<td></td>
</tr>
</tbody>
</table>

II. General Site Information

- Application block location (e.g., county, township–range–section quadrant), address, or global positioning system (GPS) coordinates: 1630 Farm Road, East Hills, MI 47596
- Site map, aerial photo attached to the FMP or detailed sketch provided below that shows (application block location, application block dimensions, buffer zone dimensions, property lines, roadways, rights-of-ways, sidewalks, permanent walking paths, bus stops, nearby application blocks, surrounding structures (occupied and non-occupied), locations of Buffer Zone signs, and locations of difficult to evacuate sites within ¼ mile of the application block if the buffer zone is greater than 300 feet, or 1/8 mile if the buffer zone is 300 feet or less).

Comments:

III. Application Block Owner Information

| Name: Roger Wilson | Address: 314 Andino, East Hills, MI 47596 | Phone number: 364-587-4679 |

IV. Recordkeeping

- The owner of the application block has been informed that he/she as well as the certified applicator must keep a signed copy of the site-specific FMP and the post-application summary for 2 years from the date of application.

V. General Application Information

- Target application date/window: 5/1/13-5/6/13
- EPA Registration Number: 55050-4
- Fumigant Product Name: Paladin

VI. Buffer Zones

| Application method: ☑ Tarp bedded | Application Rate from the buffer zone table on the label, (if the rate used is not in the buffer zone table, round up to the next value): 273 broadcast equivalent pounds/acre | Injection Depth (inches): 8 | Application Block Size from the buffer zone table on the label, (if the block size is not in the buffer zone table, round up to the next value): 40 |

Tarp:
- Brand name and tarp manufacturer: Canslit Shine N'Reipe, Lot Number: 2896, Batch Number: TZ49, Part Number 9341, Thickness: 1.25 mil, Color: black/silver

Buffer zone distance: 230

Are there areas in the buffer zone that are not under the control of the owner of the application block? ☑ Yes ☐ No

If yes, describe the areas and attach the written agreement to the FMP. The buffer zone extends onto land owned by 3 individuals not associated with the application. The home owners have agreed to voluntarily vacate and the grower has agreed to keep his workers out of the buffer zone during the buffer zone period.

VII. Emergency Response Plan

- Description of evacuation routes (a diagram or drawing may be attached to the FMP):
  - Check here if diagram or drawing is attached or if evacuation routes are included in the site map.
- Locations of telephones: Phones are located in the main office which is located 1800 Farm Road, East Hills, MI 47596. In addition, the certified applicator will carry a cell phone at all times.
- Contact information for first responders: East Hills Fire Department 1100 Buckhead Drive, East Hills, MI 47596 364-958-4318
- Local/state/federal contacts: Michigan Department of Agriculture & Rural Development 2500 Langergan Lansing, MI 48909 517-357-7582
- Emergency procedures/responsibilities in case of an incident, sensory irritation is experienced outside of the buffer zone and/or there are equipment/tarp/seal failure, complaints or other emergencies: Call 911 if anyone experiences symptoms of exposure.
conditions pose risks to people (i.e., air stagnation advisories, chemical spills, etc.). For other emergencies, e.g., tarp failure, call the certified applicator who is listed above.

VIII. Communication Between Applicator, Owner, and Other On-site Handlers

☐ Pesticide product labels and material safety data sheets are at the application block and available for employees to review.

Will the certified applicator be at the application site during all handler activities that take place after the application is complete until the entry restricted period expires? ☐ Yes ☒ No

If no, describe how the certified applicator will share the label requirements with the owner and/or handlers who will be present at the application block after the application is complete until the entry restricted period expires. Include the name and phone number of persons contacted as well as the date they were contacted. The certified applicator, George White, called Thomas Mobil (239-874-1597) on 04/28/13. George agreed to pass along the label, FMP and other application records to Thomas prior to leaving the application block. George also indicated that he would call Thomas after the application is complete.

IX. Handler Information (use EPA’s Microsoft Word or PDF version of the handler information template)

☐ Information for all handlers is attached to the FMP
☐ At minimum 2 handlers have the proper respirators and cartridges/canisters
☐ Appropriate respirators and cartridges/canisters are available for each handler that will wear one

Comments/notes:

X. Enclosed Cabs (check here if section is not applicable ☐)

Check boxes below once the information has been verified
☐ Positive pressure is 6 mm H2O Gauge
☐ Minimum air intake flow is 43 m3/hour
☐ Enclosed cab is equipped with activated charcoal filter-media containing no less than 1000 grams of activated charcoal
☐ Ventilation system is maintained according to manufacturer’s instructions

Record the hours of application time for the filter: 10

XI. Tarp Plan (check here if section is not applicable ☐)

Schedule for checking tarp for damage, tears, and other problems: Will actively check during the application and then have handlers check once a day until the entry restricted period expires

Minimum size of damage that will be repaired: ½ foot

Factors used to determine when tarp repair will be conducted: weather conditions, if there is an odor from the product, proximity of occupied houses, potential of tarp causing unintended problems (e.g., blowing onto a road).

Equipment/methods used to perforate tarp: ☒ mechanical: ATV ☐ hand:

Target dates for perforating tarp: 5/13/13-5/18/13

Target dates for removing tarp: Do not plan to remove the tarp until much later. Plants will be put in with the tarp still on the beds.

XII. Soil Conditions

Soil texture: silt loam

Soil Temperature: Has the air temperature been above 100°F in any of the 3 days prior to application? ☐ Yes or ☒ No

If yes, record the soil temperature measurement:

Soil Moisture: (check the box of the method used to determine the soil moisture)

USBDA Feel and Appearance Method ☒

Description of soil: the soil is moist, forms a ball with defined finger marks, very light soil/water staining on fingers, darkened color, will not stick

Percent water capacity estimate: 75%

Instrument ☐

Instrument used:
Percent water capacity:

Other ☐

Describe method:
Percent water capacity:

XIII. Posting Signs – Fumigant Treated Area and Buffer Zone

Name(s) of person(s) posting and removing Fumigant Treated Area and Buffer Zone signs: Andrew Green will both post and remove the fumigant treated area and buffer zone signs.
Location of Buffer Zone signs: See the site map.

| XIV. Emergency Preparedness and Response Measures |  
| (check here if section is not applicable □) |  
| If Emergency Preparedness and Response Measures are triggered, check the option below that will be used: |  
| □ Fumigant site monitoring or □ Response information for neighbors |  
| Response information for neighbors (if applicable) |  
| List when and where it will be conducted: |  
| List residences and businesses informed: Hunter, Sullivan, Moore, Walsh and Simon residences |  
| Name and phone number of person providing the information: Andrew Green, 517-305-0122 |  
| List the method of providing the information: Door hangers |  

| XV. State and/or Tribal Lead Agency Advance Notification |  
| (check here if section is not applicable □) |  
| Date notified: |  
| Person notified: |  

| XVI. Air Monitoring Plan |  
| If garlic-like odor is detected check which of the following be procedures will be followed: |  
| □ Intend to cease operations or □ Intend to continue operations with respirator protection |  
| Handler Tasks to be Monitored | Monitoring Equipment | Timing |  
| Monitor where odor is detected. In addition when respirators are worn will plan to monitor tractor drivers, shoveler, tarp perforators and tarp removers. | NA, plan to remove respirator to determine if odor can still be detected. | After wearing respirators for an hour, handlers will remove respirators to determine if the odor still exists. If the odor is still present, handlers will wait another hour before removing respirators again. |  

| XVII. Good Agricultural Practices (GAPs) |  
| □ Check here if applicable mandatory GAPs are attached to the FMP (this could be a copy of the label highlighting the applicable GAPs). If this box is not checked, the checklist below must be completed. |  

| Redded and Broadcast Shank Applications | Drip Irrigation Applications |  
| ☑ Equipment | ☑ Application Methods and Equipment |  
| ☑ Planting Interval | ☑ Planting Interval |  
| ☑ Tarp | ☑ Tarps |  
| ☑ Weather Conditions | ☑ Weather Conditions |  
| ☑ Soil Preparation | ☑ Soil Preparation |  
| ☑ Soil Temperature | ☑ Soil Temperature |  
| ☑ Soil Moisture | ☑ Soil Moisture |  
| ☑ Application Depth | ☑ Product and Dosage |  
| ☑ Prevention of End Row Spillage | ☑ System Controls and Integrity |  
| ☑ Calibration, Set-up, Repair, and Maintenance for Application Rigs | ☑ Site of Injection and Irrigation System Layout |  
| ☑ Soil Sealing | ☑ System Flush |  
|  | ☑ Soil Sealing |  
|  | ☑ Calibration, Set-up, Repair, and Maintenance for Application Equipment |  

Description of other product specific GAPs from label that will be followed:

Before beginning the fumigation, I have verified that this site-specific FMP reflects current site conditions and product label directions.

Hey Dave,

We are going to be fumigating again this year. Is it alright to use part of your property as part of our buffer zone? The attached sheet has the details. If this sounds OK, can you fill out and sign the bottom and return to me? Let me know if you have any questions. Thanks in advance.

George
Buffer Zone Permission Agreement

From
Applicator Name: George White
Company: Fumigant Applicators
Address: 872 Summer Drive West Falls, MI 48225
Phone: 888-258-6467

Date: April 17, 2013

To
David Henry
346 Cambridge Ct.
East Hills, MI 47596

Dear Mr. Henry:

A soil fumigation is scheduled to occur near your property. This fumigation will require a buffer zone to be established around the application site during the application and for at least 48 hours after the completion of the application. This is to request your permission to allow a buffer zone to extend onto your property. By agreeing to this request, you are:

- Agreeing to voluntarily vacate the buffer zone during the buffer zone period, and
- Agreeing to allow us to post buffer zone signs at likely routes of entry into the application block along the portion of the buffer zone extending onto your property.

Here are the details of the fumigation:

**Buffer Zone Location:** The buffer zone is around a 40 acre field at the northwest side of Wilson's Farm. The buffer zone would extend onto the front half of your property, including your house.

**Time of Buffer Zone Restrictions:** Estimated some time from May 1, 2013-May 8, 2013. We will contact you at least 4 hours before the application begins to let you know when the fumigation and buffer zone restrictions will start.

For your convenience, if you agree, please return the tear-off at the bottom of this letter with your response. Please feel free to contact me with any questions you have regarding the application or this request.

Sincerely,

George White
Certified Applicator

I voluntarily agree to allow this buffer zone to extend onto my property, vacate the buffer zone, and allow buffer zone signs to be posted on my property for following application:

**Buffer Zone Location:** The buffer zone is around a 40 acre field at the northwest side of Wilson’s Farm. The buffer zone would extend onto the front half of your property, including your house.

**Time of Buffer Zone Restrictions:** Estimated some time from May 1, 2013-May 8, 2013.

The above handler has received Fumigant Safe Handling Information within the past 12 months.

*1. Loaders, drivers, tractor co-pilots, shovelers, cross-ditchers, or other direct application participants
2. Cleaning up fumigant spills (does not include emergency personnel not associated with the application)
3. Tasks with liquid contact potential
4. Installing, perforating, removing tarp, repairing or monitoring tarp until:
   - 21 days after the application is complete if tarp is not perforated and not removed for 21 days after application; or
   - 48 hours after tarp perforation is complete if tarp is perforated less than 21 days after the application is complete and tarp will not be removed prior to planting; or
   - tarp removal is completed if tarp are removed less than 21 days after the application is complete.

5. Monitoring fumigant air concentrations
6. Handling or disposing of fumigant containers
7. Cleaning, handling, adjusting, or repairing equipment that may contain fumigant residues
8. Installing, repairing, operating, or removing irrigation equipment in the application block or buffer zone
9. Performing scouting, crop advising, or monitoring tasks in the application block or buffer zone
10. Performing other WPS handling tasks

## Weather Conditions

Summary of the National Weather Service weather forecast (including wind speed and air stagnation advisories, if applicable) during the application and the 48-hours after the application is complete (a printed copy may be attached to the post-application summary):

☐ Check here if printed copy is attached to the post-application summary or complete the following:

National Weather Service weather forecast:

**Application day forecast:** Partly cloudy, low in the mid-50s reaching a high of 70 in the afternoon.

Forecast for day 1 after the application: Mostly cloudy, low in the low-50s until late afternoon when the skies will clear and highs will reach the mid-60s.

Forecast for day 2 after the application: Sunny, highs could reach the low-70s.

**Wind Speed:**

Application Day: Light steady southeasterly winds throughout the day, reaching 5 mph.

Forecast for day 1 and day 2 after the application: Light and variable winds from 3-5 mph.

**Air-Stagnation Advisories:** none

## Tarp Damage and Repair

(☐ check here if section is not applicable)

**Date of tarp damage discovery:** 5/4/13

**Location and size of tarp damage:** SE corner of the field, approximately 6 inch tear in the tarp

**Description of tarp/tarp seal/tarp equipment failure:** At the start of the application, as the tarp was being put down, the tarp ripped

**Date and time tarp repair was completed:** 5/4/13 at 7:15 am

**Additional comments or other deviations from FMP (if applicable):**

## Tarp Perforation/Removal

(☐ check here if section is not applicable)

**Date and time tarp were perforated:** 5/18/13, tarp perforation began at 8 am.

**Date and time tarp were removed:** Tarps remain on the field.

**Were tarp removed early?** ☑️ Yes ☑️ No

If yes, describe the conditions that led to the early tarp removal:

## Complaints

(☐ check here if section is not applicable)

**Person filing complaint:**

☐ On-site handler ☐ Person off-site

If off-site person, name, address, and phone number of person filing complaint:

**Description of control measures or emergency procedures followed after complaint:**

**Additional comments:**

## Description of Incidents

(☐ check here if section is not applicable)

**Description of incident, equipment failure, or other emergency:**

**Date and time:**

**Description of emergency procedures followed:**

**Was the incident reported to the state agency?** ☑️ Yes ☑️ No

**Additional comments:**
| Communication Between Applicator, Owner, and Other On-site Handlers (check if no changes from the FMP) |
| Was the certified applicator at the application block during all handler activities that took place after the application was completed until the entry restricted period expired? □ Yes ☒ No |
| If no, list the names and phone numbers of persons contacted: Thomas Mobil (239-874-1597) |
| Comments/notes (any deviation from FMP regarding how the information was shared): The call on 5/4/13 was to let Thomas know the following information: application start and end time, buffer zone period and entry restricted period. |

| Posting Signs – Fumigant Treated Area and Buffer Zone |
| Date(s) of Fumigant Treated Area sign posting: 5/3/13 | Date(s) of Fumigant Treated Area sign removal: 5/20/13 |
| Date(s) of Buffer Zone sign posting: 5/3/13 | Date(s) of Buffer Zone sign removal: 5/8/13 |
| Description of deviations from FMP (if applicable): |

| Handler Information for Changes Since the FMP |
| Have there been any changes to the handler information since the FMP was completed (including handlers that were on-site that were not listed in FMP)? □ Yes ☒ No |
| If yes, the updated handler information must be attached to the post application summary (use EPA's Microsoft Word or PDF version of the handler information template) |

| Other Deviations from the FMP |
| Additional comments/notes: On the morning of 5/3/13 George White contacted David Henry, Patrick Vito and Edward Houston to let them know that the application would occur the following morning at 7 am. |

I have verified that this post application summary reflects the actual site conditions that occurred during the fumigation and is an accurate description of deviations from the FMP (if applicable).
