

Acquisition Forecast Database

*Internet User Guide
to Locate Procurement Opportunities at EPA*

Welcome to EPA's Acquisition Forecast Database

This database is part of EPA's initiative to enhance our electronic communication with the business community and to provide "real time" information about procurement opportunities and allow companies to spend more time bidding and less time searching for opportunities.

The information in the database is based on the best information available at the time of posting and is intended for PLANNING PURPOSES ONLY and does not constitute a commitment by EPA to buy the described supplies or services.

Internet Address

The Forecast Database is free and available to anyone interested in doing business with EPA and is located at: <http://www.epa.gov/oam> and click on "EPA's Acquisition Forecast Database"

Navigating

To navigate in the database use the "twisties" shown below:

Procurement Data

The following is a list of the data available in each of the individual records in the Forecast Database.

Procurement Title: Title of the Project or Procurement.

Description of the Acquisition: The supply or service the agency will be buying.

Procurement Office: EPA's Procurement Division or Region issuing the procurement.

End User by AAship or Region: The end user's main EPA Program Office or Region(s) the procurement supports.

End User by Program Office, Division or Laboratory: The name of the Program Office that the procurement will directly support.

NAICS Code: The North American Industry Classification System (NAICS) Code that sets the small business size standard to the procurement. For more information on NAICS Codes, visit the Internet at: <http://www.sba.gov/size>

NAICS Code Title: The Title of the NAICS Code.

NAICS Code Size Standard: The NAICS Code size standard that sets the small business standard for the procurement.

Contract Type: The type of contract anticipated to be awarded.

Procurement Method: The anticipated method for conducting the procurement. Please note that market research will determine the actual method of procurement, so this can change during the procurement process.

Estimated Dollar Range: The estimated value of the contract for its entire period of performance including options, if applicable.

Place of Performance: For on-site contracts, this is the location where the contract work will be performed. If no specified place of performance is listed, the work may be performed at the "Contractor's Facility."

Solicitation Issue Date: The estimated date when the solicitation will be issued.

Target Award Date: The estimated target award date.

EPA Contact: The contracting person responsible for the procurement action.

Other Procurement Information: This information is critical to increase competition. Check here for Conflict of Interest or Limitation of Future Contracting information.

Status: Check here for the current status of the procurement action.

Award Information: Upon award, the Contractor and the Award date will be added.

Attachments or Internet Link: The attachments may include, if it is a follow-on requirement, the current contract number and the former or current SOW, or the Internet link for the SOW.

Updated Records in the Forecast Database

The Forecast Database will reflect the “real time” status of each procurement opportunity and be dated to reflect the latest revision. We encourage frequent visits to check the status of procurement opportunities and find new procurement opportunities added throughout the year.

We are striving to keep the data on EPA procurement opportunities current, accurate, and complete to increase competition through improved communication with the Contractor community.
