

## Appendix E. Assessing Unique Chemical Classes

The New Chemicals Program web site has information on assessing problematic chemical classes. Readers are referred to "Guidance Materials for PMN Submitters" at <http://www.epa.gov/oppt/newchemicals/pubs/guideman.htm> for information on dealing with the following chemical classes:

- Nanomaterials
- Polymers
- Chemical Substances Containing Varying Carbon Chain Lengths (Alkyl Ranges Using the C<sub>x</sub>-y Notation)
- Complex Reaction Products
- Mixtures
- Chemicals of Unknown or Variable Composition

*Intentionally Left Blank*
