

ANNOUNCEMENT BY
THE FEDERAL TECHNOLOGY TRANSFER ACT PROGRAM

The US Environmental Protection Agency's Office of Research and Development is interested in establishing a *Cooperative Research and Development Agreement (CRADA)* with up to four non-federal partners for the purpose of investigating the potential use of atmospheric water generators (AWGs) in expanding the availability of water during shortages, contamination events and other interruptions of service. We anticipate the collaborative research efforts to result in a broad comparative framework to assess innovative technology such as AWG and alternative options under different scenarios and to provide better understanding of the, cost, benefits and trade-offs.

If you are interested in this opportunity, please submit a Letter of Interest to:

Dr. Jay Garland at garland.jay@epa.gov

Please CC:

Ms. Sarah Bauer at bauer.sarah@epa.gov, and

Ms. Laura Scalise at scalise.laura@epa.gov

NLT COB September 30th, 2017.

Please direct technical questions to Dr. Jay Garland, or

Dr. Michael Jahne at jahne.michael@epa.gov

Administrative questions about the CRADA or its submission should be directed to Ms. Sarah Bauer.
