### U.S. ENVIRONMENTAL PROTECTION AGENCY

Superior Barrel and Drum - Removal Update

# UNITED STATES ENVIRONMENTAL PROTECTION AGENCY Region II

Subject: Removal Update Commence Removal of Non-Hazardous Debris; Prepare for T&D of Remaining Waste Superior Barrel and Drum Elk, NJ Latitude: 39.6930670 Longitude: -75.1345550

From: Keith Glenn, OSC/Environmental Scientist

**Date:** 6/2/2014

Reporting Period: May 27, 2014 through June 1, 2014

## FOR PREVIOUS REMOVAL UPDATES, PLEASE CONTACT: <u>glenn.keith@epa.gov</u>

### **Current Activities**

Removal operations of non-hazardous debris continued at the site. All conditions for the removal of waste under transportation and disposal (T&D) subcontract 4 were finalized and preparations for removal of material commenced. All off-site rule requests for disposal companies were submitted, reviewed and approved. The final waste profiles were received and processed in preparation for removal of remaining containerized wastes. Personnel prepared non-hazardous soils and bulk liquids for removal. Additional funding was received for mitigation activities.

The EPA continued to work with numerous partners including the Gloucester County Fire Marshal's Office, HazMat Team, NJDEP, U.S. Fish and Wildlife Service, and local officials. NJDEP personnel continued weekly visitations. Security personnel continued to patrol the site during non-operational hours.

### **Response Actions to Date**

To view removal actions completed during other operational periods, please contact Keith Glenn at 732-321-4454 or email: <u>glenn.keith@epa.gov</u>.

Roll-off containers were cycled to and from the facility with empties brought in and full ones removed. Material was nonhazardous debris that included soiled personal protective equipment, tote parts and operational waste. A total of 130 cubic yards of debris has been transported to a Subtitle D Landfill, including shipments on May 27<sup>th</sup>, 28<sup>th</sup>, and 30<sup>th</sup>. Personnel constructed a processing area for handling the non-hazardous soil contained in 55-gallon drums. A lined pad over concrete slab surrounded by boom was assembled west of the former incinerator. Drums are brought to this location where they are cut open or split prior to being crushed. All material, including drum and contents, are then placed in roll-off boxes. This material is identified under T&D subcontract 4 and will be removed in future operational periods.

Site management and the T&D subcontractor reviewed analytical data received from samples collected of bulk nonhazardous liquids located on-site. Conditions outlined in the subcontract were reviewed to ensure the most cost-efficient method of removal will be utilized. Additional removal preparations were completed including receipt and removal of all waste profiles of the remaining waste. A list of disposal facilities was given to EPA for review and all off-site rule requests were processed. All facilities were approved for use.

NJDEP continues to review options for the potential removal of used tires located on-site.

RST continued to provide air monitoring to ensure the safety of personnel and surrounding properties. Additionally, RST continued to manage the SCRIBE, FlexViewer and Response Manager databases.

### **Progress Metrics**

Date Shipped	Waste Stream	Mediu m	Quantity	Manifest #	Treatment	Disposal Facility
1/30/201 4	Waste Inorganic Liquid	Liquid Wastes	4,500 gallons (37 containers)	012500207	Landfill,Wastewater Treatment, Incineration, Neutralization	Advanced Disposal (CCL),Environmental Recovery Corp., Heritage-WTI, Vickery Environmental
2/6/2014	Waste Flammable Solid	Solid Wastes	982 gallons (7 containers)	012500266	Fuel Blending, Incineration	Ross Incineration Services; Geocycle; Buzzi Unicem USA
2/6/2014	Waste Flammable Corrosive, Acidic Solid	Solid Wastes	55 gallons (1 container)	012500266	Incineration	Heritage - WTI
2/6/2014	Waste Corrosive, Inorganic, Acidic Liquid	Liquid Wastes	381 gallons (9 containers)	012500266	Aqueous Treatment, Stabilization,Landfill	EQ of Detroit;Advanced Disposal (CCL);Max Environmental
2/6/2014	Waste Chromium and Lead Contaminated Solid	Solid Wastes	168 gallons (4 containers)	012500266	Neutralization/Stabilization,Landfil	MAX Environmental;Vicker y Environmental
2/6/2014	Waste Mercury Contaminated Corrosive, Inorganic, Acidic Liquid	Liquid Wastes	containers)	012500266	Aqueous Treatment	EQ of Detroit

### Planned Response Activities

Collaboration between the EPA, NJDEP, FWS, County, and local officials will continue throughout the removal activities of the Superior Barrel and Drum Site.

During the next operational period, material identified in T&D subcontract 4 will start to be removed from the site. Drums containing non-hazardous soils and solids have been prepared for removal. This material was processed and placed in roll-off containers. Approximately 82 containers have been cut, crushed and placed into one of two roll-off containers housed at the facility. This material will be removed the week of June 2, 2014. Additionally, the removal of non-hazardous bulk liquids will be removed via tanker starting June 2, 2014 and continue until all remaining waste has been transported for disposal. Once voided, ERRS will process containers that held non-hazardous liquids and prepare them for destruction.

All mercury switches found in process equipment throughout the property will remain on-site for the time being. EPA is reviewing the criteria outlined in the Mercury Export Ban Act of 2008.

The sampling design for ground water and additional soil samples will continue to be developed. Additional sampling activities associated with the comprehensive assessment will commence in July 2014.

RST personnel will continue perimeter air monitoring until wastes have been removed from the facility.

#### lssues

Due to scheduling conflicts with transportation companies, site hours will be altered to remove wastes as efficiently as possible.

The time frame for the second assessment at the site hinges on removal of on-site wastes as well as awarding of the RST contract, as the current contract expires on June 30, 2014.
