## Idaho Pollutant Discharge Elimination System: Program Application

**EPA is seeking comments on the IPDES Program application.**

**Submit comments by October 10, 2017.**

Submit a public comment and get information on public hearings and informational meetings

On August 31, 2016, DEQ submitted to EPA for review a program application petitioning for the authority to become the discharge permitting authority in Idaho. The application consisted of six main components:

1. A letter from the governor requesting approval of the state's application;
2. A program description that describes how the state will issue IPDES permits, ensure compliance with permit conditions, conduct enforcement, as well as fund and manage the program including programmatic information and data.
3. A memorandum of agreement (MOA) between the state and EPA which establishes, in part, timeframes for a phased approach for the state to assume authority.
4. A statement from the attorney general's office confirming that the state's laws and regulations provide sufficient authority to the state to implement the discharge, pretreatment, and biosolids components of the NPDES program.
5. Copies of all pertinent statutes and regulations, which the state adopted to ensure the necessary authority for implementing the IPDES program, including HB 406 directing DEQ to pursue permitting authority.
