

# EPA's BEACH Report: Pennsylvania 2010 Swimming Season

May 2011

## Introduction

The BEACH Act of 2000 requires that coastal and Great Lakes states and territories report to EPA on beach monitoring and notification data for their coastal recreation waters.

The BEACH Act defines coastal recreation waters as the Great Lakes and coastal waters (including coastal estuaries) that states, territories, and authorized tribes officially recognize or designate for swimming, bathing, surfing, or similar activities in the water.

This fact sheet summarizes beach monitoring and notification data submitted to EPA by the Commonwealth of Pennsylvania for the 2010 swimming season.

Figure 1. Pennsylvania coastal counties.

Table 1. Breakdown of monitored and unmonitored coastal beaches by county for 2010.

| County        | Total Beaches | Monitored | Not Monitored |
|---------------|---------------|-----------|---------------|
| ERIE          | 13            | 13        | 0             |
| <b>TOTALS</b> | <b>13</b>     | <b>13</b> | <b>0</b>      |

## 2010 Summary Results

### How many notification actions were reported and how long were they?

When water quality standards are exceeded at a particular beach, Pennsylvania issues a beach advisory that warns people to avoid contact with the water. A total of 9 monitored beaches had at least one advisory issued during the 2010 swimming season. All of Pennsylvania's 14 notification actions lasted one day. Figure 2 presents a full breakdown of notification action durations.

### What percentage of days were beaches under a notification action?

For Pennsylvania's 2010 swimming season, actions were reported about 1 percent of the time (Figure 3).

### How do 2010 results compare to previous years?

Table 2 compares 2010 notification action data with monitored beach data from previous years.

### What pollution sources possibly affect investigated monitored beaches?

Figure 4 displays the percentage of Pennsylvania's investigated monitored beaches possibly affected by various pollution sources. In 2010, storm-related runoff was identified as a possible source at all 13 of investigated beaches in 2010.

## For More Information

For general information about beaches:  
[www.epa.gov/beaches/](http://www.epa.gov/beaches/)

For information regarding sample results for all permitted bathing beaches contact the Erie County Department of Health at (814) 451-6700 or on the Web at [www.ecdh.org](http://www.ecdh.org)

Figure 3: Beach days with and without notification actions.

Table 2. Beach notification actions, 2008-2010.

|   | 2008 | 2009 | 2010 |
|---|------|------|------|
| Number of monitored beaches                               | 12   | 13   | 13   |
| Number of beaches affected by notification actions        | 11   | 11   | 9    |
| Percentage of beaches affected by notification actions    | 92%  | 85%  | 69%  |
| Percentage of beach days affected by notification actions | 11%  | 3%   | 1%   |

Figure 4: Percent of investigated monitored beaches affected by possible pollution sources (13 beaches).
