

RE-Powering Screened Sites: Large-Scale Wind Energy Potential

This map is for informational purposes only. The U.S. Environmental Protection Agency's (EPA) RE-Powering America's Land Initiative developed this map using site information, screening criteria and GIS data provided by EPA and the National Renewable Energy Laboratory. Wind resource estimates developed by AWS Truepower, LLC and licensed by NREL. Sites were screened for Puerto Rico/Virgin Islands; however, no published mapping data was available. State agencies in California, Hawai'i, Illinois, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Texas, Virginia, and West Virginia provided additional information for sites in their respective states. Supplemental site-specific technical and economic analysis is required to determine the renewable energy development potential for specific sites. For further information, please see the associated document entitled, "Data Documentation for Mapping & Screening Criteria" at www.epa.gov/renewableenergyland or contact cleanenergy@epa.gov.
