

A red wall with a jagged hole revealing wooden studs and a black background with white text.

**IF YOU'RE NOT
LEAD-SAFE CERTIFIED,
DISTURBING
JUST SIX
SQUARE FEET
COULD COST YOU
BIG TIME.**

BECOME LEAD-SAFE CERTIFIED NOW.

Any contractor, from plumbers to electricians to painters, who disturbs lead paint while working in a pre-1978 home, school or day care center, now must be Lead-Safe Certified. If you're not, you can face tens of thousands of dollars in fines. Plus, you put the health of yourself, your workers and your customers at risk, which could result in lawsuits.

Visit epa.gov/getleadsafe to learn about the dangers of lead paint poisoning and the precautions you can take against it. You'll also find an EPA-accredited trainer in your area where you can be certified. One class certifies you for five years. It's that easy.

Sign up at epa.gov/getleadsafe
