Subject PCS - 404 Permit; Gregory Summary

At the meeting in Aurora on 4/17/09, we distributed a summary of Dr. Gregory's findings. Dr. Gregory has informed me that in his haste to get his summary to us in time for our 4/17/09 meeting, he failed to catch an error in that summary (i.e., several references to swamp white oaks): the three indicator species used by NHP for NRWHF include swamp chestnut oak, not swamp white oak. His field observations and findings were based on application of the correct criteria, and his conclusions and opinions are therefore unaffected. His final report should be available later this week.

I do not have the e-mail addresses for the attendees, so if you receive this, please forward it as appropriate.

Bill Cary, Counsel to PCS Phosphate
