Subject: cost and benefit of Cape Wind

Dear Mr. McCahill,

As a life-long Cape Codder, I was glad to see that NStar isn't going to buy power from Cape Wind, but will buy from cheaper wind sources in Massachusetts.

I'm opposed to Cape Wind from an environmental, cost/benefit and navigational safety viewpoint, and wish it would go away.

And all wind farms should be required to guarantee the state that they will remove their apparatus when it cannot produce competitively priced power. Otherwise it will be up to our kids to pay taxes to remove those pylons.

Sincerely,

Joe McGinity
