MEMORANDUM

To: Jim McNamara, Unit Coordinator
Land Disposal Unit

From: Shanna Alexander, Assessment Analyst
Risk Assessment Unit

Through: Shannon Lund, Unit Coordinator
Risk Assessment Unit

Subject: **Review of the Draft Human Health Baseline Risk Assessment (HHBRA) for the Estuary, Operable Unit 1 Marsh Trespasser, Fish and Shellfish Consumer, Clapper Rail Consumer dated July 2010 for the LCP Chemicals site, Brunswick, Glynn County, Georgia**

A review of the above-referenced document (electronic redline draft markup) and revised supplemental risk assessment tables has been completed. Additionally, I have reviewed all responses to prior Agencies' comments. Based on my review, the responsible party has satisfactorily addressed all outstanding deficiencies per EPA's comment letter dated May 17, 2011 and has adhered to all agreements met at our June 8, 2011 meeting. I find the suggested editorial adjustments and revised tables to be acceptable for use at the site. Once all redline changes have been made, I anticipate we will receive an approvable OU1 HHBRA.

If you have any questions or comments regarding this review, please feel free to call me at 7-7460.
