

LMOP Webinar on Upgrading LFG to Vehicle Fuel - May 23, 2017

The U.S. EPA Landfill Methane Outreach Program (LMOP) is pleased to announce we are hosting an engaging **webinar on projects converting landfill gas (LFG) into pipeline-quality (high-Btu) gas and fuel for vehicles**. Two speakers will present information about the **California Low Carbon Fuel Standard (LCFS) Program** as well as the **overall development process** associated with upgrading LFG to high-Btu and compressed natural gas (CNG), and the **influence of market forces on these types of projects**.

Tuesday, May 23 | 2:00 PM (EDT) | 1 hour in length

Presenters:

- **Dr. Veronika Pesinova, California Air Resources Board (CARB), Transportation Fuels Branch.** Dr. Pesinova is a professional engineer with more than 20 years of experience in the environmental field. She currently implements the LCFS Program for CARB.
- **Luke Morrow, Director, Morrow Renewables.** LMOP Industry Partner Morrow Renewables has more than 12 years of experience in LFG collection, compression, treatment and marketing. Morrow Renewables currently has six high-Btu LFG energy projects.

There is no cost to participate in this webinar, but registration is required. Please register online at <https://attendee.gotowebinar.com/register/5369097079762361345>.

Sincerely,
The LMOP team
