2010 SOIL FUMIGANT MANAGEMENT PLAN
(METAM SODIUM/METAM POTASSIUM PRODUCTS)

FMP Elements:
I. Certified Applicator Supervising the Fumigation
II. General Site Information
III. Owner/Operator of Application Block
IV. Recordkeeping
V. General Application Information
VI. Emergency Response Plan
VII. Communication Between Applicator, Owner/Operator and Other On-site Handlers
VIII. Handler Information
IX. Tarps
X. Soil Conditions
XI. Weather Conditions
XII. Posting Signs – Fumigant Treated Area
XIII. Air Monitoring Plan
XIV. Good Agricultural Practices (GAPs)
2010 SOIL FUMIGANT MANAGEMENT PLAN (METAM SODIUM/METAM POTASSIUM PRODUCTS)
The below text fields will expand as the text is entered. After completing each field, use Tab key to go to next text field or check box.

I. Certified Applicator Supervising the Fumigation

<table>
<thead>
<tr>
<th>Name: Peter Hall</th>
<th>Phone number: 610-986-4521</th>
<th>License and/or certificate number: 23GH4</th>
<th>□ Commercial applicator</th>
<th>□ Private applicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employer name: US Application Co.</td>
<td>Employer address: 745 Hilltop Circle Las Cruces, NM 44309</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

II. General Site Information

Application block/field location (e.g., county, township-range-section quadrant), address including zip code, or global positioning system (GPS) coordinates: **100 Acre field at the north-west corner of state road 34 and state road 23**

III. Owner/operator of Application Block

| Name: Dale Smith | Address: 5647 State Road 34 Las Cruces, NM 44309 | Phone number: 659-852-4521 |

IV. Recordkeeping

☒ The owner/operator of the application block has been informed that he/she as well as the certified applicator must keep a signed copy of the site-specific FMP and the post-application summary for 2 years from the date of application.

V. General Application Information

<table>
<thead>
<tr>
<th>Target application date/window: October 27-31, 2010</th>
<th>EPA Registration Number: 2746-45</th>
<th>Fumigant Product Name: Metam ABC</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application method: ☒ Center Pivot</td>
<td>Application Rate (lbs or gallons of product/treated acre): 60 gallon of product/A</td>
<td>Injection Depth (inches): NA</td>
</tr>
<tr>
<td>☐ Solid Set Sprinkler</td>
<td>☐ Drench</td>
<td>☐ Drip</td>
</tr>
<tr>
<td>☐ Flood Basin, Furrow and Border</td>

<td></td>
</tr>
</tbody>
</table>

VI. Emergency Response Plan

Description of evacuation routes (a diagram or drawing may be attached to the FMP): **Everyone should move upwind to the closest intersection.**

□ Check here if diagram or drawing is attached

Locations of telephones: **Cell phone to be kept with certified applicator**

Contact information for first responders: 911

Local/state/federal contacts: WI State Department of Agriculture: 879-526-1254

Other contact information for emergencies:  

Emergency procedures/responsibilities in case of an incident, equipment/tarp/seal failure, complaints or elevated air concentration levels suggesting potential problems, or other emergencies: **All handlers must report any problems to the certified applicator in charge of the application who will decide if additional action must be taken.**

VII. Communication Between Applicator, Owner/Operator, and Other On-site Handlers

☒ Pesticide product labels and material safety data sheets are at the application site and available for employees to review.

Will the certified applicator be at the application site during all handler activities that take place from the beginning of the application until the entry restricted period expires? ☒ Yes □ No

If no, describe how the certified applicator will share the label requirements with owner/operator and/or handlers who will be present at the application site after the application is complete until the entry restricted period expires.

VIII. Handler Information (use EPA’s Microsoft Word or Acrobat Adobe version of the handler information template)

☒ Information for all handlers is attached to the FMP

Comments/notes:

IX. Tarps (check here if section is not applicable ☒)

<table>
<thead>
<tr>
<th>Brand name and tarp manufacturer:</th>
<th>Lot Number:</th>
<th>Batch Number:</th>
<th>Thickness:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Schedule for checking tarps for damage, tears, and other problems:</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Maximum time following notification of damage that the person(s) responsible for tarp repair will respond:

Minimum time following damage that tarp will be repaired: Minimum size of damage that will be repaired:

Other factors used to determine when tarp repair will be conducted:

Equipment/methods used to perforate tarps: ☐ mechanical: ☐ hand:
Schedule and target dates for perforating tarps:

Equipment, schedule and target dates for removing tarps:

X. Soil Conditions

Soil texture/clay content: clay loam
Organic Content: ☐ < 1% ☐ ≥1%-2% ☐ ≥2%-3% ☐ >3%

Soil Temperature: Has the air temperature been above 100 °F in any of the 3 days prior to application? ☐ Yes or ☐ No
If yes, record the soil temperature measurement:

Soil Moisture: (check the box of the method used to determine the soil moisture)

USDA Feel and Appearance Method ☒ Instrument ☐ Other ☐
Description of soil: fine Instrument used:
Percent soil moisture estimate: 60-75% Percent soil moisture:

XI. Weather Conditions

Summary of the weather on the day of the application (a printed copy may be attached to the FMP):
☐ Check here if printed copy is attached to the FMP or complete the following:
Wind Speed: Inversion conditions: Air-Stagnation Advisories: Other:

Summary of the weather during the 48-hour period following the fumigant application (a printed copy may be attached to the FMP):
☐ Check here if printed copy is attached to the FMP or complete following:
Wind Speed: Inversion conditions: Air-Stagnation Advisories: Other:

XII. Posting Signs – Fumigant Treated Area

Name(s) of person(s) posting Fumigant Treated Area signs: Peter Hall
Treated Area Signs posting date: 10/26-10/30 depending on the start date Treated Area Signs removal date: at most 3 days after the entry restricted period 11/2-11/8

XIII. Air Monitoring Plan

If monitoring indicates air concentrations greater than or equal to 6000 ppb for methyl isothiocyanate (MITC), handlers must stop work and leave the application block.

If sensory irritation is experienced check which of the following be procedures will be followed:
☐ Intend to cease operations or ☐ Intend to continue operations with respiratory protection

Handler Tasks to be Monitored Monitoring Equipment Timing
Any handlers that experience sensory irritation will be monitored Draeger Tube Every 15 min

Full Face Respirator Response Plan
If either: (1) a handler experiences any sensory irritation when wearing an full face air-purifying respirator, or (2) a MITC air sample is greater than or equal to 6000 ppb, then all handler activities must cease and handlers must be removed from the application block and the following emergency plan detailed will be implemented:

All handlers will leave the application block if sensory irritation is experienced while wearing a full-face respirator.

If practical, the equipment will be checked to make sure there are no safety failures, and repaired as necessary.

If a spill has occurred, the spill will be monitored, the spill location will be isolated, and the location near the spill will be monitored to ensure people are far enough away.

The certified applicator will re-verify that all GAPs and label instructions are being followed (equipment calibration, weather conditions, soil conditions, sealing)

Handlers who resume the application after MITC is < 6000 ppb will use full-face respirators until air monitoring indicates that concentrations below trigger levels identified on the label.

Handlers that are experiencing symptoms of exposure will get medical attention as needed.

Within 1 hour, air samples will be collected between the application block and any occupied building located within 1/4 of mile of the field. If any samples exceed 600 ppb or if sensory irritation is experienced, call 911.

XIV. Good Agricultural Practices (GAPs)

☐ Check here if applicable mandatory GAPs are attached to the FMP (this could be a copy of the label highlighting the applicable GAPs). If this box is not checked, the checklist below must be completed.

Shank
☐ Wind Speed
☐ Weather Conditions
☐ Soil Conditions, Injection Depth, and Soil Sealing

☐ The above handler has received Fumigant Safe Handling information within the past 12 months.

---

1. Loaders, drivers, tractor co-pilots, shovellers, cross-ditchers, or other direct application participants  
2. Cleaning up fumigant spills (does not include emergency personnel not associated with the application)  
3. Tasks with liquid contact potential  
4. Installing, perforating, removing, repairing, or monitoring tarps until:  
-14 days after the application is complete if tarps are not perforated and removed during those 14 days,  
-Tarp removal is complete if tarps are both perforated and removed less than 14 days after the application, or  
-48 hours after tarp perforation is complete if tarps will not be removed within 14 days after application.  
5. Taking air samples (breathing zone)  
6. Handling or disposing of fumigant containers  
7. Cleaning, handling, adjusting, or repairing equipment that may contain fumigant residues  
8. Installing, repairing, operating, or removing irrigation equipment in the application block  
9. Performing scouting, crop advising, or monitoring tasks in the application block  
10. Performing other WPS handling tasks
