## The Clean Watersheds Needs

**Survey** (CWNS) is a comprehensive assessment of needs<sup>1</sup> to meet the water quality and water-related public health goals of the Clean Water Act (CWA). States and the U.S. Environmental Protection Agency (EPA) conduct the CWNS every four years under CWA Section 516 (b). Maine documented needs totaling \$2.4 billion in 2008. This is a 96 percent increase from the \$1.2 billion in needs documented in 2004.

### Documented Needs in Maine

<b>Total Needs</b>	<b>\$1,212</b>	<b>\$2,375</b>	<b>96%</b>

<sup>a</sup>Not reported; <sup>b</sup>Actual needs may be higher, since documenting these needs is difficult; <sup>c</sup>In 2004, Other Estuary Management Needs were reported under Separate State Estimates (SSEs); <sup>d</sup>Not included in Official Needs in the Report to Congress.

<sup>1</sup> Documented needs in the CWNS include the unfunded capital costs of projects as of January 1, 2008 that address a water quality or a water quality-related public health problem existing as of January 1, 2008, or expected to occur within the next 20 years; and meet the seven CWNS documentation criteria. All needs are in January 2008 dollars.

## Clean Watersheds Needs Survey 2008

### Wastewater Treatment Facilities

The enactment of the Clean Water Act (CWA) in 1972 resulted in dramatic improvements in the:

- Number of wastewater treatment plants.
- Percentage of the population served by wastewater treatment plants.
- Quality of effluent treatment from wastewater treatment facilities.

In 2008, 46% of Maine residents received centralized wastewater treatment services at the secondary, advanced, or no discharge treatment level, compared to 23% in 1972.

<sup>a</sup>Number of facilities and population served if all needs documented in the CWNS 2008 are met.

### Small Communities

In Maine, small community wastewater facilities serve 27% of the population and comprise 43% of total wastewater treatment and collection needs. EPA small community support information is available at:
