

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION 4
ATLANTA FEDERAL CENTER
61 FORSYTH STREET
ATLANTA, GEORGIA 30303-8960

JUN 14 2010

The Honorable Charlie Crist
Governor, State of Florida
The Capitol
Tallahassee, Florida 32399-0001

Dear Governor Crist:

Thank you for your recommendations on air quality designations for the revised National Ambient Air Quality Standards (NAAQS) for lead throughout the State of Florida. Reducing levels of lead pollution is an important part of the U.S. Environmental Protection Agency's (EPA's) commitment to a clean, healthy environment. Lead exposure can cause a range of adverse health effects, most notably in children. Exposures to low levels of lead early in life have been linked to effects on IQ, learning, memory and behavior. This letter is to notify you of EPA's response to Florida's designation recommendations, and to inform you of our approach for completing the designations for the revised lead NAAQS.

On October 15, 2008, EPA substantially strengthened the NAAQS for lead. The new standards, set at 0.15 micrograms per cubic meter, are 10 times tighter than the previous standards. In conjunction with strengthening the lead NAAQS, EPA also established new criteria for siting ambient lead monitors. The pre-existing ambient lead monitoring network was inadequate for determining whether many areas are meeting the revised lead NAAQS, because it may not have covered all areas. Monitors meeting the new network siting requirements were to begin operation on January 1, 2010.

The Clean Air Act (CAA) requires EPA to complete the initial designation process within two years of promulgating a new or revised NAAQS. If the Administrator has insufficient information to make these designations, EPA has the authority to extend the designation process by up to one year. In light of the new monitoring network which will generate additional information in the upcoming year, EPA intends to complete the lead designations in two rounds. In the first round, to be completed by October 15, 2010, EPA is designating as "nonattainment" any area that is violating the 2008 lead NAAQS based on data from the pre-2010 monitoring network. For all other areas, EPA is extending the deadline for designations by up to one year so that data from the newly deployed monitors can be considered in making appropriate designation decisions. EPA will complete the second round of lead designations no later than October 15, 2011.

Consistent with the CAA, and after carefully considering Florida's October 15, 2009, and May 4, 2010, recommendation letters and all the associated technical information for the 2008 lead NAAQS, including the most recent air quality data from 2007-2009, EPA is proposing to

modify Florida's designation for the Tampa area from "unclassifiable" to "nonattainment." In addition, EPA is modifying Florida's recommended boundary for Hillsborough County of a 5 kilometer (km) boundary to a 1.5 km radius surrounding the EnviroFocus Technologies facility. The enclosed draft Technical Support Document provides a detailed analysis that supports our preliminary decisions.

If your state has additional information that you want EPA to consider with respect to a designation recommendation EPA proposes to modify, please submit it to us by August 16, 2010. We are also making EPA's preliminary designation decisions and supporting documentation available to the general public for review. We are accepting public comments on our preliminary decisions through August 16, 2010. We will review any information we receive from the State of Florida and the general public by this date, and we plan to promulgate the first round of final designations by October 15, 2010.

For all other areas in Florida, EPA is deferring the designations decisions for up to one additional year so that additional lead air quality data can be collected. If you would like to submit updated recommendations for those areas for our consideration in the second round of designations, we request that you do so by December 15, 2010. For the second round of designations, we will notify states and tribes of our preliminary responses to their recommendations by no later than June 17, 2011.

We look forward to a continued dialogue with you and your staff as we work together to implement the 2008 lead NAAQS. Should you have any questions, please do not hesitate to contact me at (404) 562-8357, or have your staff contact Kenneth R. Lapierre, Acting Director, Air, Pesticides and Toxics Management Division, at 404-562-9077.

Sincerely,

A. Stanley Meiburg
Acting Regional Administrator

Enclosure
