5.9. Stage 5: Implement Remedial/Mitigation Measures

Exhibit 12: Stage 5: Implement Remedial/Mitigation Measures

STAGE 5: Implement Remedial/Mitigation Measures

1. Commence with the remediation of onsite contaminants and mitigation of offsite sources of pollutants

2. Conduct sampling to verify cleanup goals have been met and mitigation measures of offsite sources of pollutants have been successful

3. Document successful implementation of the plan and final sampling results, and compile into a report

4. Post the report for public comment

5. Submit the report to the state or tribe for review

6. Revise the preliminary long-term stewardship plan (developed in Stage 4, Step 1)

7. Post the final long-term stewardship plan for public comment

8. Send long-term stewardship plan to state and tribal authorities for approval

Do remedial actions and mitigation measures fully address environmental hazards so that no long-term stewardship is needed to prevent school occupants' exposure?

NO

YES

Environmental review process for site is complete

Do state or tribal authorities approve the final long-term stewardship plans?

NO

REVISE THE LONG-TERM STEWARDSHIP PLAN

YES

Go to STAGE 6:
Long-term Stewardship
