**US EPA / EC JOINT PROJECT  
ON THE EVALUATION OF  
(QUANTITATIVE) STRUCTURE ACTIVITY RELATIONSHIPS**

**July 1993**

**Final Report**

## US EPA / EC JOINT PROJECT ON THE EVALUATION OF (QUANTITATIVE) STRUCTURE ACTIVITY RELATIONSHIPS

### Contents

<b>1.</b>	<b><u>Background</u></b>	<b>3</b>
<b>2.</b>	<b><u>Project Design</u></b>	<b>5</b>
2.1.	Competent Bodies	5
2.2.	Confidentiality	5
2.3.	How the project was organized	6
<b>3.</b>	<b><u>Notifications schemes in the EC and in the US</u></b>	<b>7</b>
3.1.	Essential features of the notification scheme for new chemical substances in the European Community	7
3.2.	Essential features of the notification scheme for new chemical substances in the United States	9
<b>4.</b>	<b><u>Results</u></b>	<b>13</b>
4.1.	Introduction	13
4.1.1.	Evaluation criteria	13
4.1.2.	Complicating factors	13
4.2.	Detailed analysis of results	15
4.2.1.	Physico-chemical and environmental fate parameters	15
4.2.1.1.	Boiling point	15
4.2.1.2.	Vapour pressure	16
4.2.1.3.	Water solubility	17
4.2.1.4.	Partition coefficient	18
4.2.1.5.	Biodegradation	20
4.2.1.6.	Hydrolysis	21
4.2.1.7.	Soil sorption	21
4.2.1.8.	Photodegradation	21
4.2.2.	Ecotoxicity parameters	22
4.2.2.1.	Toxicity to aquatic organisms	22
4.2.2.2.	Classification "Dangerous for the Environment"	24
4.2.3.	Toxicological properties/health effects	27
4.2.3.1.	Absorption	27
4.2.3.2.	Acute toxicity	28
4.2.3.3.	Irritation	31
4.2.3.3.i	Skin irritation	31
4.2.3.3.ii	Eye irritation	33
4.2.3.3.iii	Respiratory irritation	36

4.2.3.4.	Sensitisation	36
4.2.3.5.	Repeated dose toxicity	39
4.2.3.6.	Mutagenicity	42
4.2.3.7.	Other effects	43
<b>5.</b>	<b><u>Overall conclusions</u></b>	<b>45</b>
5.1	Conclusions: US perspective	45
5.1.1.	Introduction/Overview	45
5.1.2.	Results	45
5.1.2.1.	Physico-chemical properties	46
5.1.2.2.	Biodegradability	47
5.1.2.3.	Health effects	48
5.1.2.4.	Ecotoxicity	50
5.1.2.5.	Other considerations	51
5.1.3.	Summary	52
5.2.	Conclusions: EC perspective	53
5.2.1.	Introduction	53
5.2.2.	Synopsis	53
5.2.2.1.	Physico-chemical end-points	53
5.2.2.2.	Biodegradation	53
5.2.2.3.	Health effects	53
5.2.2.4.	Ecotoxicity	54
5.2.3.	Overview	54
ANNEX 1:	US EPA and EC experts within this joint project	
ANNEX 2:	Companies which gave permission to use their substances data within this project	
ANNEX 3:	Generic chemical descriptions of the chemicals in this project	
ANNEX 4:	Boiling point: comparison of test results and predictions	
ANNEX 5:	Vapour pressure: comparison of test results and predictions	
ANNEX 6:	Water solubility: comparison of test results and predictions	
ANNEX 7:	Partition coefficient: comparison of test results and predictions	
ANNEX 8:	Biodegradation: comparison of test results and predictions	
ANNEX 9:	Toxicity to fish: comparison of test results and predictions	
ANNEX 10:	Toxicity to Daphnia: comparison of test results and predictions	
ANNEX 11:	Toxicity to algae: comparison of test results and predictions	
ANNEX 12:	Acute oral toxicity: comparison of test results and predictions	
ANNEX 13:	Skin and eye irritation: comparison of test results and predictions	
ANNEX 14:	Systemic toxicity: comparison of test results and predictions	
ANNEX 15:	Mutagenicity: comparison of test results and predictions	
APPENDIX 1:	Directive 67/548/EEC, sixth amendment	
APPENDIX 2:	EC summary notification dossier	
APPENDIX 3:	Annex VI to Directive 67/548/EEC	
APPENDIX 4:	Toxic Substances Control Act: premanufacture notification
