

How Do I View a List of Facilities?

Introduction

The EIS Gateway provides the functionality for you to view a list of facility sites and their details. You may view a full list of facility sites or select one site and view the detailed information for that site. This section describes the process for viewing a full list of facility sites or for viewing the detailed information for a single facility site.

From within the EIS Gateway, you will see on the left side of the page a heading entitled Facility Inventory. Under this heading, select the option View and Edit Data.

What each user will see when they select the View and Edit Data option depends on their user type. For certain EPA users, they will be able to view facility sites for all agencies. EPA Regional office users will only be able to generate a list of facility sites for agencies in their region. Finally, State, Local and Tribal users, they will only be able to generate a list of facility sites for their agency.

Detailed instructions for most EPA users begin on page 3.

Detailed instructions for EPA Regional Office users begin on page 8.

Detailed instructions for State Agency users begin on page 12.

Detailed instructions for Tribal and Local Agency users begin on page 15.
