

## Top 30 On-site Generation (as of February 8, 2017)

The Top 30 On-site Generation list represents those partners generating and consuming the most green power on-site within the Green Power Partnership. The combined on-site green power consumption of these organizations amounts to nearly 1.2 billion kilowatt-hours of green power annually, which is equivalent to the electricity use of nearly 110,000 average American homes each year.

Partner Name	Annual On-site Green Power Usage (kWh)	On-site % of Total Electricity Use*	On-site Resources	Purchased Green Power (kWh)
