100% Green Power Users (as of July 6, 2015)

The 100% Green Power Users list represents the Partners that are using green power to meet 100 percent of their U.S. organization-wide electricity use. The combined green power use of these organizations amounts to more than 14 billion kilowatt-hours of green power annually, which is equivalent to the electricity use of more than 1.3 million average American households each year.

</table>

*Reflects the amount of green power as a percentage of total electricity use. Partners choosing to purchase green power in an amount exceeding 100 percent of their U.S. organization–wide electricity use are listed as such.

°Indicates Provider is selling Partner a third-party certified green power product. For more information on third-party certification, visit [http://www.epa.gov/greenpower/buygp/certified.htm](http://www.epa.gov/greenpower/buygp/certified.htm).
