

US Magnesium Preliminary Investigation Areas

Path: I:\Kazoo\GIS Library\US MAG\Phase1A_SAP_082013\US Mag PHASE 1A SAP Figure_10-34_082013.mxd

- Study area divided into 18 preliminary remedial investigation (PRI) areas.
- PRIs grouped into two operable units that are intended to organize EPA site-management and decision-making:
 - OU-1 Soil/Sediment/Water, primarily USM waste management areas; and
 - OU-2 Air, within the study area.
- Two additional potential operable units may be designated after remedial investigation is completed, if appropriate.
 - OU-3 Surrounding locale, beyond USM plant area and waste management areas that include private, federal and state lands; and
 - OU-4 Surface and/or groundwater.
