BACKGROUND INFORMATION

The Explo Site consists of 132 acres on Camp Minden, owned by the Louisiana National Guard. Camp Minden was formerly the Louisiana Army Ammunition Plant. In January 2005, DOD transferred the property to the Louisiana National Guard. Explo Systems, Inc., under contract with the DOD, conducted recycling of explosive powders and/or explosives from military munitions (cartridges for Howitzers) for commercial use starting in November 2006.

On October 15, 2012, the explosion of a magazine at Explo Systems, Camp Minden, LA, prompted attention from the EPA, and the Louisiana State Police (LSP). On November 27, 2012, the LSP served a warrant to Explo and identified 6-9 million pounds of unsecured M6 Propellant. From November 28, 2012 through January 7, 2013, the town of Doyline, LA (approximately 400 homes) was evacuated during operational hours. A total of 98 magazines at Camp Minden are filled to capacity with approximately 18 million lbs. of M6 Propellant and other explosives.

In addition to the M6 Propellant, there are other hazardous materials onsite including Red or Pink Water which is a waste generated by the operations at Explo and contains trinitrotoluene (TNT) and potentially cyclotrimethylenetrinitramine (RDX). There is also black powder, Composition H6, ammonium picrate, M30 propellant, nitrocellulose, Clean Burning Incendiary (CBI), and Tritonal which is aluminum powder contaminated with TNT which is explosive from previous bomb demilitarization process.
