI	(G) Reactant in coating	(G) N-alkyl acetamide
P-18-0260A	4	06/04/2019	Allnex USA Inc.	(S) Binder for wood stains	(G) Fatty acids, polymers with a carbomonocycle, peroxide-initia esters and substituted carbomon
P-18-0263A	2	06/17/2019	CBI	(G) Solution additive	(G) Mixed alkyl esters-, polyme ethanediamine, aziridine, N-acet
P-18-0263A	3	06/26/2019	CBI	(G) Solution additive	(G) Mixed alkyl esters-, polyme ethanediamine, aziridine, N-acet
P-18-0274A	6	06/19/2019	CBI	(S) Chemical Intermediate	(G) Heterocycle fluoroalkyl sulf
P-18-0274A	6	06/19/2019	CBI	(G) Additive	(G) Heterocycle fluoroalkyl sulf
P-18-0295	1	08/30/2018	CBI	(S) Use as an ingredient in the manufacture of consumer cleaning products. In these products, the notified chemical is not destroyed nor further reacted.	(S) 1,3-Butanediol, (3R)-
P-18-0295	1	08/30/2018	CBI	(S) Use as monomer in the manufacture of resins for use in paint and coating products. Notified substance will not be present in the cured coating.	(S) 1,3-Butanediol, (3R)-
P-18-0295	1	08/30/2018	CBI	(S) Use as a monomer in the manufacture of plastic products. In this process the notified substance is reacted with one or more other compounds to become part of a polymer. Depending on the reactants involved, the final polymer can be a resin used to make	(S) 1,3-Butanediol, (3R)-

Case No.	Version	Received Date	Manufacturer	Use	Chemical
				molded plastic products or the final polymer can be a shorter polymer used as a plasticizer.	
P-18-0323A	3	06/18/2019	Kuraray America, Inc.	(G) Raw material for polymer manufacturing	(S) 2-Propenoic acid, 2-methyl-,
P-18-0372A	4	06/11/2019	Hexion Inc	(G) Polyol.	(G) Formaldehyde, polymer with heteromonocycle, reaction product 4-methyl-1,3-dioxolan-2-one
P-18-0372A	4	06/11/2019	Hexion Inc	(S) Reactive modifier for Carbon, Fiber bonding, Friction, Coated abrasives, Glass Inserts, Refractory, and Bonded abrasives.	(G) Formaldehyde, polymer with heteromonocycle, reaction product 4-methyl-1,3-dioxolan-2-one
P-18-0372A	4	06/11/2019	Hexion Inc	(S) Reactive polyol for Sealants, Adhesives, 1 part coatings, 2 part coatings, and composites.	(G) Formaldehyde, polymer with heteromonocycle, reaction product 4-methyl-1,3-dioxolan-2-one
P-18-0372A	3	05/31/2019	Hexion Inc	(G) Polyol.	(G) Formaldehyde, polymer with heteromonocycle, reaction product 4-methyl-1,3-dioxolan-2-one
P-18-0372A	3	05/31/2019	Hexion Inc	(S) Reactive modifier for Carbon, Fiber bonding, Friction, Coated abrasives, Glass Inserts, Refractory, and Bonded abrasives.	(G) Formaldehyde, polymer with heteromonocycle, reaction product 4-methyl-1,3-dioxolan-2-one
P-18-0372A	3	05/31/2019	Hexion Inc	(S) Reactive polyol for Sealants, Adhesives, 1 part coatings, 2 part coatings, and composites.	(G) Formaldehyde, polymer with heteromonocycle, reaction product 4-methyl-1,3-dioxolan-2-one
P-18-0373A	4	06/11/2019	Hexion Inc	(G) Polyol	(G) Formaldehyde, polymer with and heteroatom-substituted heteroatom
P-18-0373A	3	05/31/2019	Hexion Inc	(G) Polyol	(G) Formaldehyde, polymer with and heteroatom-substituted heteroatom
P-19-0021A	3	06/26/2019	CBI	(G) Pigment ink	(G) Hydroxyalkyl carboxylic acid carbonate, alkanediol, isocyanate
P-19-0022A	3	06/26/2019	CBI	(G) Pigment ink	(G) Hydroxyalkyl carboxylic acid carbonate, alkanediol, isocyanate
P-19-0024A	4	06/12/2019	Sales and Distribution Services, Inc.	(S) Hot Mix Asphalt Application: The PMN compound will be used as asphalt additive for hot mix (HMA) as well as cold mix (CMA) asphalt	(S) 1-Octadecanaminium, N,N-c N-[3-(trimethoxysilyl)propyl]-, water, Trimethoxy(propyl) silane Tetraethyl orthosilicate and etha

Case No.	Version	Received Date	Manufacturer	Use	Chemical Name
				applications. The PMN substance chemically reacts with the surface of the aggregate and changes surface characteristics of aggregate from hydrophilic to hydrophobic. This change provides stronger bonding between asphalt and aggregates and reduces the potential for stripping away asphalt binder from an aggregate due to water.	
P-19-0024A	4	06/12/2019	Sales and Distribution Services, Inc.	(S) Waterproofing Application: The PMN substance is expected to be used in waterproofing of building materials, including cementitious material, masonry, concrete, plaster, bricks, etc. It is initially intended to be used at a maximum of 5 sites by trained commercial applicators. The PMN substance is modification of a quaternary silane compound by a hydrolysis reaction with other silanes to make it an oligomeric compound. These quaternary silane products have been manufactured and marketed for waterproofing uses for over 35 years. The solution of PMN substance in water is applied as a waterproofing sealer for building materials by spray application.,(S) Asphalt Emulsion	(S) 1-Octadecanaminium, N,N-c N-[3-(trimethoxysilyl)propyl]-, water, Trimethoxy(propyl) silane Tetraethyl orthosilicate and etha

Case No.	Version	Received Date	Manufacturer	Use	Chemical
				Application: The PMN substance is water soluble and can be used as an asphalt emulsion in road construction. This additive provides better bonding with ground surface, quick drying and reduced tire pickup of the asphalt emulsion by application equipment.	
P-19-0031A	8	06/19/2019	CBI	(S) Curing agent for epoxy coating systems	(G) Phenol, 4,4'-(1-methylethyl) formaldehyde, 2-(chloromethyl) hydroxypoly(oxy-1,2-ethanediyl
P-19-0051A	5	06/21/2019	CBI	(G) UV curable inks	(G) 1,3-Propanediamine, N1,N1 glycol ether with alkyltriol (3:1) alkylene glycol monoacrylate et
P-19-0053A	5	06/25/2019	Wacker Chemical Corporation	(S) Used as a surface treatment, sealant, caulk, and coating for mineral building materials such as concrete, brick, limestone, and plaster, as well as on wood, metal and other substrates. Formulations containing the cross-linker provide release and anti-graffiti properties, water repellency, weather proofing, and improved bonding in adhesive/sealant applications. The new substance is a moisture curing cross-linking agent which binds/joins polymers together when cured. Ethanol is released during cure, and once the cure reaction is complete, the product will remain bound in the cured polymer matrix.	(S) 1-Butanamine, N-butyl-N-[(1
P-19-0071A	3	06/11/2019	CBI	(G) Physical property modifier for polymers	(G) Trimethylolpropane, alkenoi

Case No.	Version	Received Date	Manufacturer	Use	Chemical
P-19-0075A	3	05/30/2019	Allnex USA Inc.	(S) The PMN substance is an intermediate incorporated as a component in VIACRYL SC 6841.	(G) Alkenoic acid, alkyl-, (alkyl substituted carbomonocycle, substituted formates
P-19-0082A	3	06/20/2019	Bedoukian Research Inc.	(S) Fragrance uses per FFDCA: fine fragrance, creams, lotions, etc., Fragrance uses per TSCA: scented papers, candles, detergents, cleaners, etc.	(S) Heptanal, 6-hydroxy-2,6-dimethyl-
P-19-0086A	3	05/31/2019	CBI	(G) Monitor oil and gas well performance	(G) Halogenated sodium alkylbenzoate
P-19-0087A	3	05/31/2019	CBI	(G) Monitor oil and gas well performance	(G) Halogenated sodium alkylbenzoate
P-19-0089A	5	06/04/2019	CBI	(G) Well performance tracer	(G) Halogenated sodium alkylbenzoate
P-19-0090A	3	06/04/2019	CBI	(G) Well performance tracer	(G) Halogenated sodium benzoate
P-19-0091A	3	06/04/2019	CBI	(G) Well performance tracer	(G) Halogenated alkylbenzoic acid
P-19-0092A	2	06/04/2019	CBI	(G) Tracer of well performance	(G) Halogenated alkylbenzoic acid
P-19-0093A	3	06/04/2019	CBI	(G) Tracer for well performance	(G) Halogenated benzoic acid
P-19-0095	3	06/04/2019	CBI	(G) Consumer Disposables, Polymer Sheet, and Durable Goods	(G) Poly hydroxy alkanate
P-19-0096	1	05/31/2019	CBI	(G) Additive for plastics industry	(G) Benzofuranone, bis(branched alkyl)-alkyl-dibenzo-substituted
P-19-0097	3	06/10/2019	CBI	(G) Well performance monitor	(G) Halogenated alkylbenzoic acid
P-19-0098	1	06/04/2019	Clariant Corporation	(S) Flame retardant additive for intumescent coatings.	(G) Phosphoric acid, polymer with alkanediol
P-19-0100	5	06/14/2019	CBI	(G) Well performance monitor	(G) Halogenated alkylbenzoic acid
P-19-0101	4	06/14/2019	CBI	(G) Monitor well performance	(G) Halogenated alkylbenzoic acid
P-19-0102	3	06/14/2019	CBI	(G) Well performance monitor	(G) Halogenated alkylbenzoic acid

Case No.	Version	Received Date	Manufacturer	Use	Chemical
P-19-0103	2	06/14/2019	CBI	(G) Well performance monitor	(G) Halogenated alkyl benzoic a
P-19-0104	4	06/14/2019	CBI	(G) Well performance monitor	(G) Halogenated alkylbenzoic a
P-19-0105	3	06/14/2019	CBI	(G) Well performance monitor	(G) Halogenated benzoic acid, e
P-19-0106	3	06/14/2019	CBI	(G) Well performance monitor	(G) Halogenated alkylbenzoic a
P-19-0107	3	06/14/2019	CBI	(G) Well performance monitor	(G) Halogenated alkylbenzoic a
P-19-0108	3	06/14/2019	CBI	(G) Well performance monitor	(G) Halogenated alkylbenzoic a
P-19-0109	1	06/07/2019	Arch Chemicals, Inc.	(S) Chemical is used as a component of a hoof cleaning formulation to improve the wettability of the overall cleaning solution on the hoof	(S) Copper ethanolamine compl
P-19-0110	3	06/14/2019	CBI	(G) Well performance monitor	(G) Halogenated benzoic acid, e
P-19-0112	1	06/12/2019	Shin-ETSU Microsi	(G) Contained use for microlithography for electronic device manufacturing	(G) Substituted heterocyclic oni 1-(difluorosulfomethyl)-2,2,2-tri 2-propen-1-yl)oxy]tricyclo[3.3.1 polymer with 3-etheylphenol, 1-2-propenoate and 1-(7-oxabicyc 2-methyl-2-propenoate, di-Me 2 methylpropenoate]-initiated
P-19-0113	2	06/13/2019	CBI	(G) Flow cell additive	(G) Metal oxide-chloro
P-19-0114	1	06/17/2019	Shin-ETSU Microsi	(G) Contained use for microlithography for electronic device manufacturing	(G) Sulfonium, triphenyl-, triflu (triheterosubstitutedalkyl)alkanc
P-19-0115	1	06/17/2019	Tokyo Ohka Kogyo America, Inc.	(G) An ingredient used in the manufacture of photoresist	(G) Sulfonium, bis(dihalocarbor substituted carbomonocyclic est
P-19-0117	2	06/21/2019	CBI	(G) Additive	(G) Polycyclic amine, reaction p polymers
P-19-0118	1	06/21/2019	CBI	(G) Component of lubricant	(G) Substituted polyalkylenepol polymer
P-19-0119	1	06/24/2019	Zschimmer&	(S) Foaming additive used in building/construction, exposure would only occur during loading of finished product. Product	(S) Poly(oxy-1,2-ethanediyl), al branched alkyl ethers, sodium se

Case No.	Version	Received Date	Manufacturer	Use	Chemical
				application is used in a closed system with very low possibility for exposure. To be used on construction sites.	
P-19-0119	1	06/24/2019	Schwarz	(S) Foaming additive used in building/construction, exposure would only occur during loading of finished product. Product application is used in a closed system with very low possibility for exposure. To be used on construction sites.	(S) Poly(oxy-1,2-ethanediyl), al branched alkyl ethers, sodium se
P-19-0120	1	06/25/2019	CBI	(G) Component of ink	(G) Alkenoic acid, polymer with bis heteromonocycle, substituted carbomonocycle, alkali metal sa
J-19-0024	1	06/28/2019	CBI	(G) Ethanol production	(G) Biofuel producing Saccharo stable.
J-19-0025	1	06/28/2019	CBI	(G) Ethanol production	(G) Biofuel producing Saccharo stable.
P-16-0354A	4	07/08/2019	CBI	(G) Intermediate	(G) Esteramine.
P-16-0354A	5	07/09/2019	CBI	(G) Intermediate	(G) Esteramine.
P-16-0355A	4	07/08/2019	CBI	(G) Intermediate	(G) Esteramine.
P-16-0355A	5	07/09/2019	CBI	(G) Intermediate	(G) Esteramine.
P-17-0003A	9	06/25/2019	CBI	(G) Printing ink applications	(G) Styrene(ated) copolymer wi (meth)acrylic acid.
P-17-0346A	6	07/02/2019	CBI	(G) Destructive use	(G) triarylalkyl phosphonium ha
P-17-0346A	7	07/08/2019	CBI	(G) Destructive use	(G) triarylalkyl phosphonium ha
P-17-0375A	5	06/30/2019	CBI	(G) Paint additive	(G) 2-Oxepanone, polymer with ((hydroxyalkyl)-alkanediol and i trialkylcyclohexane, di-alkyl ma Me ether-blocked, reaction prod
P-17-0383A	2	07/17/2019	Toagosei America, Inc.	(G) Binder	(G) Alkenoic acid, polymer will polyalkylenediol diacrylate.
P-17-0387A	5	07/08/2019	CBI	(G) Paint	(G) Dicarboxylic acids, polymer susbtituted-alkylalkanoic acid, s alkanedioic acid and alkanediol, alkanolamine.
P-17-0388A	5	07/08/2019	CBI	(G) Paint	(G) Dicarboxylic acids, polymer susbtituted-alkylalkanoic acid, s alkanedioic acid and alkanediol, alkanolamine.

Case No.	Version	Received Date	Manufacturer	Use	Chemical
P-17-0398A	12	06/28/2019	Nexus Fuels	(G) Component of complex formulations for blending	(G) Branched Cyclic and Linear Depolymerization.
P-17-0399A	12	06/28/2019	Nexus Fuels	(G) Stock use	(G) Alkane, Alkene, Styrenic C Depolymerization.

				bonding with ground surface, quick drying and reduced tire pickup of the asphalt emulsion by application equipment	
P-19-0024A	6	07/03/2019	Sales and Distribution Services	(S) Hot Mix Asphalt Application: The PMN compound will be used as asphalt additive for hot mix (HMA) as well as cold mix (CMA) asphalt applications. The PMN substance chemically reacts with the surface of the aggregate and changes surface characteristics of aggregate from hydrophilic to hydrophobic. This change provides stronger bonding between asphalt and aggregates and reduces the potential for stripping away asphalt binder from an aggregate due to water; Waterproofing Application: The PMN substance is expected to be used in waterproofing of building materials, including cementitious material, masonry, concrete, plaster, bricks, etc. It is initially intended to be used at a maximum of 5 sites by trained commercial applicators. The PMN substance is modification of a quaternary silane compound by a hydrolysis reaction with other silanes to make it an oligomeric compound. These quaternary silane products have been	(S) 1-Octadecanaminium, N,N-dimethyl-N-[3-(trimethoxysilyl)propyl]-, chloride, water, Trimethoxy(propyl) silane, Tetraethyl orthosilicate and etha

Case No.	Version	Received Date	Manufacturer	Use	Chemical
				manufactured and marketed for waterproofing uses for over 35 years. The solution of PMN substance in water is applied as a waterproofing sealer for building materials by spray application; Asphalt Emulsion Application: The PMN substance is water soluble and can be used as an asphalt emulsion in road construction. This additive provides better bonding with ground surface, quick drying and reduced tire pickup of the asphalt emulsion by application equipment

				using heat and a chemical reaction occurs forming a solid composite structure. The PMN substance is reacted during the cure process into the solid plastic matrix and therefore not present in the finished cured part. Use of this product will enhance the life of renewable energy source provided by wind turbines therefore contributing to the reduction in fossil fuel usage.	
P-18-0414A	2	09/06/2019	CBI	(G) Lubricant additive	(G) 2-alkenoic acid ester, polym oxirane di-alkenoate, alkyloxirane alkenoate, -(2-alkyl-1-oxo-2-alk 1-yl)oxy]poly(oxyalkanediyl), fl siloxanylalkanoate, alkylperoxo:
P-19-0024A	7	07/25/2019	Sales and Distribution Services, Inc.	(S) Hot Mix Asphalt Application: The PMN compound will be used as asphalt additive for hot mix (HMA) as well as cold mix (CMA) asphalt applications. The PMN substance chemically reacts with the surface of the aggregate and changes surface characteristics of aggregate from hydrophilic to hydrophobic. This change provides stronger bonding between asphalt and aggregates and reduces the potential for stripping away asphalt binder from an aggregate due to water. Asphalt Emulsion Application: The PMN substance is water soluble and can be used as an asphalt	(S) 1-Octadecanaminium, N,N-d N-[3-(trimethoxysilyl)propyl]-, c water, Trimethoxy(propyl) silane Tetraethyl orthosilicate and etha

Case No.	Version	Received Date	Manufacturer	Use	Chemical
				and other substrates. Formulations containing the cross-linker provide release and anti-graffiti properties, water repellency, weather proofing, and improved bonding in adhesive/sealant applications. The new substance is a moisture curing cross-linking agent which binds/joins polymers together when cured. Ethanol is released during cure, and once the cure reaction is complete, the product will remain bound in the cured polymer matrix.

SN-20-0006A	3	12/18/2020	CBI	(G) Color Developer	(S) Phenol, 4,4'-[1-[4-[1-(4-hydroxy-1-methylethyl)phenyl]ethylidene]
SN-21-0001	1	12/07/2020	CBI	(S) Chelating agent for use in hard surface cleaning (and disinfection), Chelating agent for use in laundry detergent.	(S) Glycine, N-(carboxymethyl) sodium salt (1:3)
SN-21-0001A	2	12/14/2020	CBI	(G) Ethanol production	(S) Glycine, N-(carboxymethyl) sodium salt (1:3)
J-21-0007	1	12/21/2020	CBI	(S) Chelating agent for use in hard surface cleaning (and disinfection), Chelating agent for use in laundry detergent.	(G) Biofuel producing <i>Saccharo</i> stable
J-21-0008	1	12/21/2020	CBI	(S) Chelating agent for use in hard surface cleaning (and disinfection), Chelating agent for use in laundry detergent.	(G) Biofuel producing <i>Saccharo</i> stable
J-21-0009	1	12/21/2020	CBI	(S) Chelating agent for use in hard surface cleaning (and disinfection), Chelating agent for use in laundry detergent.	(G) Biofuel producing <i>Saccharo</i> stable
P-16-0592A	6	01/08/2021	Santolubes Manufacturing LLC	(S) This low viscosity diester will be blended with a higher viscosity ester to make a high efficiency gear lubricant primarily for worm gear applications.	(S) Fatty acids, C8-C10, diesters w-hydroxypoly(oxy-1,4-butanediol)
P-16-0592A	7	01/13/2021	Santolubes Manufacturing LLC	(S) This low viscosity diester will be blended with a higher viscosity ester to make a high efficiency gear lubricant primarily for worm gear applications.	(S) Fatty acids, C8-C10, diesters w-hydroxypoly(oxy-1,4-butanediol)
P-18-0153A	4	01/27/2021	CBI	(G) Mixed metal oxide for batteries	(G) Lithium mixed metal oxide
P-18-0273A	3	01/04/2021	CBI	(G) Used in polymer manufacturing.	(S) 1,4-Cyclohexanedicarboxylic acid

Case No.	Version	Received Date	Manufacturer	Use	Chemical
P-18-0326A	9	01/14/2021	CBI	(G) Chemical Intermediate	(G) Alkanoic acid, alkyl ester, or residues
P-18-0349A	6	12/31/2020	Lanxess Solutions US Inc	(S) Two component adhesives and protective coatings for marine, infrastructure, etc. The urethane prepolymer is designed to react with epoxy materials to create a flexible coating or adhesive.	(S) Oxirane, 2-methyl-, polymer propanetriol (3:1), polymer with branched 4-nonylphenol-blocker
P-19-0098A	3	01/07/2021	Clariant Corporation	(S) Flame retardant additive for intumescent coatings.	(G) Phosphoric acid, polymer with alkanediol
P-19-0122A	3	01/27/2021	CBI	(G) Reactant monomer in a polymer for industrial use	(G) 2-propenoic acid, 2-(hydroxy substituted) ethyl ester
P-20-0010A	12	01/21/2021	CBI	(G) Polymerization auxiliary	(G) Carboxylic acid, reaction product of inorganic dioxide and metal
P-20-0030A	4	01/26/2021	CBI	(S) Plasticizer for Plastics, Plasticizer in caulks and sealants	(G) Hexanedioic acid, carbomorph
P-20-0036A	4	01/12/2021	Sigma-Aldrich Co. LLC	(G) Used in the manufacture of Lithium-6 Chloride.	(S) Carbonic acid, di(lithium-6) chloride
P-20-0071A	8	01/13/2021	CBI	(G) Colorant	(G) Salt of 2-Naphthalenesulfonic acid 4-sulfo-phenyl diazenyl]
P-20-0078A	6	01/07/2021	Ascend Performance Materials	(G) Stabilizer for industrial applications	(G) Dicarboxylic acid, compound with alkyldioate alkyldioate (1:2:1:1)
P-20-0079A	6	01/07/2021	Ascend Performance Materials	(G) Stabilizer for industrial applications	(G) Dicarboxylic acid, compound with
P-20-0080A	8	12/28/2020	Ascend Performance Materials	(G) Stabilizer for industrial applications	(G) Alkyldiamine, aminoalkyl-,
P-20-0080A	9	01/07/2021	Ascend Performance Materials	(G) Stabilizer for industrial applications	(G) Alkyldiamine, aminoalkyl-,
P-20-0081A	8	12/28/2020	Ascend Performance Materials	(G) Stabilizer for industrial applications	(G) Carboxylic acid, compound with
P-20-0081A	9	01/07/2021	Ascend Performance Materials	(G) Stabilizer for industrial applications	(G) Carboxylic acid, compound with

Case No.	Version	Received Date	Manufacturer	Use	Chemical
P-20-0082A	8	12/28/2020	Ascend Performance Materials	(G) Stabilizer for industrial applications	(G) Alkyldiamine, aminoalkyl-,
P-20-0082A	9	01/07/2021	Ascend Performance Materials	(G) Stabilizer for industrial applications	(G) Alkyldiamine, aminoalkyl-,
P-20-0083A	2	01/27/2021	CBI	(G) Reactant monomer in a polymer for industrial use	(G) 2-propenoic acid, nitrogen-s
P-20-0096A	4	01/28/2021	Solenis LLC	(G) Use in papermaking process	(G) Unsaturated dicarboxylic ac 2-(dialkylamino)alkyl-alkyl-alka 2-propenamide and salt of alkyl-
P-20-0097A	4	01/06/2021	Nelson Brothers, LLC	(S) The PMN substance will be used as an emulsifier for applications in explosives.	(G) Butanedioic acid, monopoly dihydroxyalkyl and hydroxyalko
P-20-0101A	5	01/15/2021	Allnex USA Inc.	(S) Coating Resin	(G) Alkanoic acid, hydroxy-(hyc alpha-[(hydroxyalkyl)alkyl]-om (haloalkyl)oxiane polymer (alky carbomonocycle] alkenoate and hydroxyalkyl acrylate-blocked
P-20-0105A	4	01/13/2021	Sound Agriculture Company	(S) Maltol lactone is a compound that promotes microbial activity in the soil, resulting in increased availability of phosphorus for crops. This substance will be used on commercial farming operations.	(S) 4H-Pyran-4-one, 3-[(2,5-dih 2-methyl-
P-20-0107A	4	01/13/2021	CBI	(G) Crosslinking polymer	(G) Carbimide, polyalkylenepol alkanediol, 2-alkoxyalkyl metha 2-heterocycle-blocked
P-20-0121A	2	01/25/2021	CBI	(S) Chemical intermediate	(G) Imidic acid, alkyl ester, sulfi
P-20-0123A	2	01/25/2021	CBI	(S) Binder	(G) Nitrogen-substituted heteroc substituted alkyl) derivs., sulfate
P-20-0136A	2	01/18/2021	Clariant Corporation	(S) Surface treatment compound for textiles.	(G) Arylcarboxylic acid, alkyl e with methyloxirane polymer wit
P-20-0169A	5	01/22/2021	CBI	(G) Battery Plastics and coatings applications, conductive agent for conductive plastic and paint	(S) multiwalled carbon nanotube

Case No.	Version	Received Date	Manufacturer	Use	Chemical
P-20-0173A	3	01/15/2021	ICM Products Inc.	(G) Use as a Coating Additive	(G) Silsesquioxanes, alkyl, alko
P-21-0005	4	01/22/2021	Evonik Corporation	(S) Polymeric additive in gear oils	(G) Carbonmonocyclic alkene p alkenoate, alkyl alkenoate and p
P-21-0006A	3	01/19/2021	CBI	(G) Froth flotation to treat rare earth minerals and to remove deleterious substances.	(G) Naphthalene derivative
P-21-0010A	4	01/07/2021	Evonik Degussa Corporation	(S) 3D Printing	(S) 1,3-Benzenedicarboxylic aci propanediol, 1,2-ethanediol, 2-e propanediol, hexanedioic acid, 1 isobenzofurandione, N-[[1,3,3-t 1-yl)oxy]ethoxy]carbonyl]amino N-[3,3,5-trimethyl-5-[[[2-[(1-o yl)oxy]ethoxy]carbonyl]amino]r
P-21-0012A	2	01/12/2021	CBI	(G) The notified substance will be used as a fragrance ingredient.	(G) Multialkylbicycloalkenyl su
P-21-0012A	3	01/21/2021	CBI	(G) The notified substance will be used as a fragrance ingredient.	(G) Multialkylbicycloalkenyl su
P-21-0020	3	01/22/2021	Allnex USA Inc.	(S) Modifier for hardness development in paint formulations for metal applications.	(G) Alkanedioic acid, dialkyl est alkyl(substituted alkyl)-alkanedi
P-21-0021A	5	01/11/2021	J6 Polymers	(S) Raw material to be blending into R-side components of the polyurethane and polyisocyanurate industry. Specifically used in slabstock/bunstock processing of foam	(S) Soybean oil, mixed esters wi terephthalic acid
P-21-0034	3	01/06/2021	Evonik Degussa Corporation	(S) crosslinker for automotive coatings, wood and plastic coatings	(G) Carbamic acid, N-[3-(trialk trimethyl-1,6-hexanediyl] ester
P-21-0035	3	01/06/2021	Evonik Degussa Corporation	(S) crosslinker for automotive coatings, wood and plastic coatings	(G) Carbamic acid, N-[3-(trialk trimethyl-1,6-hexanediyl] ester
P-21-0043A	2	01/05/2021	Advanced Polymer Coatings	(S) Component in protective coatings that provides chemical resistance	(G) Glycidyl ether of (formalde

Case No.	Version	Received Date	Manufacturer	Use	Chemical
