SAMPLE
2010 SOIL FUMIGANT MANAGEMENT PLAN
(DAZOMET PRODUCTS)

FMP Elements:
I. Certified Applicator Supervising the Fumigation
II. General Site Information
III. Owner/Operator of Application Block
IV. Recordkeeping
V. General Application Information
VI. Emergency Response Plan
VII. Communication Between Applicator, Owner/Operator and Other On-site Handlers
VIII. Handler Information
IX. Tarps
X. Soil Conditions
XI. Weather Conditions
XII. Posting Signs – Fumigant Treated Area
XIII. Air Monitoring Plan
XIV. Good Agricultural Practices (GAPs)
The below text fields will expand as the text is entered. After completing each field, use Tab key to go to next text field or check box.

### I. Certified Applicator Supervising the Fumigation

<table>
<thead>
<tr>
<th>Name: Carlos Gomez</th>
<th>Phone number: (800) 986-4521</th>
<th>License and/or certificate number: 23GH4</th>
<th>Commercial applicator</th>
<th>Private applicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employer name: Florida Fumigation Co.</td>
<td>Employer address: 1562 Burke Ave., Troy, FL 29892</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### II. General Site Information

Application block/field location (e.g., county, township-range-section quadrant), address including zip code, or global positioning system (GPS) coordinates: **Fumigating the fairway of Hole 12.**

### III. Owner/Operator of Application Block

| Name: Chip Smith | Address: Smith Golf Course 3249 Fairway Lane, Miami, FL 33193 | Phone number: (800) 852-4521 |

### IV. Recordkeeping

☑ The owner/operator of the application block has been informed that he/she as well as the certified applicator must keep a signed copy of the site-specific FMP and the post-application summary for 2 years from the date of application.

### V. General Application Information

<table>
<thead>
<tr>
<th>Target application date/window: November 2, 2010</th>
<th>EPA Registration Number: 1234-567</th>
<th>Fumigant Product Name: Dazomet Fumigant</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application method: ☑ Incorporated</td>
<td>Application Rate (lbs or gallons of product/treated acre): 300 lbs per acre</td>
<td>Injection Depth (inches): 6</td>
</tr>
<tr>
<td>Application Block Size (acres): 1</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### VI. Emergency Response Plan

Description of evacuation routes (a diagram or drawing may be attached to the FMP): **Everyone should move upwind to the closest intersection.**

☐ Check here if diagram or drawing is attached

Locations of telephones: **Cell phone to be kept with certified applicator.**

Contact information for first responders: Silver Hill Fire Department, 222 Main St. Silver Hill, FL 32982 (800) 555-8877

Local/state/federal contacts: FDACS 3125 Conner Blvd, Tallahassee, FL 32302 (850) 487-0532

Other contact information for emergencies: 911

Emergency procedures/responsibilities in case of an incident, equipment/tarp/seal failure, complaints or elevated air concentration levels suggesting potential problems, or other emergencies: **All handlers must report any problems to the certified applicator supervising the application, who will decide if additional action must be taken.**

### VII. Communication Between Applicator, Owner/Operator, and Other On-site Handlers

☑ Pesticide product labels and material safety data sheets are at the application site and available for employees to review.

Will the certified applicator be at the application site during all handler activities that take place after the application is complete until the entry restricted period expires? ☑ Yes ☐ No

If no, describe how the certified applicator will share the label requirements with owner/operator and/or handlers who will be present at the application site after the application is complete until the entry restricted period expires.

### VIII. Handler Information (use EPA's Microsoft Word or Acrobat Adobe version of the handler information template)

☒ Information for all handlers is attached to the FMP

Comment notes:

### IX. Tarps (check here if section is not applicable ☑)

<table>
<thead>
<tr>
<th>Brand name and tarp manufacturer:</th>
<th>Lot Number:</th>
<th>Batch Number:</th>
<th>Thickness:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Schedule for checking tarps for damage, tears, and other problems:

Maximum time following notification of damage that the person(s) responsible for tarp repair will respond:

Minimum time following damage that tarp will be repaired:

Minimum size of damage that will be repaired:

Other factors used to determine when tarp repair will be conducted:

Equipment/methods used to perforate tarps: ☑ mechanical: ☐ hand:

Schedule and target dates for perforating tarps:

Equipment, schedule and target dates for removing tarps:

### X. Soil Conditions

<table>
<thead>
<tr>
<th>Soil texture/clay content: Clay loam</th>
<th>Organic Content:</th>
<th>≤1%</th>
<th>≥1%-2%</th>
<th>≥2%-3%</th>
<th>&gt;3%</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Soil Temperature: Has the air temperature been above 100°F in any of the 3 days prior to application? Yes or No
If yes, record the soil temperature measurement:

Soil Moisture: (check the box of the method used to determine the soil moisture)

USDA Feel and Appearance Method ☒
Instrument ☐
Other ☐

Description of soil: fine
Percent soil moisture estimate: 50-75%
Instrument used: ☐
Percent soil moisture: ☐
Describe method: ☐

XI. Weather Conditions

Summary of the weather on the day of the application (a printed copy may be attached to the FMP):
☐ Check here if printed copy is attached to the FMP or complete the following:
Wind Speed: 3-5 mph Inversion conditions: no Air-Stagnation Advisories: no Other:

Summary of the weather forecast during the 48-hour period following the fumigant application (a printed copy may be attached to the FMP):
☐ Check here if printed copy is attached to the FMP or complete following:
Wind Speed: 3-5 mph Inversion conditions: no Air-Stagnation Advisories: no Other:

XII. Posting Signs – Fumigant Treated Area

Name(s) of person(s) posting Fumigant Treated Area signs: Carlos Gomez
Treated Area Signs posting date: November 2, 2010 Treated Area Signs removal date: At most 3 days after the entry restricted period, November 10

XIII. Air Monitoring Plan

If monitoring indicates air concentrations greater than or equal to 6000 ppb for methyl isothiocyanate (MITC), handlers must stop work and leave the application block.

If sensory irritation is experienced check which of the following be procedures will be followed:
☒ Intend to cease operations or ☐ Intend to continue operations with respiratory protection

Handler Tasks to be Monitored

<p>| Any handlers that experience sensory irritation will be monitored. |</p>
<table>
<thead>
<tr>
<th>Monitoring Equipment</th>
<th>Timing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Draeger Tube</td>
<td>Every 15 min.</td>
</tr>
</tbody>
</table>

Full Face Respirator Response Plan

If either: (1) a handler experiences any sensory irritation when wearing an full face air-purifying respirator, or (2) a MITC air sample is greater than or equal to 6000 ppb, then all handler activities must cease and handlers must be removed from the application block and the following emergency plan detailed will be implemented:

All handlers will leave the application block if sensory irritation is experienced while wearing full-face respirators. If practical, the equipment will be checked to make sure there are no safety failures, and repaired as necessary. If a spill has occurred, the spill will be monitored, the spill location will be isolated, and the location near the spill will be monitored to ensure people are far away enough. The certified applicator will verify that all GAPs and label instructions are being followed (equipment calibration, weather conditions, soil conditions, sealing). Handlers who resume the application after MITC is less than 6000 ppb will use full-face respirators until air monitoring indicates that concentrations are below trigger levels identified on the label. Handlers that are experiencing symptoms of exposure will get medical attention as needed. Within 1hour, air samples will be collected between the application block and any occupied building located withing 1/4 mile of the field. If any samples exceed 600 ppb or if sensory irritation is experienced, call 911.

XIV. Good Agricultural Practices (GAPs)

☐ Check here if applicable mandatory GAPs are attached to the FMP (this could be a copy of the label highlighting the applicable GAPs). If this box is not checked, the checklist below must be completed.

☐ Weather Conditions
☐ Application Restrictions

Description of other product specific GAPs from label that will be followed: n/a

Before beginning the fumigation, I have verified that this site-specific FMP reflects current site conditions and product label directions.

[Signature] 10/30/10

Signature of certified applicator supervising the fumigation
