

Manufacturer: Philips Rx Packaging LLC  
Model: Rx Squeeze Vial  
ASTM Type: Type III E(3)

Description:

This is a one-piece plastic vial and snap closure attached with a captive hinge. There is a child-resistant (CR) (Figure 1 right) and nonchild-resistant (NCR) version (Figure 1 left) of this package. The CR package is opened by simultaneously squeezing two specific points on the plastic vial, which causes the snap closure to flip open. The squeeze points are located at the top of the vial and are 180° apart. Each squeeze point is designated by a set of 7 vertical ridges. (See area highlighted in black on the right side in Figure 1). The NCR version of the snap closure is opened by lifting the closure up.

Figure 1

The manufacturer's instructions on the CR snap closure and vial (see package on the right side in Figure 2) are:

**SQUEEZE**  
(a horizontal double-headed arrow)

The manufacturer's instructions on the NCR version of the snap closure and vial (see package on the left side in Figure 2) are:

CAUTION  
NOT CHILD RESISTANT
