

Primary/Secondary  
New and Amended Product Applications Associated with New Use Requests, Submitted at the Same  
Time – Fees and Agency Tracking Codes

**FY 2016/17 Fees**

PRIA Category		Fee (\$)		Fee for each additional new product application submitted with new use request in addition to either (a) or (b) (Examples provided below)	
		Primary application <sup>1</sup>		Secondary application <sup>2</sup>	
Description <sup>3</sup>	Code	(a) New use(s) added only to registered labels, no other amendments <sup>4</sup>	(b) New use - only one new end use product application, no other amendments	Tracking Code <sup>5</sup>	Fee (\$) for each additional new product
<b>Registration Division</b>					
Additional food use; Indoor; food/food handling	R140	44,672	44,672	R140.1	Fee depends on which new product category is applicable: includes but not limited to R310, R315 or R320
Additional food use	R170	66,124	66,124	R170.1	
Additional food uses covered within a crop group resulting from the conversion of existing approved crop group(s) to one or more revised crop group	R175	66,124	66,124	R175.1	
Additional food use; reduced risk	R180	66,124	66,124	R180.1

<sup>1</sup> The PRIA 3 fee tables contain several footnotes that explain the scope of various fee categories and what actions are included in an application package for those categories. Primary applications may contain multiple actions as explained by the footnotes.

<sup>2</sup> EPA will treat applications for related actions as secondary applications when they are submitted in the same package as the primary application. EPA will assign a tracking code to alert reviewers to the relationship between the applications, but the fee category will depend upon the action requested in the secondary application.

<sup>3</sup> Unless otherwise specified, the fee is per new use, and the fee is to be multiplied by the number of new uses requested up to 5 new uses. The number of uses is tracked in the Agency's tracking system using a decimal to reflect the number of uses requested, i.e. one new use – R170; three new uses – R170.3, etc.

<sup>4</sup> In the Agency's tracking system, one amendment will be listed with the PRIA category, and the other associated amendments will be tracked as .0's to indicate no fee associated with the amendment, i.e. R170 and R170.0.

<sup>5</sup> These are internal EPA tracking codes only.

Examples –

1. A single conventional non-food outdoor new use is requested. The application package requests a label amendment to a registered technical product and to four registered end-use products.

Description of Action	Fee (\$)	Internal EPA Tracking Code
Amendment to add a non-food outdoor new use to technical label	26,427	R230
Amendment to add a new use to each existing end-use product label (4 decisions)		R230.0
Total Fee	26,427	

2. A single conventional new food use is requested. The package consists of a tolerance petition, a label amendment to a registered technical product and one new end-use product registration application (containing the new use) with product chemistry and acute toxicity data.

Description of Action	Fee (\$)	Internal EPA Tracking Code
Amendment to add single new food use to technical label	66,124	R170
Tolerance petition associated with new use		R170.0
New Product Application		R170.0
Total Fee	66,124	

3. A new non-food indoor antimicrobial use is requested. The package consists of label amendments to an existing technical and one existing end-use product label and one new end-use product registration application (with product chemistry and acute toxicity data). The proposed new end-use product best matches the description of the A540 PRIA category.

Description of Action	Fee (\$)	Internal EPA Tracking Code
Amendment to add single new use to technical label	12,764	A500
Amendment to add new use to existing end-use product label		A500.0
New Product Application	5,107	A500.1
Total Fee	17,871	

4. Three conventional new food uses are requested. The package consists of a tolerance petition, label amendments to an existing registered technical product and two existing end-use products, and one new end-use product registration application (containing the new uses) with product chemistry and acute toxicity data. The proposed new end-use product represents a new physical form of the active ingredient and best matches the description of the R320 PRIA category.

Description of Action	Fee (\$)	Internal EPA Tracking Code
Amendment to add 3 new food uses to existing technical label	198,372	R170.3
Tolerance petitions associated with new uses		R170.0
Amendment to add 3 new uses to each existing end use product label (2 decisions)		R170.0
New Product Application	13,226	R170.1
Total Fee	211,598
