RISK MANAGEMENT PROGRAM GUIDANCE FOR WAREHOUSES (40 CFR PART 68)
This document provides guidance to help owners and operators of stationary sources to
determine if their processes are subject to chemical accident prevention regulation under section
112(r) of the Clean Air Act and 40 CFR part 68 and to comply with regulations. This document
does not substitute for EPA’s regulations, nor is it a regulation itself. Thus, it cannot impose
legally binding requirements on EPA, states, or the regulated community, and may not apply to a
particular situation based upon circumstances. The guidance does not represent final agency
action, and EPA may change it in the future, as appropriate.
FOR UPDATES

To keep up-to-date on changes to this document and to the risk management program rule, and to find other information related to part 68 and accident prevention, visit EPA’s Office of Emergency Management website at:

TABLE OF POTENTIALLY REGULATED ENTITIES

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated under 40 CFR part 68. This table lists the types of entities that EPA is now aware could potentially be regulated by this rule and covered by this document. Other types of entities not listed in this table could also be affected. To determine whether your facility is covered by the risk management program rules in part 68, you should carefully examine the applicability criteria discussed in Chapter 1 of this guidance and in 40 CFR 68.10, which is available in Appendix A of this document. If you have questions regarding the applicability of this rule to a particular entity, call the EPCRA/CAA Hotline at (800) 424-9346 (TDD: (800) 553-7672)(see Appendix C, Technical Assistance, for other sources of information).
