Subject: Comments on Draft Inventory of U.S. Greenhouse Gas Emissions and Sinks: 1990-2015
Date: Wednesday, March 15, 2017 11:03:56 AM

I cannot see any issue more important than climate change. We must have data to deal with that. Hence there is a desperate need for the relevant data gathering which the EPA is in charge of.
It is of utmost importance that this data inventory continue with the funds necessary to maintain it.

Thank you for your attention.
