EPA Library Collection Development and Management Procedures

EPA Classification No.: CIO 2170-P-08.1  CIO Approval Date: 12/28/2016
CIO Transmittal No.: 17-005c  Review Date: 12/28/2019

Issued by the EPA Chief Information Officer,
Pursuant to Delegation 1-19, dated 07/07/2005

EPA LIBRARY COLLECTION DEVELOPMENT AND MANAGEMENT PROCEDURES

1. PURPOSE
   To establish Agency-wide procedures for the EPA National Library Network libraries to identify and procure information resources necessary to support the mission of the Agency.

2. SCOPE AND APPLICABILITY
   The procedures apply to the EPA National Library Network and all EPA organizations that provide library services either onsite or through a Memorandum of Understanding (MOU) with another Network library. They provide baseline operational standards for all Network libraries. Individual libraries may develop local procedures to supplement the Network procedures.

3. AUDIENCE
   The audience for the procedures includes Assistant, Deputy Assistant and Associate Administrators; Regional, Deputy, and Assistant Regional Administrators; Senior Information Officials, Information Management Officers, Federal Library Managers, Contract Library Managers and EPA staff.

4. BACKGROUND
   Collection development encompasses the acquisition, assessment and deselection of materials and resources to meet users’ needs. As part of a geographically distributed network, EPA libraries’ local-level collecting decisions impact and strengthen the combined collections of the EPA National Library Network. These combined collections reflect the range of EPA activities and staff subject specialties, including basic and applied sciences, environmental law and regulations, policy and planning, administration, management and information technology. Formats include, but are not limited to, EPA documents, other government documents, books and monographs, journals, audio-visual items and electronic resources. The combined Network collections are cataloged in OCLC and are searchable in the EPA National Library Catalog, the online catalog of EPA library holdings and part of the Online Library System (OLS).

   In addition to OLS, the EPA National Library Network utilizes other collaborative collection management resources. In 1999, the Network launched an Intranet site, the EPA Desktop Library, for consolidating electronic journal subscriptions and making them available to an Agency-wide audience. In 2006, the Network established three repository libraries, each with a distinct collecting focus, to retain a print collection of all official EPA documents. At that time, the Network also began developing strategies for digitizing EPA publications held by EPA libraries and making them
accessible in the Agency’s digital repository, the National Service Center for Environmental Publications (NSCEP).

While all EPA libraries have certain information resources in common, there are significant variations in individual library collections based on user needs, subject expertise of the local EPA staff, geographical area, etc. In addition, EPA libraries vary in scope; e.g., some regional EPA staff include law collections supporting the Office of Regional Counsel, and some do not. Though less formalized than the repository library collecting focuses, Network libraries periodically assess and update their areas of specialization (See the Intranet page, “EPA Libraries: Areas of Specialization,” in the Related Documents section). Network libraries seek to avoid unnecessary duplication in their collection development decisions, and these procedures offer guidance and include network-level considerations.

5. AUTHORITY

6. PROCEDURES
6.1 Acquisition of Library Materials
6.1.1 General Selection Guidelines
6.1.1.1 The types of materials that EPA libraries collect include, but are not limited to the following:
   6.1.1.1.1 Government documents and reports.
   6.1.1.1.2 Books and monographs.
   6.1.1.1.3 General reference resources, such as encyclopedias, dictionaries and almanacs.
   6.1.1.1.4 Serials, including annuals, journals, newsletters and monographic series.
   6.1.1.1.5 Conference proceedings.
   6.1.1.1.6 Atlases and maps.
   6.1.1.1.7 Audiovisual materials.
   6.1.1.1.8 Posters.

6.1.1.2 The formats of materials that EPA libraries collect include, but are not limited to the following:
   6.1.1.2.1 Print materials.
   6.1.1.2.2 CD-ROMs, DVDs and other electronic and multimedia formats.
   6.1.1.2.3 Microforms.

6.1.1.3 EPA libraries use the following criteria when selecting materials for the collection:
   6.1.1.3.1 Basic or definitive treatment of subject matter.
6.1.1.3.2 Importance of subject matter to the collection.
6.1.1.3.3 Scarcity of material on a subject.
6.1.1.3.4 Relation to existing collection.
6.1.1.3.5 Clarity and accuracy of presentation.
6.1.1.3.6 Degree of accomplishment of purpose.
6.1.1.3.7 Author/editor reputation and significance to field.
6.1.1.3.8 Reputation and standing of the publisher.
6.1.1.3.9 Currency of the material.
6.1.1.3.10 Price, as related to allocated budget.
6.1.1.3.11 Format, as related to access, permanence, cost considerations and needs of library patrons. Particular attention is given to format when collecting electronic and multimedia materials as these formats are rapidly changing.
6.1.1.3.12 Proportion and balance with regard to subjective coverage of environmental issues, in both a single publication and within the larger library collection.

6.1.1.4 EPA libraries use, but are not limited to, the following sources for identifying and selecting materials for their collections:

6.1.1.4.1 Publishers’ catalogs.
   6.1.1.4.1.1 Books may be accepted from publishers for preview, provided the preview is free and the library is under no obligation to purchase the book.

6.1.1.4.2 Sample issues of journals.
6.1.1.4.3 Review of current journals.
6.1.1.4.4 Responses to reference or research requests.
6.1.1.4.5 An analysis of interlibrary loan (ILL) transactions to identify items or topics that have generated multiple requests.
6.1.1.4.6 An analysis of the regular collection inventory that identifies missing, damaged or out-of-date materials that need to be replaced or updated.
6.1.1.4.7 Recommendations/requests from library staff and EPA staff.
6.1.1.4.8 Subject bibliographies, including the Network’s Core List for an Environmental Reference Collection.
6.1.1.4.9 Outside reviews from reputable sources such as Choice, Library Journal and Resources for College Libraries, and newspapers of record, such as the New York Times.

6.1.2 Coverage Considerations in the EPA National Library Network

6.1.2.1 EPA Documents (excluding classified EPA documents)
  6.1.2.1.1 As a Network-wide strategy, EPA repository libraries have the primary responsibility for collecting official EPA documents in their designated subject areas.
    6.1.2.1.1.1 Research Triangle Park (RTP) Library, Research Triangle Park, NC:
      6.1.2.1.1.1.1 Air documents.
      6.1.2.1.1.1.2 Health effects materials.
6.1.2.1.1.2 Andrew W. Breidenbach Environmental Research Center (AWBERC)
Library, Cincinnati, OH:
6.1.2.1.1.2.1 Water documents.
6.1.2.1.1.2.2 Risk assessment materials.
6.1.2.1.1.3 Headquarters Repository Library, Washington, DC:
6.1.2.1.1.3.1 Hazardous waste materials, including OLEM Directives and
Records of Decision.
6.1.2.1.1.3.2 EPA management documents.
6.1.2.1.1.3.3 EPA historical material.
6.1.2.1.1.3.4 Non-EPA publications dealing with regional/local environmental
issues deemed important to EPA staff.
6.1.2.1.2 EPA libraries work together to ensure that for each EPA document currently
residing in one or more Network library and deemed to be a candidate for
digitization, there will be a digital copy available via NSCEP, a print copy in
the dark archive, and a print copy retained in perpetuity among the repository
libraries.
6.1.2.1.3 Individual Network libraries collect EPA documents relevant to the needs of
their local users. EPA documents not needed onsite by a particular library
are digitized and sent to a repository library or dispersed according to the
EPA Library Materials Dispersal Procedures.
6.1.2.1.4 Libraries may obtain free print EPA documents from the NSCEP website,
from Project Officers, or from the National Center for Environmental
Research (NCER).
6.1.2.1.5 Libraries may acquire EPA documents in electronic format.
6.1.2.2 Serials and Electronic Resources
6.1.2.2.1 The EPA Desktop Library provides access to electronic resources, including
serials, deemed important to an Agency-wide audience. As new resources
are considered for inclusion in the EPA Desktop Library, feedback is solicited
from the Network.
6.1.2.2.2 EPA libraries carefully consider the selection of journal titles for individual
library subscriptions, including factors such as the number of Network
libraries that own a particular title, journal usage statistics and format
considerations. Every effort is made to avoid cancelling any useful titles that
are uniquely owned. See the “Journal Holdings” section of the Library
Network Intranet site for current title information.
6.1.2.3 Core List Titles
6.1.2.3.1 Each EPA library collects those titles identified as a part of the essential core
collection denoted by an asterisk in the Core List for an Environmental
Reference Collection.
6.1.2.3.2 EPA libraries work together to ensure that Core List titles outside the
essential core collection are represented in at least one Network library
collection. EPA libraries’ self-designated “Areas of Specialization” on the
Library Network Intranet site provides guidance for determining which subject
areas are collected in a particular library.
6.1.2.4 Other Library Materials
   6.1.2.4.1 EPA Libraries collect other materials and resources if they fall within the
   scope of the collection, are relevant to the Agency’s mission, and meet the
   needs of local users.
   6.1.2.4.2 As appropriate, repository libraries collect and retain regional materials in
   collaboration with Network libraries (i.e., if physical space considerations
   prevent regional libraries from collecting and/or retaining these materials).

6.1.3 Procurement of Library Materials
   6.1.3.1 Collaborative purchasing of EPA Desktop Library resources is coordinated among
   the Office of Environmental Information (OEI), the Office of Research and
   Development (ORD), the Office of Administration and Resource Management
   (OARM) and other offices managing and/or funding EPA Desktop Library
   resources.
   6.1.3.1.1 The Network promotes additional coordination of electronic resource
   subscriptions and their network-wide availability through the EPA Desktop
   Library.
   6.1.3.1.2 The Network explores the potential for coordinating the acquisition of
   materials via collaborative purchases and resource sharing with other
   Federal agencies.
   6.1.3.2 EPA libraries acquire materials quickly, efficiently and at the least expense, within
   the bounds of their respective Statements of Work and budgetary limitations.
   6.1.3.3 EPA libraries follow all applicable procurement regulations for purchasing
   materials.
   6.1.3.3.1 Libraries generally purchase trade and commercial publications from a
   vendor, but may also make direct purchases from a publisher, local
   bookstore, or online bookseller.
   6.1.3.3.2 Libraries generally purchase legal publications on a sole source basis from
   the publisher.
   6.1.3.3.3 Libraries generally order journals and serials through a subscription agent,
   but may also make direct purchases from a publisher.
   6.1.3.3.4 Libraries may establish accounts with book and journal vendors through
   FEDLINK.
   6.1.3.3.5 Libraries may set up deposit accounts with other government agencies.
   6.1.3.3.5.1 Government documents, including individual titles and periodicals, may
   be ordered through a deposit account with the Government Publishing
   Office (GPO).

6.1.4 Donations of Materials to Libraries
   6.1.4.1 EPA libraries establish local practices and procedures for accepting and
   processing donations of books, documents or other library materials.
   6.1.4.2 Libraries receive donations from a variety of sources:
   6.1.4.2.1 EPA staff.
   6.1.4.2.2 Other EPA libraries.
| 6.1.4.2.3 | EPA offices. |
| 6.1.4.2.4 | Other federal agencies. |
| 6.1.4.2.5 | Other libraries. |

### 6.1.4.3
In addition to general selection criteria above, libraries also consider the following when selecting donations to be added to the collection:

- **6.1.4.3.1** Information provided by the donor as to the significance of the work.
- **6.1.4.3.2** Currency and condition of the material.

### 6.1.4.4
Libraries reserve the right to refuse to add a donation or gift to the collection and to dispose of any such item following established dispersal procedures if the donor does not want the item(s) returned.

### 6.1.4.5
Libraries do not accept photocopies of books due to copyright concerns.

### 6.1.5 Other Free Materials

- **6.1.5.1** EPA libraries may seek other free materials to enrich the collection, including:
  - **6.1.5.1.1** Government Accountability Office (GAO) and other federal government reports that are deemed relevant to the Agency’s mission.
  - **6.1.5.1.2** Review copies from publishers.
  - **6.1.5.1.3** Speeches, manuscripts and other materials from authors.

- **6.1.5.2** Libraries may establish a collaborative exchange with other organizations to provide EPA documents in exchange for organizational documents relevant to the Agency’s mission.

### 6.1.6 “Born-digital” EPA Documents and other Online Resources

- **6.1.6.1** Staff in each Network library, in the regular course of their work, endeavor to identify “born digital” EPA documents, bring them to the attention of the NSCEP manager if not already represented in NSCEP, and catalog them in OCLC for inclusion in the EPA National Library Catalog.

- **6.1.6.2** Staff in each Network library may also identify newly-published online resources that fall within their collecting scope but are produced by other federal agencies, think tanks, universities and other organizations. As appropriate, these documents are cataloged in OCLC for inclusion in the EPA National Library Catalog and managed locally.

- **6.1.6.2.1** Libraries systematically check and correct any broken links in the records of their online-only resources. If an updated link does not exist, libraries have the following options:
  - **6.1.6.2.1.1** Remove the holding record from the OCLC record.
  - **6.1.6.2.1.2** If the library has archived a digital copy of the resource (e.g., on a CD) and the document does not have copyright restrictions, the library may choose to print and prepare a copy for the physical collection, making necessary changes in format information in OCLC.

### 6.2 Library Collection Management

- **6.2.1 Cataloging EPA Materials and Maintenance of Data for the Online Library System (OLS)**
  - **6.2.1.1** Network libraries catalog all materials in their collections unless restricted by
licensing agreements or other special considerations (e.g., Agency “X” documents). Bibliographic records are entered in OCLC as outlined in the EPA Library Cataloging Procedures.

6.2.1.2 The OLS database administrator has the primary responsibility for loading bibliographic records from OCLC to OLS.

6.2.2 Digitization of EPA Materials

6.2.2.1 All hard-copy official EPA documents are digitized and made available through the NSCEP website as outlined in the Digitization Processes for EPA Libraries Procedures.

6.2.2.2 “Born digital” EPA documents are included in NSCEP.

6.2.3 Weeding Criteria and Schedules

6.2.3.1 Network libraries refer to the EPA Library Materials Dispersal Procedures for guidance on selecting materials to retain or to weed from the collection. Weeding is performed by Network libraries on a systematic, periodic basis to maintain healthy collections.

6.2.3.2 Weeding criteria to take into account include:

6.2.3.2.1 Condition
Materials in fragile or deteriorating condition are evaluated for possible repair, stabilization or duplication. Items deemed unusable because of their material condition are weeded.

6.2.3.2.2 Content
Materials are weeded on the basis of their relevance, reliability, currency and appeal. Materials superseded by newer, better works on the same topic are considered for weeding, dependent in part on the library’s ability to acquire newer resources in their place. Outdated materials are weeded even if there are no other materials on the given topic in the collection. Special care is given to reviewing works having to do with medical, scientific, legal and technical topics. Materials which are either trivial or not pertinent to the collection or to patron needs are considered for weeding.

6.2.3.2.3 Circulation and usage
Materials which are used infrequently are considered for weeding, though care is given to retain rare or historically important materials.

6.2.4 Collection Dispersal

6.2.4.1 Libraries that are dispersing materials from their collections offer them to repository libraries and other Network libraries following guidance outlined in the Materials Dispersal List Procedures and Guidance on the Library Network Intranet site.

6.2.4.2 Items not requested by another Network library are managed by the owner library strictly according to the remaining steps in the EPA Library Materials Dispersal Procedures.

6.3 Reporting and Statistics

6.3.1 EPA Desktop Library statistics collection, coordination and dissemination is managed by contractors at Headquarters with technical direction from OEI.

6.3.2 Individual libraries maintain and report statistics on acquisitions and collection
8. ROLES AND RESPONSIBILITIES
A. The Chief Information Officer (CIO) for the Agency has the overall responsibility for the governance and coordination of the EPA National Library Network, including establishing policy and supporting procedures, standards, and guidance to ensure the effective oversight of the EPA National Library Network.

B. Assistant Administrators and Regional Administrators with EPA National Library Network libraries are responsible for the management of their individual libraries, ensure compliance with Agency-wide policies, procedures, standards and guidance relating to the Library Network and ensure
their individual libraries provide efficient and cost-effective access to information and data necessary to carry out EPA's mission.

C. The National Library Program Manager has the day-to-day responsibility to provide assistance and guidance to offices in the operation of the EPA National Library Network and to ensure that the individual libraries provide efficient and cost-effective access to information and data necessary to carry out EPA's mission. The National Library Program Manager resides in the Office of Environmental Information.

D. Federal Library Managers have first-line responsibility for operation of physical Network libraries and provision of library services and to ensure that their individual libraries provide efficient and cost-effective access to information and data necessary to carry out EPA’s mission.

9. DEFINITIONS

Access: The ability of members of the public to obtain information from a government agency. All public libraries and most academic libraries in the United States are open to the general public, but access to certain areas such as closed stacks, rare books and special collections may be restricted. In a more general sense, the right or opportunity to use a resource that may not be openly and freely available to everyone. In computing, the privilege of using a computer system or online resource, usually controlled by the issuance of access codes to authorized users or, more broadly, the ability of a user to reach data stored on a computer or computer system.

Acquisitions: The process of selecting, ordering and receiving materials for a library or collections by purchase, exchange or gift. The process may include budgeting and negotiating with outside agencies, such as publishers, dealers and vendors, to obtain resources to meet the needs of the institution's clientele in the most economical and expeditious manner.

Bibliographic Record: An entry in a database that describes the attributes of a work, including its physical properties, its subject(s), its location in the physical collection and/or links to the online version. Also known as Catalog Record.

Born Digital: A document that was created and exists only in digital format.

Catalog: A comprehensive inventory of the books, periodicals, maps and other materials in a given library collection, arranged in systematic order to facilitate retrieval (usually alphabetically by author, title, and/or subject). In most modern libraries, the card catalog has been converted to machine-readable bibliographic records and is available online. The catalog for the EPA National Library Network is the EPA National Library Catalog.

Cataloging: The process of creating entries for a catalog. In libraries, this usually includes bibliographic description, subject analysis, assignment of classification notation and activities involved in physically preparing the item for the shelf, tasks usually performed under the supervision of a librarian trained as a cataloger.
Collaborative Purchasing: In the context of the EPA National Library Network, the purchasing of certain resources through a single subscription or licensing agreement to be used by patrons across the entire Agency or a portion thereof. The aim of collaborative purchasing is to reduce the annual subscription price of electronic information resources that might be otherwise duplicated through multiple institutional subscriptions. The cost of collaborative purchases may be shared among the participating libraries. Also applies to joining other Federal agencies in purchasing resources.

Collection Management: The activity of planning and supervising the growth and preservation of a library’s collections based on an assessment of existing strengths and weaknesses and an estimate of future needs.

Core Collection: A collection representative of the basic information needs of a library’s primary user group.

Dark Archive: For the EPA National Library Network, a collection of second-copies of EPA publications that are not circulated or used by patrons, but are retained to ensure perpetual access to the materials in case of loss or damage.

Database: A large, regularly updated file of digitized information (bibliographic records, abstracts, full-text documents, directory entries, images, statistics, etc.) related to a specific subject or field, consisting of records of uniform format organized for ease and speed of search and retrieval and managed with the aid of database management system (DBMS) software. Content is usually created by the database producer. In the case of commercial databases, the content may be leased to one or more database vendors (Dialog, EBSCO, OCLC, etc.) that provide electronic access to the data after it has been converted to machine-readable form, usually online via the Internet, using proprietary search software. Most databases used in libraries are catalogs, periodical indexes, abstracting services and full-text reference resources leased annually under licensing agreements that limit access to registered borrowers and library staff.

Deposit Account: A vendor prepayment account into which the customer deposits a sum of money, against which orders are subsequently charged. When the balance in the account reaches a predetermined level, an additional amount must be deposited for fulfillment to continue.

Deselection: The process of identifying print titles for weeding, subscriptions for cancellation and/or electronic resources for removal from an Internet or Intranet site. Deselection often occurs in response to space constraints, subscription price increases and budgetary constraints, but as part of regular collection maintenance it should also reflect resource currency and usage.

Digitization: The conversion of hard copy documents, printed text or images into digital form through the use of scanning technologies.

Dispersal: The transfer of library materials to other libraries. Materials may be dispersed to other EPA libraries or to external libraries, such as those of other federal agencies, state governments or universities. Dispersal may occur as part of a library’s normal weeding schedule or as part of a larger
effort to reduce the physical size of the library collection.

**Donation:** One or more books or other items given to a library, by an individual or group. Most donations are unsolicited and may arrive unexpectedly.

**EPA Desktop Library:** A collection of electronic resources, including freely available and subscription-based services, available to all EPA staff via the Intranet. The EPA Desktop Library is funded by the Working Capital Fund and managed by the Office of Environmental Information in partnership with the Office of Administration and Resources Management, Research Triangle Park, with contributions from other program offices.

**EPA Document/Publication:** An official EPA publication in any format, that has or should be assigned a special alpha-numeric identifier known as an EPA publication number.

**EPA National Library Catalog:** The online catalog for the EPA National Library Network, which provides bibliographical records for the items residing in EPA libraries and links to documents on environmental topics on the Internet. The Catalog allows searches by author, title, subject heading, any standard numbers that are assigned to the work, classification number and keywords present in the record.

**EPA National Library Network:** A national network composed of EPA libraries and repositories located in the Agency's Headquarters, Regional and Field Offices, Research Centers and specialized laboratories, as well as Web-based access to electronic collections. Network libraries are defined as those libraries with an official membership presence in OCLC. Centralized Network coordination comes from the Agency's Office of Environmental Information. Individual EPA libraries are administered by a range of offices in conjunction with contract staff.

**FEDLINK:** See Federal Library and Information Network.

**Federal Library and Information Network (FEDLINK):** A purchasing, training and resource-sharing consortium for federal libraries and information centers based at the Library of Congress. Participation in FEDLINK requires an interagency agreement with the Library of Congress.

**Government Documents:** Publications of the U.S. federal government, including transcripts of hearings and the text of bills, resolutions, statutes, reports, charters, treaties, periodicals (example: *Monthly Labor Review*), statistics (U.S. Census), etc. The category also includes publications of other governmental bodies (state, local, territorial or foreign).

**ILL:** See Interlibrary Loan.

**Interlibrary Loan (ILL):** The process by which a library requests materials from, or supplies materials to, another library. This service is provided upon request of a library user for materials not available in the local library.
Materials: Items within the library collection that may include books, journals, reports, miscellaneous publications, microform, multimedia and other physical objects. Generally, library materials do not include official records, but convenience copies of records may be included.

Memorandum of Understanding (MOU): A memorandum signed by more than one agency or organization that promises cooperation or coordination on a specific issue, project or agenda.

Microform: A generic term for a highly reduced photographic copy of text and/or images stored on a translucent medium (microfiche or microfilm) or on an opaque medium such as card stock (microopaque or aperture card). Microforms can be original editions or reproductions. Reader-printer machines are required to view and make hard copies. Digital storage media such as magnetic tape and disk, CD-ROM, etc., are superseding microforms in information storage and retrieval to some extent.

Monograph: A book or treatise on a single subject, complete in one physical piece, usually written by a specialist in the field. For the purpose of cataloging and collection development, a monograph is any publication complete in one volume or intended to be completed in a finite number of parts issued at regular or irregular intervals, containing a single work or collection of works.

MOU: See Memorandum of Understanding.

National Service Center for Environmental Publications (NSCEP): Based in Cincinnati, NSCEP maintains and distributes EPA publications in hardcopy, CD-ROM and other multi-media formats. The NSCEP website also serves as a repository for and online gateway to free, electronic copies of EPA publications.

NSCEP: See National Service Center for Environmental Publications.

OCLC: OCLC is a nonprofit, membership-based, computer library service and research organization dedicated to the public purposes of furthering access to the world’s information and reducing information costs. OCLC maintains the largest catalog and interlibrary loan network in the world, which assists librarians and the general public with locating, acquiring, cataloging, lending, borrowing and preserving library materials.

OLS: See Online Library System.
Online Library System (OLS): The previous name for the EPA National Library Catalog. This term currently refers to the computer system used by EPA libraries for circulation, cataloging, serials and dispersals.

Patrons: Anyone authorized to use the materials and services of the library. May include EPA staff, contractors and/or the public.

Periodical: A serial publication with its own distinctive title, containing works written by more than one contributor, issued more than once, generally at regularly-stated intervals of less than a year, without prior decision as to when the final issue will appear. Although each issue is complete in itself, its relationship to preceding issues is usually indicated by an issue and/or volume number. Content is usually controlled by an editor or editorial board. The category includes subscription-based materials including magazines, journals and newsletters, but not proceedings or the other regular publications of corporate bodies as they relate primarily to meetings. Newspapers are not formally classified as periodicals.

Physical Collection: The materials, whether books, maps, microforms, scrolls, CD-ROMs, DVDs or any other items that physically reside in a library or its storage space and are managed by one or more mechanisms of bibliographic control.

Publication: For purposes of this document, when used alone, “publication” is an all-encompassing term that refers to a work capable of being read or perceived and may include monographs, journals or documents, regardless of source or format.

Reference: Services provided by library staff to meet the information needs of patrons (in person, by telephone, by mail or electronically), including but not limited to: answering questions; instructing users in the selection and use of appropriate tools and techniques for finding information; conducting searches on behalf of the patron; directing users to the location of library resources; assisting in the evaluation of information; and, when appropriate, referring patrons to resources outside the library.

Repository Library: A central place where library collections are stored and made accessible. EPA repository libraries collect and preserve EPA documents and other materials deemed of value to the EPA National Library Network.

Resource Sharing: The activities that result from an agreement, formal or informal, among a group of libraries (usually a consortium or network) to share collections, data, facilities, personnel, etc., for the benefit of their users and to reduce the expense of collection development.

Serial: A publication in any medium issued under the same title in a succession of discrete parts, usually numbered (or dated) and appearing at regular or irregular intervals with no predetermined conclusion. Most libraries purchase serials via subscription.
SOW: See Statement of Work.

Stacks: The area of a library where the main body of the collection (usually books and periodicals) is stored when not in use, usually on rows of free-standing double-faced shelving. In some libraries the stacks are closed to the public, but most libraries in the United States allow patrons to browse all or part of their primary collections in open stacks.

Statement of Work (SOW): A specific statement regarding the requirements needed in a service contract. The statement of work should include all aspects of job requirements, performance and assessment.

Subscription: The right to receive or access a newspaper or periodical for a designated period of time (or prescribed number of successive issues), upon payment of a subscription fee payable in advance to the publisher or subscription agent. Most subscriptions are renewed annually. Subscription also refers to the right of a library or library system to provide access to a bibliographic database or other online resource to its patrons under a licensing agreement with a vendor upon payment of an annual subscription fee and is subject to renewal.

Weeding: The process of evaluating items in a library collection title by title to identify for permanent withdrawal those that meet pre-established weeding criteria, especially when space in the stacks is limited. Because weeding usually refers to print materials and other physical formats, it is a narrower term for deselection.

10. WAIVERS
Waivers to these procedures must be approved by the Assistant Administrator for Environmental Information/Chief Information Officer. Waiver requests must be submitted in writing by the requesting office’s Senior Information Official (SIO) through the Director of the Office of Enterprise Information Programs.

11. RELATED POLICIES, STANDARDS AND GUIDANCE
The following related policies, standards and guidance documents are available on the Office of Environmental Information Policy page (http://www.epa.gov/irmpoli8):

CIO 2170-P-01.2  EPA Library Materials Dispersal Procedures
CIO 2170-P-04.2  EPA Library Usage Statistics Procedures
CIO 2170-P-05.2  Digitization Processes for EPA Libraries Procedures

12. MATERIAL SUPERSEDED
These procedures supersede CIO 2170- P-08.0 EPA Library Collection Development and Management Procedures dated March 2011.
13. ADDITIONAL INFORMATION

For further information about these procedures, please contact the EPA National Library Network Program Manager at epalibrarynetwork@epa.gov.

Ann Dunkin
Chief Information Officer
U.S. Environmental Protection Agency
