Dear Property Owner:

**RE: NOTIFICATION OF RELEASE FROM AN UNDERGROUND STORAGE TANK**

Site  
Site Address  
City, County, Alabama  
Facility I.D. No.  
UST Incident No.

A release of petroleum products from an underground storage tank (UST) system at the above referenced location has been identified and reported to the Alabama Department of Environmental Management. The Alabama Department of Environmental Management is notifying adjacent property owners of the existence of a release in the area of their home or business.

The UST regulations require that the extent of contaminant movement in the soil and groundwater be evaluated to determine potential impacts. Investigations will be conducted in the area to assess possible risks to human health or the environment from the release. Please notify the Department if you are aware of any petroleum odors, surfacing product in soils or sheens in surface waters that may be the result of this release.

You may be contacted by an environmental consultant hired by the UST tank owner to seek permission to install soil borings or monitoring wells on your property. Access to your property may be needed to conduct soil and groundwater sampling in order to properly define the extent of contamination and determine if your property has been impacted. Your cooperation will be greatly appreciated.

The results of the soil and groundwater investigation on your property can be provided to you by the tank owner and/or their consultant.

Should there be any questions regarding this release or if you would like more information, please call me at (334) ----- . The Department will be glad to answer any questions you may have about the release.

Sincerely,

Hydrogeologist
