PART 219
INCINERATORS
(Statutory authority: Public Health Law, §§ 1271, 1276)

Sec. 219.1 Title
Sec. 219.5 Smoke emissions
Sec. 219.2 Applicable geographical area
Sec. 219.6 Tests
Sec. 219.3 Definition
Sec. 219.7 Abatement
Sec. 219.4 Emission limits

Historical Note
Part added, filed April 25, 1972 eff. May 1, 1972.

Section 219.1 Title. These rules shall be known as the New York State rules to prevent air pollution from incinerators.

Historical Note
Sec. added, filed April 25, 1972 eff. May 1, 1972.

219.2 Applicable geographical area. This Part shall apply to the entire State of New York.

Historical Note
Sec. added, filed April 25, 1972 eff. May 1, 1972.

219.3 Definitions. (a) Incinerator. Any structure or furnace in which combustion takes place and type 0, 1, 2, 3, or 4 refuse is used as fuel, alone or in conjunction with fossil fuel.

(b) Refuse. All waste material, including but not limited to, garbage, rubbish, incinerator residue, street cleanings, dead animals, and offal. Refuse is classified in accordance with Table 1, Appendix 2.
219.4 Smoke. An air contaminant consisting of small gas-borne particles emitted by an air contamination source in sufficient number to be observable.

Historical Note
Sec. added, filed April 26, 1972; repealed, filing.
New filed May 17, 1972 eff. 90 days after

219.4 Emission limits. (a) All incinerators having a capacity of 2,000 lb/hr or less and built and installed after January 1, 1968, shall be designed, built, installed and operated to meet the emission limits of figure 1a.

(b) No incinerator larger than 2,000 lb/hr capacity and built after January 1, 1970, shall be operated so as to produce particulate emissions which exceed the amount shown in figure 1a.

(c) No incinerator having a capacity of 2,000 lb/hr or less and built or installed between April 1, 1962, and January 1, 1968, shall be operated so as to produce particulate emissions which exceed 0.5 lb/hr for every 100 lb/hr of refuse charged, unless a final order by the commissioner provides otherwise.

(d) Any incinerator having a capacity of 2,000 lb/hr or less and built or installed prior to April 1, 1962, shall either meet the requirements of 219.4(c) or shall be equipped with adequate control devices or redesigned and rebuilt so as to meet the requirements of 219.4(a) by January 1, 1969.

(e) No incinerator larger than 2,000 lb/hr capacity and built between April 1, 1962, and January 1, 1970, shall be operated so as to produce particulate emissions which exceed 0.5 lb/hr for every 100 lb/hr of refuse charged, unless a final order by the commissioner provides otherwise.

(f) Any incinerator larger than 2,000 lb/hr capacity and built prior to April 1, 1962, shall either meet the requirements of 219.4(e) or shall be equipped with adequate control devices or redesigned and rebuilt so as to meet the requirements of 219.4(b) by January 1, 1970.

Historical Note
Sec. added, filed April 26, 1972 eff. May 1, 1972.

219.5 Smoke emissions. (a) No incinerator, built or installed after January 6, 1967, regardless of size, shall emit smoke of an opacity denser than 20 percent of No. 1 of the Ringelmann chart or equivalent, under normal operating conditions.

(b) No incinerator built or installed prior to January 26, 1967, regardless of size, shall be operated so as to emit smoke of an opacity denser than 40 percent of No. 2 of the Ringelmann chart or equivalent, under normal operating conditions.

Historical Note
Sec. added, filed April 26, 1972 eff. May 1, 1972.

219.6 Tests. (a) All incinerators larger than 2,000 lb/hr capacity shall be tested using isokinetic sampling techniques in accordance with test procedures acceptable to the commissioner.

(b) All incinerators built or installed after January 1, 1968, and having a capacity of 2,000 lb/hr or less shall be tested in accordance with special test procedures promulgated by the commissioner. Units which are representative of the actual operation of an actual installation, in accordance with special test procedures promulgated by the commissioner.

Historical Note
Sec. added, filed April 26, 1972 eff. May 1, 1972.

* See Appendix 2, infra.

0 CN 5-51-72
219.7 Abatement. (a) Where the commissioner has reason to believe that an incinerator installation is violating the emission standards of section 219.4, he may have tests conducted. The owner shall provide, at his expense, sampling holes and pertinent allied facilities as needed, at the request of the commissioner.

(b) If such tests indicate a contravention of the emission limits, the commissioner may require the installation of appropriate control equipment or he may seal the incinerator if such equipment is not installed within the time limit specified by the commissioner.

(c) The commissioner may order the cleaning, repair, replacement or alteration of any equipment or control equipment which causes or is operated so as to cause a violation of this Part.

(d) The commissioner may order a change in the manner of operation of any incinerator which is operated so as to cause a violation of this Part.

Historical Note
Sec. added, filed April 28, 1972 eff. May 1, 1972.
