Current Activities

All remaining material was removed from the site indicating the completion of removal operations. All assets including personnel have been demobilized.

Response Actions to Date

To view removal actions completed during other operational periods, please contact Keith Glenn at 732-321-4454 or email: glenn.keith@epa.gov.

On July 8, 2014 the last remaining waste was removed from the Superior Barrel and Drum Site. Approximately 6,500 gallons of flammable and trichloroethylene-contaminated waste from 71 containers was removed for disposal. To date nearly 2,200 drums, totes, cylinders and other containers were removed from the site, many holding hazardous substances. Approximately 210,000 gallons of waste was sent for incineration, treatment, neutralization/stabilization, recycling or other disposal methods based on characteristics of material. This concludes the removal operations to address the containerized waste found at the property.

All personnel and equipment, with the exception of the office trailer and perimeter fencing have been demobilized from the site. Notifications to the local municipality and Police Department were made. Field operations associated with the environmental assessment are scheduled for later in July 2014.

Planned Response Activities

No additional removal activities are currently scheduled. The EPA will conduct a comprehensive environmental assessment in July and August 2014.

The EPA is anticipating on awarding a subcontract the week of July 14th for soil coring, well drilling and installation services. Field operations for the assessment are scheduled to commence the week of July 21st with a geo-physical survey to determine any potentially buried objects. Soil sample activities, well installation and ground water sampling will follow.
