

Pesticide Registration Service Fees

Accomplishments

Pesticide Worker Protection

Under FIFRA Section 33(c)(3)(B), EPA is authorized to use 1/17 of the amount of the Pesticide Registration Fund (but not less than \$1 million) to enhance current scientific and regulatory activities related to worker protection and \$500,000 in each fiscal year, 2008 through 2012, for funding of the Pesticide Safety Education Program (PSEP).

The Agency worked closely with worker safety stakeholders through the Agency's Federal Advisory Committee, the Pesticide Program Dialogue Committee (PPDC), to determine which activities to enhance with PRIA funds. Based on the advice of the PPDC, the Agency decided to develop enhancements within the following focus areas: Prevention - Safety Training, Response - Poisoning Recognition, Sound Decision Data, and Inform - Risk Management. [Table 1](#) lists the activities funded and their accomplishments in FY 2011. New cooperative agreements were established in FY 2011 with the National Association of State Departments of Agriculture and with the public health departments in Louisiana, Florida, and North Carolina.
