

Manufacturer: Berry Plastics Corporation
Model: FTCR19500
ASTM Type: III E (3)

Description:

This is a two-piece plastic compact package with a snap closure. The snap closure has a captive hinge. There are two sizes of this snap closure (Figure 1).

Figure 1

The FTCR 19500 snap closure has a lift and peel induction liner over the orifice for tamper evidence (Figure 2A). There is a plastic bottom plug (left in Figure 2B) that permanently snaps into the bottom of the closure to form a compact package for dry products, e.g., tablets (see the interior of the bottom of closure on the left in Figure 2B). The FTCR19500 closure is opened by squeezing two arrows (or dots) 180° apart on the back and front of the closure skirt (Figure 1), which causes the top part of the closure to flip open (Figures 2A and B).

Figure 2A

Figure 2B

In the closed position the top part of the closure has a small tab (upper aqua arrow in Figure 3) that locks into a lip above the arrow on the bottom part of the closure at the front (see aqua arrow on the bottom part of the closure in Figure 3).

Figure 3

The manufacturer's instructions on one package are (Figure 4):

SQUEEZE ARROWS

SQUEEZE ARROWS
