

Blazing Star Wind Farm

Lincoln County, Minnesota

About Geronimo Energy

ESTABLISHED & CAPABLE PARTNER

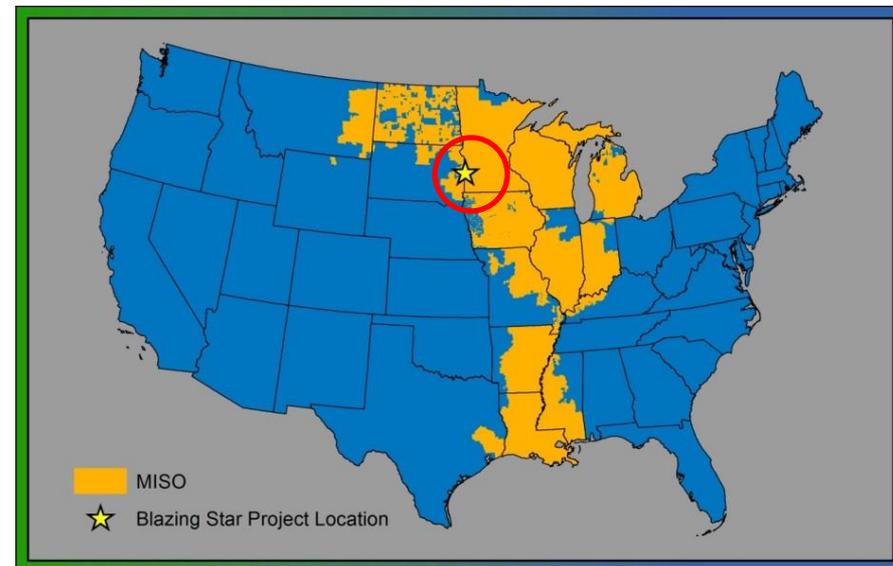

- Based in Minneapolis, MN
- 1,500+ Megawatts (>\$2.5 billion of capital costs) of wind and solar projects in operation or under construction throughout U.S. (with additional 2,000+ development portfolio)
- Internally staffed with 40 real estate, transmission, meteorology, resource assessment, permitting, finance, environmental, policy/ regulations, sales, and marketing professionals
- Executed 140 Megawatt (MW) Wind Energy Power Purchase Agreement (PPA) with U.S. General Service Administration in Sept 2014
- Farmer-Friendly development approach - respect and appreciation for hardworking farmers, their communities, and the rural American way of life.

UNIQUE, CREATIVE, AND COLLABORATIVE

- Wind and Solar PPAs require customization and flexibility to be successful
- Geronimo is an independent developer with the capability to be nimble, flexible, and fast
- We work with our customers through each step of the process to best structure our PPAs to meet our customers renewable energy goals, whatever they may be

PROJECT OVERVIEW

- **PROJECT SIZE:** 200 Megawatts
- **PROJECT OUTPUT:** 800,000 MWh per year
- **LOCATION:** Southwest Minnesota
- **ONLINE DATE:** Q4 2018
- **AVERAGE WIND SPEED:** 18 MPH @ 250ft
- **NET CAPACITY FACTOR:** 45-50%
- **PROJECT STATUS:** Ready for Construction Start in 2017, Operation in 2018
- **AVAILABILITY:**
 - Virtual PPAs starting at 100,000 MWh/yr
 - Energy and RECs available
 - Ownership options available

ENVIRONMENTAL & LOCAL ECONOMIC BENEFITS

LOCAL ECONOMIC IMPACTS:

- Population of Lincoln County, MN = 6,000
- Job creation: 200 construction, 12-15 full-time
- \$24 million landowner payments
- \$17 million local tax revenue
- \$10 million local spending
- \$800,000 in charitable giving

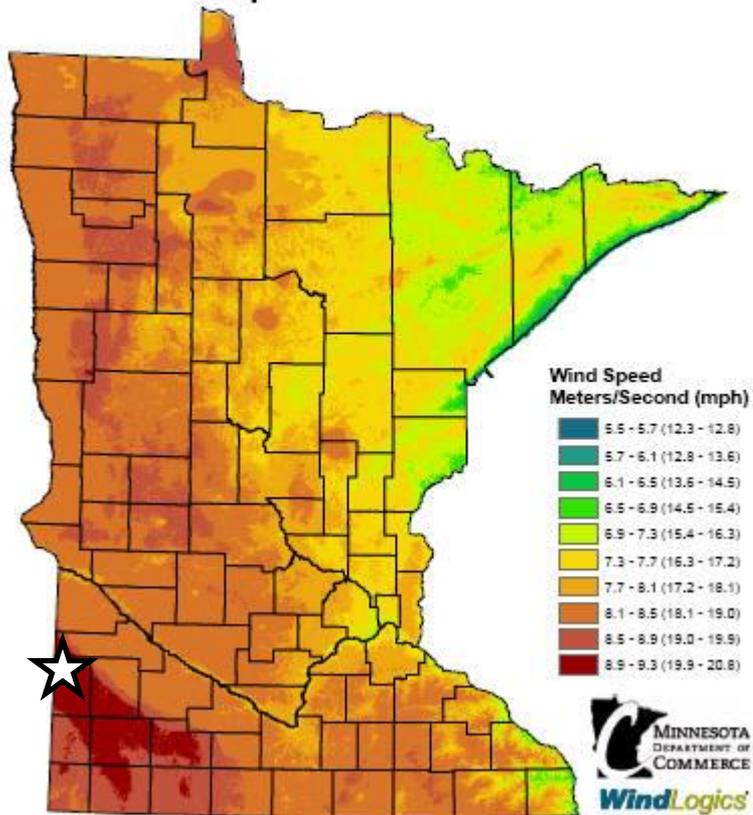

ENVIRONMENTAL BENEFITS:

- Annual
 - 500,000+ metric tons CO₂ offset
 - 395,000+ gallons of water saved
- 25 year Project Life
 - 12,500,000+ metric tons CO₂ offset
 - 9,875,000+ gallons of water saved

ENVIRONMENTAL FUN FACTS

- The Blazing Star Wind Farm over its lifetime will offset more than 25 billion lbs of CO₂, which is heavier than:
 - The Great Pyramid of Giza
 - ½ The human population of the USA
 - 250 Titanics (ship)
 - 30 Empire State buildings
 - 100,000 full railcars of a coal
 - Would stretch over 1,000 miles
 - 82 million Shaqs
 - Or 150m Stephen Currys

**Minnesota's Wind Resource by
Wind Speed at 100 Meters**

MARKET & CONTRACT

- **LOCATED IN MISO**
 - Nearest Hub is Minnesota Hub (Minn Hub)
 - Project will interconnect directly to the Brookings County-Lyon County 345kV MVP line via a new project substation
- **CONTRACT OPTIONS AVAILABLE:**
 - Sizing between 100,000 – 800,000 MWh/year
 - Term of 12 to 25 years
 - Financial or physical delivery
 - Delivery at Minn Hub available
 - Energy Only or Energy + RECs
 - Ownership options available
 - Naming rights available
